Student Engagement

Student Engagement performance standards are set out in Clause 2.2 of Schedule 6 of the Partnership Schools Agreement. Annex A to Schedule 6 provides specific performance standards for each year level.
Please provide your student engagement results for this quarter below.

Student Engagement	Annual Performance Standard	Q1	Q2	Q3	Q4	YTD	Annual Limit
Unjustified Absences	0.028 multiplied by the number of Students multiplied by the number of days the School is open	139.1	197.06			336.2	734.2
Stand Downs	2.1 occurrences per year per 100 Students	0	0			0	2.9
Suspensions	0.42 occurrences per year per 100 Students	0	0			0	0.6
Exclusions	0.15 occurrences per year per 100 students	0	0			0	0.2
Expulsions	0	0	0			0	0.0

Please provide details if you have not met any of the student engagement performance standards. If you have met all performance standards, please specify "n/a".

Over this quarter, we experienced a decline in attendance rates from 86.1% in Q1 to 77.9% in Q2. A small cohort of 22/138 students or 16% had less than 80% attendance rate. The low attendance rates ranged from only 30 to 79% which also translated into an increase of unjustified absences. The main reasons for absences out of this group of students are due to truancy 68%, serious sickness 14%, at risk behaviour 18%. The Sponsor's commitment to strengthening our pastoral team is now making a more positive impact whereby we are beginning to see an improvement in term 3.

Wellbeing@School Survey

Schedule 6 of the Partnership Schools Agreement requires you to run the Wellbeing@School Survey annually.

NOTE: The Wellbeing@School survey is only available for students in years 5 and above.

Target % priority learners	Actual % priority learners			
	Q1	Q2	Q3	Q4
75%	100	100		

Please provide an explanation if your quarterly result is lower than 75%. You may also choose to comment even if you have met the target range. If you have no comment, please specify "n/a".

na

Financial Performance

Financial Performance Measures are set out in Clause 2.3 of Schedule 6 of the Partnership Schools Agreement.

Operating Surplus (Target: 2%-5%)

The Operating Surplus is the difference between total revenue and total expenditure (including interest expenses, tax, and depreciation on assets). Schools should generally have a small surplus each year to ensure sufficient reserves are available to provide for any unexpected expenditure.

The Operating Surplus is calculated as follows:

Net Surplus after expense, taxes, depreciation and amortisation divided by total revenue.

Operating (Net) Surplus	Q1	Q2	Q3	Q4	YTD
Income (\$)	\$632,239	\$670,394			
Expenditure - incl interest, tax & depreciation (\$)	\$615,867	\$640,747			
Operating (Net) Surplus (\$) - after interest and taxes	\$16,372	\$29,646	\$0	\$0	\$0
Operating (Net) Surplus (%)	2.6%	4.4%	0.0%	0.0%	0.0%

Please provide an explanation if the quarterly result does not meet the performance standard. Your explanation should outline the reasons for this, what actions you are taking to remedy the situation, and an estimated date by which the Operating Surplus will meet the performance standard. You can comment even if you have met the performance standard. If you have no comment, please specify "n/a".

Ministry Quarterly grant was higher this quarter at \$648,287 and we received other school support funds this quarter and school donations leading to the \$670,394. We also had additional costs this last quarter with more staffing resources, school activities, catering expenses and governance expenses. There were no major surprises and we were able to generate a \$29,646 surplus for the quarter for a 4.4% Operating Surplus which is on track within the contract performance requirements.

Working Capital Ratio (Target: at least 2:1)

The Working Capital Ratio includes a school's ability to meet their short-term financial obligations through sound financial operation. Having a Working Capital Ratio of at least 1:1 means that a school is able to pay its short-term debts and operate with some flexibility. For example, if the Working Capital Ratio is 1.35:1, this would mean that for every \$1 of current liabilities owed, the school has \$1.35 current assets to use to meet their short-term financial obligations.

The Working Capital Ratio is calculated as follows:
current assets divided by current liabilities

Working Capital Ratio	Q1	Q2	Q3	Q4
Current Assets (\$)	\$1,561,242	\$1,475,742		
Current Liabilities (\$)	\$77,850	\$199,094		
Working Capital (\$)	\$1,483,392	\$1,276,649	\$0	\$0
Ratio (eg 2:1)	20.1:1	7.4:1	0	0

Please provide an explanation if the quarterly result does not meet the performance standard. Your explanation should outline the reasons for this, what actions you are taking to remedy this, and an estimated date by which the Working Capital Ratio will meet the performance standard. You can comment even if you have met the performance standard. If you have no comment, please specify "n/a".

Our Working Capital Ratio is strong at 7.4:1 well above the Target of 2:1. Again mainly due to PPAT carrying a strong cash position due to initial funding held to spread any capital/leasehold improvements over several years as the school grows. Current liabilities grew this quarterly due main to timing of creditors, accounts payable and staff leave entitlements increasing due to staff numbers increasing this corporate year.

Debt Equity Ratio (Target: Maximum 0.5:1)

A Debt Equity Ratio indicates how much debt an organisation is using to finance its assets relative to the amount of value it holds in equity. A ratio lower than 1 indicates that the entity has taken on manageable debt levels and has a low risk, and the lower the number, the less risk the entity is exposed to.

The Debt Equity Ratio is calculated as follows:
total liabilities divided by total equity

Debt Equity Ratio	Q1	Q2	Q3	Q4
Equity (\$)	\$1,322,905	\$1,169,896		
Total Liabilities (\$)	\$658,496	\$779,740		
Ratio (eg 0.5:1)	0.5:1	0.7:1	0	0

Please provide an explanation if the quarterly result does not meet the performance standard. Your explanation should outline the reasons for this, what action you are taking to remedy this, and an estimated date by which the Debt Equity Ratio will meet the performance standard. You can comment even if you have met the performance standard. If you have no comment, please specify "n/a".

This is always a contentious ratio for us to explain. We carry our original set up costs in an income in advance liability account and we draw down from this account into revenues as we need to spend of capitalisation/leasehold improvement. So it is a fund we fundamental owe to ourselves and represents \$580,646 of the Total liabilities mount. So while we are above the 0.50:1 ratio at 0.70:1, but the more correct ratio would be closer to 0.2:1 which is very healthy.

Operating Cash Flow (Target: positive operating cash flow)

Operating Cash Flow represents the net inflow and outflow of cash in relation to the operating activities of your school for the quarter. A positive Operating Cash Flow indicates that the school is able to generate sufficient cash flow to maintain and grow its operations.

The Operating Cash Flow is calculated as follows:

by adjusting the net surplus to take into account non-cash income and operating expenses, and changes to working capital (excluding cash)

	Operating Cash Flow	Q1	Q2	Q3	Q4	YTD
	Operating (Net) Surplus - after tax	\$16,372	\$29,646	\$0	\$0	\$0
less	Non-cash income (eg Establishment Funding released over time)	\$0	\$0			\$0
plus	Non-cash Operating Expenses (eg depreciation)	\$30,000	\$22,500			\$52,500
less	Changes in Working Capital - excluding cash*	\$0	\$0			\$0
	Operating Cash for the quarter (\$)	\$46,372	\$52,146	\$0	\$0	\$52,500

* Increases in Working Capital should be inputted as a positive number, whereas decreases in Working Capital should be inputted as a negative number.

Please provide an explanation if the quarterly result does not meet the performance standard. Your explanation should outline the reasons for this, what action you are taking to remedy this, and an estimated date by which the Operating Cash Flow will meet the performance standard. You can comment even if you have met the performance standard. If you have no comment, please specify "n/a".

Overall we are satisfied with this quarters cashflow performance given we had addition MoE funding and donations this quarter partly attributed to a health school roll

Debt Service Coverage Ratio

Clause 18.2 of the Partnership Schools Agreement requires you to report on your Debt Service Coverage Ratio as part of each quarterly and each annual report if you are servicing any term debt. The Debt Service Coverage Ratio is a measure of the cash flow available to pay current debt obligations. It states forecast net operating income as a multiple of debt obligations due within one year. If the ratio is less than 1, the borrower is unable to pay current debt obligations without drawing on outside sources - without, in essence, borrowing more. If it is too close to 1 - say 1.1 - the entity is vulnerable, and a minor decline in cash flow could make it unable to service its debt.

The Debt Service Coverage Ratio is calculated as follows:

by dividing the forecast net operating surplus for the next 12 months (before interest, taxes and lease payments) by the total of debt obligations due within one year (including interest, principal, sinking fund and lease payments, and including property and other operating leases, eg photocopiers).

18.2(b) Do you service any interest, principal or lease payments?

Yes

Please complete the table below if the answer is "yes".

Debt Service Coverage Ratio	Q1	Q2	Q3	Q4	YTD
Forecast Operating (Net) Surplus for the next 12 months - after interest and taxes	\$15,000	\$30,000			\$45,000
Forecast Interest and Lease Payments Payable for the next 12 months	\$100,000	\$100,000			\$200,000
Forecast Operating (Net) Surplus before interest, lease payments and taxes for the next 12 months	\$115,000	\$130,000	\$0	\$0	\$245,000

Total debt obligations due in the current next 12 months (including interest, principal, sinking fund and lease payments, and including property and other operating leases (eg photocopiers)	\$100,000	\$100,000			\$200,000
Debt Service Coverage Ratio (%)	1.2:1	1.3:1	0:1	0:1	1.2:1

18.2(a) Has the Sponsor defaulted on any of its debt obligations, or can reasonably anticipate that it may soon default on any of its debt obligations?

No

Please provide further detail if the answer is "yes". If the answer is "no", please specify "n/a".

We do not expect to default on any debt obligations we currently have and we have not had any in the past, but we have maintained a strong credibility among our suppliers and funder and a good cashflow position to respond to any specific issues that may arise.
