

# Christchurch Schools Rebuild Programme Halfway Point

AUGUST 2019

**We are focused on the future and committed to putting schools, their communities and their education needs at the heart of our work.**

## What's happening

At the halfway point in the Christchurch Schools Rebuild programme, our close working relationships with schools, principals, boards of trustees, parents and communities are stronger than ever. Together, we are transforming education in Christchurch.

Looking back over the past five years of the programme, there is much to celebrate. We are proud of the progress made so far. Every day, thousands of Christchurch children and young people are learning and achieving in what's becoming one of the most modern education networks in the country.

These new learning spaces allow our teachers to use innovative teaching methods – and the minds of children and young people are thriving. We can be safe in the knowledge the future of Christchurch's tamariki and their education is at the heart of our work.

Thank you to principals, boards, teachers, students and parents for their ongoing support with this work.

Please take a look and see what's been achieved.

Kim Shannon

Head of Education Infrastructure Services

## Christchurch Schools Rebuild

The Christchurch Schools Rebuild (CSR) programme is investing \$1.137 billion to rebuild and repair 115 schools damaged by the 2010 and 2011 earthquakes. This includes 13 new schools, 10 rebuilt schools, 34 major redevelopment projects of more than \$5 million, and 58 minor redevelopments.

By the end of the programme, over 80% of state school teaching spaces in greater Christchurch will meet core standards for lighting, ventilation, heating and acoustics. All will have infrastructure to support the latest digital technology.

### Participants in Christchurch School Rebuild

**Schools:** 115

**Students:** 52,292

**Teaching spaces:** 2,273

### Projects

**New Schools:** 13

**Existing Schools on new sites:** 10

**Major redevelopments:** 34

**Minor redevelopments:** 58

**Minor works projects:** 923

### Student spaces completed to date

**Student spaces:** 6,952

**Teaching spaces:** 447

We aim to create quality learning spaces with improved fit-for-purpose facilities which will support each school's vision for delivering education and improved outcomes for students.

We place a strong emphasis on how we design learning spaces to motivate students to engage and learn. We encourage flexibility as a feature of all spaces we build or update so they can easily be repurposed as educational needs change over time. These learning spaces are better able to adapt as teaching and learning practices change. The adaptability and flexibility of these spaces also means spaces can evolve over time, alongside a school's vision for education.

#### **Progress to mid-2019:**

Of the 115 schools planned for inclusion in the programme, 113 are either completed or underway. Two schools out of 115 are yet to enter the programme.

#### **As at 30 June 2019**

40 schools are complete

26 are in construction

4 are in the construction tender phase

43 are in planning and design

## **Grow Waitaha**

The vital role we play is not just to support schools through changes to their buildings but also to assist schools to achieve their specific vision for teaching and learning.

This led to the creation of the Grow Waitaha project that supports schools from the moment they start thinking about their new school or a redevelopment. Grow Waitaha has touched just about every school in greater Christchurch, even the schools that did not require a rebuild or repair of their premises.

*New Ao Tawhiti campus*

## **Mana Whenua facilitation**

Cultural narrative is an integral part of the physical rebuild effort across schools in greater Christchurch.

We worked with Te Rūnanga o Ngāi Tahu to establish iwi-based facilitators who lead the working partnership between mana whenua and our schools.

A key result is that many of our schools are now working in partnership with iwi and Rūnanga to understand their cultural narrative and explore culturally responsive practices.

*New Avonside Girls'/Shirley Boys' campus*

## **Ao Tawhiti School**

Ao Tawhiti Unlimited Discovery school opened in central Christchurch in time for Term 2, 2019. The new \$30 million building has more than 600 school students and staff, with specialist rooms for drama, science, art, media, design and hospitality studies, plus a small gym, classrooms, and open-learning spaces.

At the beginning of 2019, Knights Stream School in Halswell and Ararira Springs Primary in Lincoln were opened, with Wigram Primary relocating to its new site.

## **Avonside Girls'/ Shirley Boys' and Ferndale School Satellite**

Christchurch's Avonside Girls', Shirley Boys' High Schools and Ferndale School Satellite held their first lessons at their new shared campus in May 2019.

The purpose-built site is on the former QEII Park in North New Brighton.
