

Routine Maintenance Schedule - Projector

To be undertaken by a competent and trained person.

Testing and maintenance should be carried out in accordance with manufacturers & installer recommendations. In lieu of these documents the following task list is a guide to be used by a trained and competent person who is familiar with this technology. We recommend this task be undertaken 6 monthly or following any remedial works.

Asset detail (make, model, number & type of detectors, etc)

Technician

Date of service

/ /

DD/MM/YYYY
