In confidence

Office of the Minister of Education

Cabinet Business Committee

Policy approvals for tertiary and international learner wellbeing and safety: code of practice, dispute resolution scheme rules and legislative changes

Proposal

- 1 I seek your agreement for policy decisions on a package of provisions for learner wellbeing and safety, following public consultation. This includes:
 - 1.1 a new code of practice for the pastoral care of domestic tertiary and international learners, which must take effect by 1 January 2022;
 - 1.2 a new dispute resolution scheme to resolve financial and contractual disputes between domestic tertiary learners and providers, also to start by 1 January; and
 - 1.3 legislative proposals to support and reinforce the focus on learner wellbeing and safety, to be progressed in the Education and Training Amendment Bill (No 2).
- 2 I seek approval to issue drafting instructions for the scheme rules and the legislative proposals.
- 3 I also seek approval of the attached Government response to the Education and Workforce Committee Inquiry into student accommodation, due to be tabled in Parliament by 6 August 2021.

Relation to government priorities

- 4 This work supports the Government's overall focus on wellbeing and creating a fairer New Zealand. It was not specifically mentioned in the Speech from the Throne or manifesto. It links to strengthening social cohesion, supporting diversity, and creating a New Zealand where all people feel safe, have equal access to opportunities and do not experience discrimination.

Executive Summary

- 5 I seek Cabinet agreement to policy decisions on a package of provisions for learner wellbeing and safety, following public consultation. This is to meet my obligations under the Education and Training Act 2020 (the Act) to have a new code of practice for pastoral care of domestic tertiary learners, and a dispute resolution scheme, in place by 1 January 2022. The package includes:

- 5.1 a new code of practice of pastoral care which sets out shared requirements for domestic and international tertiary learners, and retains specific protections for international students, replacing the existing interim¹ and international codes;²
 - 5.2 proposals for rules for the dispute resolution scheme to resolve financial and contractual disputes between domestic tertiary learners and their providers;
 - 5.3 legislative changes to support and reinforce the focus on wellbeing and safety, and ensure settings for the code, code administrator and dispute resolution scheme are fit-for-purpose; and
 - 5.4 the Government response to the Education and Workforce Committee Inquiry into student accommodation, due to be tabled in Parliament by 6 August 2021.
- 6 The overall purpose of this work is to develop a system of supports for the wellbeing and safety of domestic tertiary and international learners, through one set of clear rules and expectations that providers can tailor to their learners' needs.
- 7 I expect the proposed code and scheme rules to be in place for the next two to three years. This will allow for law changes to be confirmed and for learners and providers to have worked with these instruments and to refine them to ensure they remain fit for purpose and continue to evolve.
- 8 I intend to release a summary of feedback from public consultation, table the Government response to the inquiry and issue the new code following Cabinet decisions. This will include a high-level overview of the package of decisions. I intend to appoint the New Zealand Qualifications Authority (NZQA) as code administrator shortly after issuing the new code, to develop guidance on how the code can work and support providers and learners to give effect to it.
- 9 The scheme rules and legislative changes will be subject to legislative drafting. I intend to report back to Cabinet in October 2021 seeking legislative approval for the rules. I will appoint a scheme operator later this year following a selection process. █
█
█

Background

Ensuring learner wellbeing and safety is essential for learners to be able to achieve their aspirations in education and beyond

- 10 Our Government has been developing a system of supports for the wellbeing and safety of domestic tertiary and international learners, through one set of clear rules and expectations that providers can tailor to their learners' needs.
- 11 This is central to a genuinely learner-centred education system, and to high-value international education, as signalled in the new Tertiary Education Strategy and

¹ Education (Pastoral Care of Domestic Tertiary Students) Interim Code of Practice 2019

² Education (Pastoral Care of International Students) Code of Practice 2016

National Education Learning Priorities, the International Education Strategy 2018-2030, and the Strategic Recovery Plan for International Education (the recovery plan).

- 12 The interim code was developed quickly to urgently address growing concerns about the wellbeing of domestic tertiary learners. This was a temporary response, allowing time to develop a new, more robust code that would be subject to a full engagement process with the sector. Due to the impacts of COVID-19, the duration of the interim code was extended to expire on 1 January 2022 [CAB-20-MIN-0253].
- 13 More broadly, the proposals in this paper will raise the prominence of wellbeing and safety as a precondition to success in education, address concerns around mental health, and support more equitable outcomes for diverse learners, including Māori, Pacific, disabled, LGBTQIA+, ethnic or migrant and former refugee learners.
- 14 This work also plays a role in Government’s commitment to respond to concerns about racism and discrimination and to strengthen social cohesion in New Zealand. Every learner has the right to a safe, healthy, and supportive learning environment, where they are accepted and respected, and an education that values their identity, language, and culture, and those of their whānau and family.
- 15 The new code, dispute resolution scheme, and legislative changes will also integrate the expectations for the Crown’s obligations under Te Tiriti o Waitangi. This means ensuring the system of supports honours Te Tiriti o Waitangi and works well for Māori, including through supporting the rights of Māori learners and their whānau as both tangata whenua (under article 2) and citizens (under article 3).
- 16 In May 2021, the Education and Workforce Select Committee reported on its enquiry into student accommodation, begun in June 2020. This was in response to growing concerns about the nature, ownership, regulation, and wellbeing and safety provisions of student accommodation in New Zealand. The report delivered on the inquiry’s aim to inform the development of the new code.

Overview of proposals

- 17 We need to keep enhancing existing provisions to ensure we have an effective system in place for supporting learner wellbeing and safety that reflects our strategic direction for a learner-centred education system and provides for continuous improvement.
- 18 The table summarises key decisions for Cabinet, and next steps, for the proposals:

Proposal	Key recommendations	Next steps
New code of practice for pastoral care of domestic tertiary and international learners	Approve the proposed code (appendix B) I propose to retain the structure and framework of the draft code I consulted on, which builds on the existing codes. Note key changes to the code following consultation: 1. I have improved the clarity of obligations for providers, including by enabling more flexibility where appropriate 2. I have tightened the focus on who providers need to work with, emphasising learners as key stakeholders 3. I have removed clauses that overreach learner wellbeing and safety Note my intention to re-appoint NZQA as code administrator	Minister of Education issues code in July 2021 and appoints code administrator Code is presented to the House of Representatives Code administrator develops guidelines and works with the sector to implement the new code New code takes effect from 1 January 2022

IN CONFIDENCE

Proposal	Key recommendations	Next steps
<p>Establish rules for the dispute resolution scheme for domestic tertiary learners</p>	<p>Agree to the proposals for the operating and monitoring of the scheme (proposed rules attached in appendix C)</p> <p>I propose to retain the framework of the draft rules I consulted on. Note changes to the scheme following public consultation:</p> <ol style="list-style-type: none"> 1. I recommend the scheme rules reflect the learner’s journey through the scheme 2. I have made other detailed changes to: <ol style="list-style-type: none"> a. re-balance the interaction of the scheme and its decisions with the rule of law; b. clarify the scheme operator’s functions and duties; and c. ensure the rules’ consistency with the Privacy Act 2020 <p>Invite me to issue drafting instructions for the rules</p>	<p>Targeted consultation on Parliamentary Counsel Office (PCO)-drafted rules, with interested groups</p> <p>Report-back to Cabinet for legislative approval after consultation expected in October 2021</p> <p>Governor General makes the rules by Order in Council</p> <p>Selection process to appoint a scheme operator, from August 2021</p> <p>Scheme takes effect from 1 January 2022</p>
<p>Amendments to the Education and Training Act 2020 to further support learner wellbeing and safety</p>	<p>Agree to the proposed amendments to the Act to be included in the Education and Training Amendment Bill (No 2) (technical detail included in appendix D)</p> <p>Agree to the range of proposed amendments relating to:</p> <ol style="list-style-type: none"> 1. <i>Code provisions</i>: I propose to strengthen the focus on wellbeing and safety, provide for a responsive code and modernise code provisions 2. <i>Code administrator provisions</i>: I propose to ensure the administrator has appropriate functions, powers, and duties, and to modernise code administrator provisions 3. <i>Dispute resolution scheme provisions</i>: I propose to broaden the scope of the scheme, improve and clarify provisions for the appointment of the scheme operator, set a timeframe for appeals and retain the current cap on any claim 4. <i>Administrative arrangements</i>: I propose several other changes, including to clarify information sharing and privacy provisions for the code administrator and scheme operator <p>Note the proposed amendments will:</p> <ol style="list-style-type: none"> 1. better support learner wellbeing and safety by clarifying the code focus and the functions, powers and duties of the code administrator; 2. strengthen the focus and operation of the dispute resolution scheme; and 3. improve transparency about decision-making <p>Invite me to issue drafting instructions for the proposed amendments</p>	<p>PCO to draft legislative amendments for inclusion in the Education and Training Amendment Bill (No 2)</p> <p>9(2)(f)(iv)</p> <p>[REDACTED]</p> <p>[REDACTED]</p>
<p>Government response to the Education and Workforce Committee inquiry into student accommodation</p>	<p>Agree to response (appendix E)</p> <p>Note that I propose we accept the Committee’s seven recommendations but that the final code and scheme differ slightly from those endorsed by the Committee based on sector feedback</p>	<p>Response tabled in the House of Representatives by 6 August 2021</p>

Key findings from consultation

- 19 From 7 April to 21 May 2021, New Zealanders were consulted on drafts of the code, scheme rules and legislative change proposals [CAB-21-MIN-0095]. Officials received over 100 written submissions and survey responses from learners, whānau and associations, providers, sector peak bodies, community and health organisations and dispute resolution experts. Officials also conducted around 60 face-to-face and online engagements, with a particular focus on learners and communities representing groups that are underserved by the education system.
- 20 A detailed summary of consultation feedback is attached to this paper in **appendix A**. I propose to release this alongside the announcements of policy decisions.

Participants were broadly supportive of the package of proposals, however, views differed on how to strike the best balance

- 21 There is general support for the goals of learner wellbeing and safety in tertiary education settings to support achievement and broader community wellbeing. Feedback was also generally positive relating to:
- 21.1 the proposed code, including combining the interim and international codes while retaining existing provisions for schools providing international education, and potential considerations for future iterations of the code;
 - 21.2 developing guidance that provides examples and insights into how the code can work in different provider contexts and for the full range of learners; and
 - 21.3 the proposal to create a new dispute resolution scheme for domestic tertiary learners to provide a similar process currently only available to international learners.
- 22 Views differed overall on how to strike the best balance of expectations across the proposals to support learner wellbeing and safety, with providers and learners respectively saying the balance is too far in the direction of the other.
- 23 Consultation also raised questions about how the package of proposals fits within a broader context, with funding requests to implement the code (from providers) and for services and advocacy support (from learners), and comments on the availability of community and learner mental health and disability supports. Several providers questioned the 1 January 2022 implementation deadline, given the code and scheme will likely be revised again after 2022 based on the legislative change proposals.

I have carefully considered sector feedback in the design of the final proposals

- 24 I have carefully considered sector feedback in the design of the final proposals set out in this paper, aiming to strike a principled and pragmatic balance. I have considered how the code and dispute resolution scheme fit within the wider systems of support for learner wellbeing and safety, as building blocks of a national framework for provider-level relationships with learners and continuous improvement of practice.
- 25 I recognise the concerns raised by providers around timeframes, ambiguity, and cost impacts of the proposals, as well as concerns raised by learners around the level of

support and the potential of increased costs of services. I intend to manage these impacts and concerns through clear communication that the changes are strengthening care provisions to better meet the needs of learners. I am not creating a new system; rather, these proposals are a next iteration building on and refining existing provisions and expectations based on what we have learned to date.

- 26 The system will continue to evolve as providers, learners and their communities engage with it. It is also important to note that the expectations in the code are flexible and enabling: providers can apply them in a way that is appropriate to their learning, communal and residential contexts, and to the specific needs of learners within these contexts. Supporting providers and learners in transitioning to this next iteration will be critical to its success.

A new code of practice covering domestic tertiary and international learners

Key recommendations	Next steps
<p>Approve the proposed code (appendix B)</p> <p>I propose to retain the structure and framework of the draft code I consulted on, which builds on the existing codes. Note key changes to the code following consultation:</p> <ol style="list-style-type: none"> 1. I have improved the clarity of obligations for providers, including by enabling more flexibility where appropriate. 2. I have tightened the focus on who providers need to work with, emphasising learners as key stakeholders. 3. I have removed clauses that overreach learner wellbeing and safety. <p>Note my intention to re-appoint NZQA as code administrator</p>	<p>Minister of Education issues code in July 2021 and appoints code administrator</p> <p>Code is presented to the House of Representatives</p> <p>Code administrator develops sector guidelines and works with the sector to implement the new code</p> <p>New code takes effect from 1 January 2022</p>

- 27 I propose to issue the new code following Cabinet decisions. I have attached the proposed code in **appendix B**. The code supports tertiary and international providers to embed learner wellbeing and safety across their organisation, recognising that people, systems, and processes are interconnected.
- 28 Through consultation, the overall message from providers was that the proposed code went too far to set new requirements and expectations on providers, in particular where these are seen to encroach on teaching and learning practices; whereas tertiary and international learners (and those who support them) argued that the proposals did not go far enough to support learner wellbeing and safety. There is support for the flexibility of an outcomes-based code, but with questions about how much should be set out in processes required to achieve the outcomes and how to strike the right level of certainty, continuous improvement, learner voice and transparency.
- 29 I have tested the proposed changes to the code with national student representatives and provider peak bodies.³ I have adjusted the proposed code to make it more workable in response to feedback received to date, and will table further revisions for the Committee's consideration if needed.

³ This included representatives of the New Zealand Union of Students' Associations, Te Mana Ākonga, Tairā Pasifika, the National Disabled Students' Association, the New Zealand International Students' Association; as well as Te Pūkenga, Universities New Zealand, Te Taihū o Ngā Wānanga, English New Zealand, Independent Tertiary Education New Zealand and Quality Tertiary Institutions.

I propose to retain the structure and framework of the draft code I consulted on

- 30 Issuing combined expectations for domestic tertiary and international learners in a single code will ensure consistent and clear expectations that meet the needs of diverse learners. The new code continues to spell out the expectations that apply now regarding the specific needs of international learners. It also restates existing requirements for schools with international students, given the impacts of COVID-19 and the early stage of work under the recovery plan. The schooling sector supported this.

I have improved the clarity of obligations for providers

- 31 I have improved the clarity of obligations in the code for providers by:
- 31.1 clarifying that the code applies in a way that is appropriate to the provider's particular learning, communal and residential context, and to the specific needs of learners within these contexts;
 - 31.2 reducing the number of outcomes, rewording or grouping processes under broader outcomes that are meaningful for learners, restructuring clauses, and removing lengthy examples that would be better placed in guidelines; and
 - 31.3 changing specific wording to help clarify the purpose and expectations of certain outcomes, including relating to obligations under Te Tiriti o Waitangi.
- 32 This addresses feedback from providers who tended to favour a simpler framework and sought clarification on which processes are specific requirements and which are focused on continuous improvement. These changes also allow suitable flexibility for providers to respond to the specific needs of their learners, addressing concerns about the code being perceived as a one-size-fits-all instrument.

I have tightened the focus on who providers need to work with, emphasising learners as key stakeholders

- 33 Before consultation, I signalled my intention for the code to require providers to increasingly involve diverse learners, whānau, iwi, communities, employers, and staff as they review the adequacy of their policies and processes in meeting the code outcomes.
- 34 Throughout the code, the emphasis has shifted to focus on providers working with diverse learners as key stakeholders, ahead of other stakeholders. I have also tightened the range of stakeholders that providers need to consult by defining other stakeholders as those who have a meaningful interest in the wellbeing and safety of learners at the provider.
- 35 This is in response to providers seeking clarification of the consultation expectations. This shift also addresses feedback from learners who wanted more emphasis ahead of other stakeholders and for this to be embedded and visible throughout the code. The code also uses more empowering language when referring to learners to convey that they play an active role in their education, wellbeing, and safety.

I have removed clauses that were seen to overreach learner wellbeing and safety

- 36 Universities and private training establishments were particularly concerned about certain processes around academic pedagogy, with universities considering that this would interfere with their academic freedom.
- 37 To balance the removal of the overreaching clauses with the views of learners (who were supportive of their increased involvement in decision-making), the code requires providers to work with learners to develop, review and improve their wellbeing and safety practices.

Impact and implementation of the new code

- 38 I expect the main impact for learners and providers will be greater clarity of expectations on providers for their learners' wellbeing and safety from one combined code.
- 39 The expected key cost of the new code for providers is in assessing, over time, its implications (and the extent to which they are different from the existing provisions) and demonstrating compliance. I do not expect that this impact, and associated administrative costs, will be significant because the new code builds on existing provisions, meaning providers can build on the work they are doing now to comply with these. Learners will also need to become familiar with the concepts in the new code and complaints and disputes systems.
- 40 Providers that predominately enrol international students may have additional administrative costs to implement new requirements that were not included in the existing international code. Small private training establishments with a focus on provision to international learners were particularly concerned about these impacts given current challenges with revenue and staffing. While schools with international students may need to update documentation, retaining current settings will minimise the burden on them at a time of significant change in the education sector.
- 41 I intend to appoint NZQA as code administrator once the new code is issued. NZQA has been undertaking this role for the interim and international codes, with a delegated function to Universities New Zealand for specific monitoring of the interim code in the university sector. As code administrator for the interim code, NZQA has focused on capability building and promoting provider responsibility for the development and review of practices to achieve the code outcomes, rather than compliance. Appointing NZQA as administrator for the new code would provide continuity for the sector. I expect to enable NZQA to make decisions on delegating administration functions for the new code.
- 42 Once the new code is issued, the administrator will work with the sector to promote the code through information sessions and workshops, and co-develop high-level guidelines. The administrator will publish the guidelines and its 2022 plan for code administration, so that learners and providers are clear about expectations before the code comes into effect. The administrator will also partner with students' associations to commence work to ensure tertiary providers appropriately include learner voice in determining their approach to meeting the outcomes of the code.

- 43 By 1 January 2022, the administrator expects providers will have prepared to give effect to the code. They will be familiar with the new requirements, have identified areas for improvement, and have planned to begin making those improvements. Learners will be aware of the code and of the clear pathway for raising their concerns. The administrator will continue to work with each distinct sub-sector to monitor information and capability-building needs, and to co-develop increasingly tailored guidance, tools, and quality assurance activities.
- 44 From mid-2022, the administrator will formally monitor providers' performance. If there are issues, the administrator has a range of intervention tools to use and will take an appropriate approach. The overarching aim will be for providers to increasingly own their continuous improvement under the code, tailoring implementation to their unique contexts and learners.

A dispute resolution scheme for domestic tertiary learners

Key recommendations	Next steps
Agree to the proposals for the operating and monitoring of the scheme (proposed rules attached in appendix C)	Targeted consultation on PCO-drafted rules, with interested groups
I propose to retain the framework of the draft rules I consulted on. Note changes to the scheme following public consultation:	Report-back to Cabinet for legislative approval after consultation expected in October 2021
3. I recommend the scheme rules reflect the learner's journey through the scheme.	
4. I have made other detailed changes to:	Governor General makes the rules by Order in Council
a. re-balance the interaction of the scheme and its decisions with the rule of law;	
b. clarify the scheme operator's functions and duties; and	Selection process to appoint a scheme operator, from August 2021
c. ensure the rules' consistency with the Privacy Act 2020.	
Invite me to issue drafting instructions for the rules	Scheme takes effect from 1 January 2022

- 45 I seek approval to issue drafting instructions for PCO to draft the new rules based on the draft rules I consulted on, with some adjustments as set out below. I have attached the proposed rules (**appendix C**), which draw on the existing *International Student Contract Dispute Resolution Scheme Rules 2016*. These proposals reflect the feedback gathered during consultation and have been developed in consultation with other government agencies including the Government Centre for Dispute Resolution (GCDR), to ensure the scheme is in line with best practice standards.
- 46 The scheme complements the code and will be available for domestic tertiary learners to escalate otherwise unresolved financial and contractual issues. The scheme is expected to be in place and operating alongside the new code from 1 January 2022.
- 47 Like the code, submitters commented that the proposed scheme goes either too far or not far enough to enable learners to have disputes resolved through a bespoke, learner-centric scheme. Some submitters questioned the need for the scheme given existing complaints processes. Views also differed regarding the balance between flexibility and rigorous legal procedure involved in resolution processes, and the extent to which the scheme should be learner-centric to address power imbalances between learners and providers, or more balanced with a shared focus on both sides.

I propose to retain the framework of the draft rules I consulted on

- 48 I signalled in April that I intended for the scheme to be accessible and flexible with a tiered process that prioritises consensual forms of dispute resolution (including facilitation and mediation). This means the focus is on helping parties to work together to come to an agreed solution and preserving relationships, making it less intimidating, formal, and costly and more accessible for users than other processes.
- 49 Inclusivity is another key focus of the rules, which are designed to meet the diverse needs of all domestic tertiary learners and help address the power imbalance between learners and providers. This was widely supported during consultation.

I recommend the rules reflect the learner's journey through the scheme

- 50 It is my preference that the structure of the scheme rules reflects the learner's journey through the scheme. This means organising the rules according to how a learner would access the scheme and progress through the different steps to achieve resolution. This would provide greater clarity and make the scheme more navigable for users. I note, however, that it is a matter for PCO to determine the final form and content of the rules, consistent with drafting convention.

I have made several detailed changes to the proposed rules based on sector feedback

- 51 I propose an adjudication process may be undertaken with a practitioner making a binding decision, where a consensual approach does not resolve the dispute or may not be appropriate. The rules will need to be clear that, while adjudicators are not bound to give effect to the rule of law in making decisions, they must have regard to it. This balances the purpose of the scheme in providing accessible and effective dispute resolution (without being punitive) with maintaining fairness for all parties.
- 52 This also addresses provider concerns that the cap on payments awarded to learners is set too high given the less legalistic nature of the resolution process. Section 537 of the Act sets this cap at \$200,000, which I consider is appropriate. Most disputes are unlikely to involve such a significant amount. However, financial and contractual disputes for learners in high fee courses (e.g. aviation, dentistry, medicine) could involve costs of this size. The cap is also in line with similar dispute resolution schemes, including the existing scheme for international learners.
- 53 I also propose that the scheme operator will be expected to develop and evaluate their service under the rules with Māori to ensure it is consistent with Te Tiriti o Waitangi and has proper regard to tikanga. The operator must also generate a range of Māori specific data and insights, that are meaningful and appropriate for use by Māori. This builds on the measures included in the consultation draft to ensure the scheme enables Māori to determine how they want the process to work for them and is consistent with the Crown's obligations to Te Tiriti o Waitangi.⁴
- 54 Some submitters raised issues of privacy and data sovereignty, questioning how the proposals interact with the Privacy Act 2020. I propose the rules are clear that

⁴ This includes enabling users to undertake all parts of the process in te reo Māori and expecting the scheme operator to appoint practitioners that can draw upon appropriate tikanga in resolving the disputes if requested by a claimant.

information must be collected, shared, and publicised in accordance with the Privacy Act 2020. Information gathering and sharing between the scheme operator and education quality assurance agencies is important to resolve disputes and ensure system monitoring and investigation where appropriate. Publishing information as part of case studies and in annual reports ensures system growth and awareness of best practice, and increases transparency, which was supported by learner groups.

- 55 However, this must be balanced against the need to keep personal information secure and confidential to maintain trust in the scheme. I expect that information released publicly is appropriately redacted and safeguarded, and parties must be informed regarding the grounds for withholding information.

Impact and implementation of the scheme

- 56 Some providers were concerned that the scheme may increase costs for them or attract vexatious claimants. While there may be administrative costs associated with a case going to the scheme, I am proposing measures through the new code to strengthen providers' internal complaints processes. This includes expectations for effective processes and the availability of information and support to resolve problems. This also addresses feedback from learners that existing dispute and complaints pathways can be difficult to navigate or do not deliver clear outcomes for individual learners. I expect that most complaints will be resolved locally, at the provider. However, where this is not the case, it is important that learners can escalate their disputes to an external, independent scheme.

- 57 I seek approval to undertake targeted consultation on the rules, once drafted by Parliamentary Counsel Office. I currently expect this to occur in August 2021. This will provide an opportunity for interested groups to check their understanding of the process against the rules before they are approved.

- 58 Under section 536(4) of the Act, the Minister of Education has the power to appoint an operator for the scheme. I intend to run a selection process from August 2021 to appoint a scheme operator. This timing is necessary to allow the operator a brief start-up before the scheme takes effect from 1 January 2022.

- 59 I intend to report back to Cabinet for legislative approval of the rules in October 2021. The Governor General will then make the rules by Order in Council. I currently expect to gazette the scheme rules and notice of the Ministerial appointment of the scheme operator in November 2021.

A package of legislative changes to support the focus on learner wellbeing and safety

Key recommendations	Next steps
<p>Agree to the proposed amendments to the Act to be included in the Education and Training Amendment Bill (No 2) (technical detail included in appendix D)</p> <p>Agree to the range of proposed amendments relating to:</p> <ol style="list-style-type: none"> <i>Code provisions:</i> I propose to strengthen the focus on wellbeing and safety, provide for a responsive code and modernise code provisions. <i>Code administrator provisions:</i> I propose to ensure the administrator has appropriate functions, powers, and duties, and to modernise code administrator provisions. 	<p>PCO to draft legislative amendments for inclusion in the Education and Training Amendment Bill (No 2)</p> <p>9(2)(f)(iv)</p>

<p>3. <i>Dispute resolution scheme provisions</i>: I propose to broaden the scope of the scheme, improve and clarify provisions for the appointment of the scheme operator, set a timeframe for appeals and retain the current cap on any claim.</p> <p>4. <i>Administrative arrangements</i>: I propose several other changes, including clarifying information sharing and privacy provisions for the code administrator and scheme operator.</p> <p>Note the proposed amendments will</p> <ol style="list-style-type: none"> 1. better support learner wellbeing and safety by clarifying the code focus and the functions, powers and duties of the code administrator; 2. strengthen the focus and operation of the dispute resolution scheme; and 3. improve transparency about decision-making. <p>Invite me to issue drafting instructions for the proposed amendments</p>	<p>9(2)(f)(iv)</p>

60 In April, I signalled that I considered legislative changes to be necessary to ensure we can deliver the learner wellbeing and safety outcomes sought, minimise provider compliance and administration costs, and ensure that the provisions are fit-for-purpose [CAB-21-MIN-0095]. I seek approval to include in the Education and Training Bill (No 2) changes relating to:

- 60.1 the provisions for a code of practice;
- 60.2 the provisions for a code administrator;
- 60.3 the provisions for the dispute resolution scheme; and
- 60.4 administrative detail to ensure the provisions for the code and scheme are fit-for-purpose.

61 There was relatively less feedback on the proposed legislative changes, some of which was expressed as comments on other proposals. For example, comments on the code indicate general support for enabling tailored codes for different provider types to be issued. Comments on the dispute resolution scheme indicate some support and some reservations about a wider scope and better navigations for learners between provider complaints processes and the scheme.

62 I have consulted separately on other legislative change proposals for inclusion in the Education and Training Amendment Bill (No 2) [CAB-21-MIN-0131]. 9(2)(f)(iv)

Law changes to support a focused, responsive, and modernised code – appendix D (page 1, paragraphs 2-15 refers)

63 I am proposing amendments to the provisions for a code of practice to:

- 63.1 strengthen the focus on wellbeing and safety;
- 63.2 provide for a responsive code by:
 - 63.2.1 requiring the Minister to consult with Māori before issuing a code;

- 63.2.2 providing for tailored codes or for the Minister to gazette exemptions to the code for particular groupings of providers;
 - 63.2.3 providing for the Minister to regularly set expectations about the code administrator's performance and priorities, and gather information from the code administrator; and
 - 63.3 allow the Minister to make minor and technical changes to the code.
- 64 Due to its emphasis on 'pastoral care', the current legislative framework does not support the increased focus on learner wellbeing and safety. Consultation feedback also raised concerns about 'pastoral care' signalling a paternalistic and reactive approach. Existing provisions for a code of practice also give mixed signals about the focus and purpose of a code by setting out separate purpose statements for codes covering domestic tertiary and international learners respectively. This raises concerns about providers being held to account for two similar but different codes, as many deal with both groups of learners.

Law changes to provide for a code administrator with clear functions, powers, and duties – appendix D (page 4, paragraphs 16-25 refers)

- 65 I am proposing amendments to the provisions for a code administrator to:
- 65.1 ensure the code administrator has appropriate functions, powers and duties to give effect to the code, in a manner that honours Te Tiriti o Waitangi and support Māori-Crown relationships;;
 - 65.2 require annual reporting of the code administrator;
 - 65.3 provide for the code administrator to issue notices to providers to do or refrain from doing something in relation to their obligations under the code; and
 - 65.4 modernise the legislation through moving saved provisions from the Education Act 1989 to the Act.
- 66 The current legislative framework could be strengthened to better empower the code administrator's functions, powers, and duties. The Crown will continue to lead the work on honouring Te Tiriti o Waitangi and supporting Māori-Crown relationships. However, as the code administrator or its delegate uses regulatory powers set by the government, it is important that the Minister of Education can set out expectations for the honouring of Te Tiriti o Waitangi.

Law changes to enable an effective dispute resolution scheme – appendix D (page 7, paragraphs 26-36 refers)

- 67 I am proposing amendments to the provisions for a dispute resolution scheme to:
- 67.1 broaden the scope of the scheme so that it can consider breaches of the code alongside financial and contractual complaints;
 - 67.2 better provide for the appointment, reporting, and operation of a scheme operator;

- 67.3 set a time limit of 20 working days for appeals about scheme adjudications; and
- 67.4 clarify and broaden the type of bodies that can be appointed as scheme operator.
- 68 The current legislative framework could be clearer in enabling the dispute resolution scheme rules and could be strengthened with respect to the appointment, operation and risk intervention arrangements for the scheme operator. The change to broaden the scope will lift provider performance and strengthen the complementary nature of the code and the scheme as part of a wider system to support learner wellbeing and safety. Consultation feedback also raised concern about the timeliness of redress following an appeal, which the proposal set out in paragraph 67.3 above addresses.

Law changes to provide for administrative arrangements that are fit for purpose – appendix D (page 9, paragraphs 37-52 refers)

- 69 I am proposing amendments to the provisions for administrative arrangements to:
- 69.1 allow for the dispute resolution scheme operator, code administrator, and quality assessor to share information about complaints and complaint resolution;
- 69.2 clarify that the code administrator and the scheme operator are subject to the Ombudsman Act 1975 and Official Information Act 1982;
- 69.3 enable the Minister of Education to regularly approve and gazette expectations about enrolment forms, associated processes, and the provision of information to learners; and
- 69.4 enable providers to undertake fit and proper person checks on staff delivering learner accommodation.
- 70 The Act provides the scope and accountability for the code and the scheme and has a role in enabling the code and scheme rules, through ensuring they are properly provided for, so they are fit for purpose. As the code is administered and the scheme operated by organisations appointed by the Minister, the primary legislation must also ensure that appropriate accountability mechanisms exist for these organisations to the government. The amendments I am proposing in this context have the joint purpose of supporting the effective administration of these two instruments and ensuring they are fit for purpose.

Government response to the inquiry into student accommodation

Key recommendations	Next steps
Agree to response (appendix E) Note that I propose we accept the Committee’s seven recommendations but that the final code and scheme differ slightly from those endorsed by the Committee based on sector feedback	Response tabled in the House of Representatives by 6 August 2021

I seek approval to table the Government's response to the Education and Workforce Committee's inquiry into student accommodation

- 71 On 13 May 2021, the Education and Workforce Committee reported back to Parliament on its inquiry into student accommodation. Parliament debated the inquiry findings on 24 June; the Government's response must be tabled by 6 August 2021.
- 72 The 148 submissions to the Committee provided significant insights into the operation of tertiary accommodation and learners' experience of it. The evidence the Committee received also contributed to the development of the proposed code.
- 73 The Committee concluded that four areas of the student accommodation system were most in need of improvement: transparency and accountability in governance; disputes resolution and complaints; wellbeing and safety in student accommodation; and emergency planning and response.
- 74 The Committee also looked at how the proposed code and proposed dispute resolution scheme might make improvements in these areas. It concluded that there is a need for systemic change to improve the standard and consistency of learner wellbeing and safety. The Committee supports the code and considers it will set a system-wide standard and improve all providers' practice.
- 75 The Committee made seven recommendations based on its findings, all of which concerned the proposed code and the dispute resolution scheme. In particular, the Committee recommended:
- 75.1 that the proposed outcomes 1-4, 9, and 11 I consulted on with the sector be incorporated into the new code with providers required to meet the standards those outcomes set out;
 - 75.2 strengthening the connection between providers' internal complaints processes, the NZQA complaints process, and the proposed dispute resolution scheme; and
 - 75.3 combining the dispute resolution scheme for domestic tertiary learners (after it is enacted), with the scheme for international students.
- 76 I propose that we accept the Committee's recommendations and have attached the proposed Government response (**appendix E**). With respect to combining the dispute resolution scheme for domestic tertiary and international learners, consultation feedback indicated support for separate schemes, citing difficulties to navigate the existing complaints system. I propose that the Government give consideration to this recommendation after the new scheme for domestic tertiary learners is in place.
- 77 The draft code and scheme that the Committee endorsed differ slightly from the final versions I am seeking agreement to today. The overall intent and outcomes of the code are largely the same, but details have changed in response to sector feedback during consultation (which finished after the Committee had reported back to Parliament).

78 The proposed final code, dispute resolution scheme and legislative changes will therefore give effect to the Committee’s recommendations, but with additional consideration of their impact on providers and learners.

Timing and sequencing of proposed changes

The new code and dispute resolution scheme will come into force from 1 January 2022 with legislative changes taking effect later next year

79 I will issue the new code and appoint the code administrator following Cabinet decisions. This allows time for the code administrator to work with the sector in the second half of this year to develop guidance and support the sector in understanding the scope of, and becoming familiar with, the code. This is important for providers to feed into their planning and budgeting for the next year.

80 I intend to report back to Cabinet following Parliamentary Counsel Office drafting seeking legislation approval for the scheme rules in October 2021 **9(2)(f)(iv)**

81 In the meantime, I intend to run a selection process to help inform the Ministerial appointment of a scheme operator. This needs to occur in parallel with the finalisation of the rules to ensure the operator can be in place and running the scheme from 1 January 2022.

Key deliverable	Expected timeframes		
	Quarter 3 2021	Quarter 4 2021	Future years
Issue and table the new code	July 2021		
Appoint code administrator			
Table the Government response to the inquiry into student accommodation	By 6 August 2021		
Deliver code workshops; co-develop guidelines; begin partnering with students’ associations	July to September 2021		
Publish code guidelines and 2022 plan for code administration, and monitor capability building needs		October to December 2021	
Report-back to Cabinet for legislative approval of the scheme rules		October 2021	
Gazette the scheme rules and notice of the Ministerial appointment of the scheme operator		November 2021	
9(2)(f)(iv)			
New code and dispute resolution scheme rules due to take effect			1 January 2022
Code capability-building through co-development and delivery of tailored workshops and resources			January-June 2022
Code administrator being formal monitoring through a range of quality assurance activities			From July 2022
Further changes to the code and dispute resolution scheme in line with the revised legislative framework			From 2022/23

Financial Implications

- 82 There are no financial implications for this paper. I provided details on the contingency for funding the administration of the new code and associated dispute resolution scheme in April 2021 [CAB-21-MIN-0095].
- 83 The international code administration is currently funded by the Export Education Levy. The Levy has been suspended for enrolments in 2020 and 2021, and services covered by the COVID-19 Response and Recovery Fund [CAB-20-MIN-0253]. I am currently reviewing the Levy to ensure that it is fit-for-purpose and services, including code administration, are appropriately funded.

Legislative Implications

- 84 The proposals for legislative change will be progressed in the Education and Training Amendment Bill (No 2). 9(2)(f)(iv)
- 85 The Bill will bind the Crown.
- 86 The code and dispute resolution scheme rules are secondary legislation and therefore subject to the scrutiny of the Regulations Review Committee under the Legislation Act 2019.
- 87 The code will be binding on all tertiary and international providers.

Regulatory Impact Statement

- 88 The regulatory impact analysis requirements apply to the proposals in this paper relating to the new code, the scheme rules, and legislative changes. Regulatory Impact Statements have been completed for these proposals and are attached.
- 89 The Ministry of Education's Quality Assurance Panel has reviewed the Regulatory Impact Statements:
- 89.1 "Education (Pastoral Care of Tertiary and International Learners) Code of Practice 2021";
- 89.2 "Domestic tertiary learner dispute resolution scheme"; and
- 89.3 "Legislative changes to support learner wellbeing and safety".
- 90 The panel considers that each Statement **meets** the Quality Assurance criteria. Each reflects evidence of effective consultation with stakeholders and reflects their views on the proposed changes well. Convincing cases are made for a code where wellbeing requirements apply to all learners and are supplemented to meet specific needs and for the design of the dispute resolution scheme and its resolution methods. The Statement on proposed legislative changes makes an effective case that these changes will further enhance learner wellbeing and safety.

Climate Implications of Policy Assessment

- 91 The Climate Implications of Policy Assessment (CIPA) team has been consulted and confirms that the CIPA requirements do not apply to this proposal as the threshold for significance is not met.

Population Implications

- 92 The aim of this work is to support the wellbeing and safety of all learners, including disabled learners, whatever their ethnicity, culture, religion, age or gender identity.

Māori perspective

- 93 Providers and the dispute resolution scheme operator are expected to be able to give effect to Māori learners' Te Tiriti o Waitangi rights, in particular under articles 2 and 3. The proposals aim to address system inequalities to strengthen our system for Māori learners and whānau to support them to achieve their education aspirations. The new code requires providers to work with diverse learners to design strategic goals, plans and practices for learner wellbeing and safety, and safe opportunities for learners to use te reo and tikanga Māori. The scheme operator is expected to develop and evaluate their service under the rules with Māori. This includes being able to have proper regard to tikanga during the resolution process to meet the learner's needs and expectations (including wider family or whānau participation as appropriate). The legislative proposals will further embed and clarify the expectations for the code and scheme to honour Te Tiriti o Waitangi and support Maori-Crown relationships.

Pacific perspectives

- 94 The proposals aim to address system inequalities to also strengthen our system for Pacific learners, families, and communities to support them to achieve their education aspirations. The new code requires providers to work with diverse learners to design strategic goals, plans and practices for learner wellbeing and safety, and to understand and respond to diverse learner voices and wellbeing and safety needs. Although not specifically mentioned, this includes Pacific learners and their families. The scheme operator must appoint culturally competent practitioners, including Pacific practitioners. In assigning a practitioner, the operator must consider a learner's preference and needs regarding, for example, the gender or cultural background of the practitioner, to meet the learner and families' needs and expectations.

Disability perspective

- 95 Providers and the scheme operator are expected to support learners, including disabled learners, by removing access barriers to provider facilities and services and involving learners in the design of physical and digital environments. The new code also requires providers to have policies and processes in place which support learners to manage their physical and mental health, and to access appropriate support where required. This includes making arrangements with disabled learners, including for study off-campus. Providers will also be required to consult with diverse learner groups when developing, reviewing, and improving learner wellbeing and safety practices. The implementation of the new code will be supported by a refreshed Kia Ōrite – Code of Practice for Disabled Students which is available to the sector.

International students

- 96 The new code will require tertiary providers and schools enrolling international students to consider and respond to the particular wellbeing and safety needs of foreign nationals enrolled as onshore international students. International students are a particularly vulnerable cohort, due to distance from family and support networks, linguistic and cultural differences, financial and social pressures, and may be exposed to pressure from home governments. The new code retains current protections relating specifically to international tertiary and school students while setting general wellbeing and safety requirements at the same level as those for domestic learners.

Human Rights

- 97 The proposals discussed in this paper, including the proposed legislative changes, are consistent with the New Zealand Bill of Rights Act 1990 and the Human Rights Act 1993. The proposals are also consistent with the New Zealand Government's obligations under the United Nations Convention on the Rights of Persons with Disabilities and seek to fulfil a fully inclusive education system as outlined in the New Zealand Disability Strategy.
- 98 The new code upholds human rights by requiring providers to create and maintain inclusive learning environments that support the academic, personal, and social development of learners. Providers will also be required to have practices for recognising, reducing and responding effectively to discrimination, racism, bullying, harassment and abuse (including physical and sexual harassment and abuse).
- 99 The scheme upholds human rights by seeking to deal with disputes in a culturally responsive and accessible manner that meets the diverse needs of domestic tertiary learners, particularly those with vulnerabilities. I expect the scheme operator to be consistent with the principles of restorative and natural justice in resolving disputes.⁵

Consultation

- 100 The Ministry of Education drafted this Cabinet paper and the attached materials, in consultation with NZQA.
- 101 The following organisations were consulted on this Cabinet paper:

Education New Zealand	Ministry of Health
Ministry for Pacific Peoples	Ministry of Justice
Ministry of Housing and Urban Development	Tertiary Education Commission
Office of the Privacy Commissioner	Treasury
The Office for Māori Crown Relations – Te Arawhiti	Te Puni Kōkiri
Ministry of Foreign Affairs and Trade	Oranga Tamariki
Office for Disability Issues	
Department of Internal Affairs (Office of Ethnic Communities)	
Ministry of Business, Innovation & Employment (GCDR)	
Department of Prime Minister and Cabinet (Policy Advisory Group; National Security Group; Child Wellbeing Unit)	

⁵ Restorative justice means focusing on how to put things right and take responsibility. Natural justice means enabling everyone to have an opportunity to present their case, be balanced and fair and use logical evidence.

- 102 The following organisations were informed of this Cabinet paper: Office of the Ombudsman; Ministry of Youth Development; Ministry for Women; Human Rights Commission (Disability Rights Commissioner); Ministry of Business, Innovation & Employment (Immigration New Zealand).

Communications

- 103 Following Cabinet approval, I will release the Government response to the inquiry and issue the new code. Both will also be promulgated through tabling. At the same time, I intend to release a high-level overview of the package of decisions on the Ministry of Education's website, alongside a summary of consultation feedback.
- 104 I seek your agreement for me to confirm the final version of the code and the Government response before their release, subject to any minor changes being consistent with the policy decisions in this paper.
- 105 Information relating to the Bill will be posted on the Ministry of Education's website and included in Ministry publications once the Bill has been introduced. The same applies to the scheme rules once approved by Cabinet later this year. I expect to gazette the scheme rules and notice of the Ministerial appointment of the scheme operator in November 2021.

Proactive Release

- 106 I propose that this paper alongside all attachments are proactively released once the Education and Training Amendment Bill (No 2) has been introduced, with any redactions in line with the provisions of the Official Information Act 1982.

Recommendations

The Minister of Education recommends that the Committee:

- 1 **note** that in April 2021 Cabinet agreed for the Minister of Education to consult on a package of provisions for learner wellbeing and safety because ensuring their wellbeing and safety is essential for learners to be able to achieve their aspirations in education and beyond [CAB-21-MIN-0095];
- 2 **note** that the Minister of Education has completed consultation with the sector which fulfils the statutory consultation requirements under sections 534 and 539 of the Education and Training Act 2020 (the Act);
- 3 **note** the attached summary of consultation feedback, which will be released alongside decisions on the proposals in this paper;
- 4 **note** that submitters were generally positive about the overall goals of the learner wellbeing and safety proposals to support achievement and broader community wellbeing, with learners and providers disagreeing on how to strike the best balance of expectations;

A new code of practice for wellbeing and safety to cover domestic tertiary and international learners

- 5 **note** that the sector supported combining expectations for domestic tertiary and international learners in a single code and the flexibility of an outcomes-based code;
- 6 **note** that, under section 534 of the Act, the Minister of Education may issue a code that provides a framework for the pastoral care of domestic tertiary and international students;
- 7 **authorise** the Minister of Education to issue the new code following Cabinet approval;
- 8 **authorise** the Minister of Education to make decisions on any issues of detail that may arise in preparation for the release of the code without further reference to Cabinet, subject to the decisions being consistent with the policy decisions in this paper;
- 9 **note** that this new code replaces the Education (Pastoral Care of Domestic Tertiary Students) Interim Code of Practice 2019, which expires on 1 January 2022, as well as the Education (Pastoral Care of International Students) Code of Practice 2016;
- 10 **invite** the Minister of Education to present the new code to the House of Representatives following Cabinet approval to fulfil the statutory requirement to do so under section 534(7)(c) of the Education and Training Act 2020;
- 11 **note** the Minister of Education's intention to appoint the New Zealand Qualifications Authority as code administrator to work in consultation with the sector to support implementation of the code from 1 January 2022;

A new scheme to address otherwise unresolved financial and contractual disputes between domestic tertiary learners and providers

- 12 **note** that the sector largely supported the proposal to create a new accessible, inclusive and flexible dispute resolution scheme for domestic tertiary learners to provide a similar process currently only available to international learners;
- 13 **note** that under section 539 of the Act the Governor-General may, by Order in Council made on the recommendation of the Minister of Education, make rules for the functioning and administration of the scheme;
- 14 **note** that the Minister of Education has made changes to the rules based on sector feedback, including:
 - 14.1 prioritising consensual forms of dispute resolution over adjudicative processes that result in binding decisions, with clarity that adjudicators must give effect to the rule of law in making decisions;
 - 14.2 expecting the scheme operator to develop and evaluate their service under the rules with Māori to ensure consistency with Te Tiriti o Waitangi;
 - 14.3 ensuring the proposed rules' consistency with the Privacy Act 2020;

- 15 **note** the Minister of Education’s preference for the final structure of the rules to reflect the learner’s journey through the scheme to improve clarity and make the scheme more navigable for users;
- 16 **note** that the proposed rules draw on the existing International Student Contract Dispute Resolution Scheme Rules 2016, have been developed in collaboration with the Government Centre for Dispute Resolution to ensure the scheme is in line with the Aotearoa Best Practice Dispute Resolution Framework, and reflect initial feedback from Parliamentary Counsel Office;
- 17 **authorise** the Minister of Education to issue drafting instructions for Parliamentary Counsel Office to draft the new rules based on the proposed rules as attached and above recommendations;
- 18 **authorise** the Minister of Education to make decisions on any issues of detail that may arise during the drafting process without further reference to Cabinet, subject to the decisions being consistent with the policy decisions in this paper;
- 19 **note** that the final form and content of the new rules is subject to Parliamentary Counsel Office’s drafting to ensure that the rules are fit for purpose;
- 20 **agree** the dispute resolution scheme rules, once drafted by Parliamentary Counsel Office, will be released for targeted consultation with people and groups who provided feedback on the proposals ahead of final approval;
- 21 **note** the Minister of Education’s intention to report back to Cabinet in October 2021 seeking agreement to the final scheme rules;
- 22 **note** the Minister of Education’s intention to appoint a scheme operator later this year, following a selection process, as per section 536 of the Act;

Proposed legislative amendments to the Education and Training Act 2020

- 23 **note** that there was relatively less consultation feedback on the proposed legislative changes, some of which was expressed through comments on the code and scheme;

Amendments relating to the provisions for a code of practice

- 24 **agree** to amend the provisions in the Act relating to a code of practice to:
- 24.1 strengthen the focus on student wellbeing and safety in section 534 and related sections by:
 - 24.1.1 replacing each reference to pastoral care with reference to wellbeing and safety, with any necessary modifications;
 - 24.1.2 clarifying that the code applies to domestic and international students studying in New Zealand or offshore;

- 24.2 provide for a responsive code by:
 - 24.2.1 requiring the Minister of Education to consult with Māori before issuing a code;
 - 24.2.2 enabling the Minister of Education to:
 - 24.2.2.1 issue tailored codes for a particular grouping of providers with either mandatory coverage or the ability to opt in to using a tailored code;
 - 24.2.2.2 appoint a code administrator for one or more codes;
 - 24.2.2.3 regularly set expectations about the code administrator's performance and priorities;
 - 24.2.2.4 gather information from the code administrator;
 - 24.2.3 providing for the Minister of Education to gazette exemptions to all or part of a code for particular groupings of providers and for these exemptions to be added to the code as minor and technical changes;
- 24.3 allow the Minister of Education to make minor and technical changes to the code without meeting the consultation requirement set out in section 534(5) of the Act.

Amendments relating to the provisions for a code administrator

- 25 **agree** to amend the provisions in the Act relating to a code administrator to:
 - 25.1 ensure the code administrator has appropriate functions, powers, and duties to administer the code, monitor performance and manage risk by:
 - 25.1.1 providing for the code administrator to monitor and regularly review how tertiary education providers and signatory providers are giving effect to the code;
 - 25.1.2 allowing the code administrator to authorise any person to do, at any reasonable time, any 1 or more of the following things in relation to the code administrator's functions, powers and duties:
 - 25.1.2.1 enter and inspect any premises (other than a dwelling house) of tertiary education providers (universities, wānanga, Te Pūkenga, private training establishments) and, if they are a signatory provider, schools;
 - 25.1.2.2 require any person to produce documents or information under the control of the person;
 - 25.1.2.3 inspect, photocopy, print, or copy any documents (whether held in electronic or paper form) or that the

IN CONFIDENCE

- authorised person believes on reasonable grounds to belong to the establishment;
- 25.1.2.4 remove any document, whether in its original form or as an electronic or a paper copy;
 - 25.1.2.5 require any employee or member of the establishment to make or provide statements, in any form and manner that the authorised person specifies;
 - 25.1.2.6 inspect any work and any related materials;
 - 25.1.2.7 meet and talk with any person;
- 25.1.3 requiring the authorised person to:
- 25.1.3.1 produce evidence of the person's authorisation to the person in charge of the premises when the person first enters the premises, and at any later time, at the request of the person in charge; and
 - 25.1.3.2 give the person in charge a list of all documents that have been removed (if any); and
 - 25.1.3.3 return any documents that have been removed unless to do so would prejudice any investigation.
- 25.1.4 ensuring the authorised person is a fit and proper person and has received appropriate training before using the powers of entry and inspection;
- 25.1.5 requiring the authorisation to be in writing and contain the legislative authority, the full name of the person authorised, and a statement of the powers conferred on that person;
- 25.1.6 providing for the code administrator to:
- 25.1.6.1 honour Te Tiriti o Waitangi and support Māori-Crown relationships;
 - 25.1.6.2 report annually about its performance of its functions, powers, and duties, as well as the extent to which tertiary education providers and signatory providers are giving effect to the code;
 - 25.1.6.3 issue notices which allow the code administrator to require a provider and/or signatory provider to do, or refrain from doing, a particular thing in relation to their obligations (and, for signatory providers, also their conditions) under a code, replacing quality assurance and compliance notices;

- 25.1.6.4 have notices set out:
 - 25.1.6.4.1 any concerns the administrator has about the provider's systems, practices, training, or procedures, or about the provider not sufficiently meeting a code outcome, or for non-compliance with a requirement of the code;
 - 25.1.6.4.2 the time within which the provider is expected to address the administrator's concerns (which must be a reasonable time, having regard to the nature and complexity of the action required); and
 - 25.1.6.4.3 the possible consequences of a failure to comply with a notice.
- 25.1.6.5 publish those notices, or a summary of it, in a manner designed to give public notice of it and extend the time or period, and in that case the time or period as extended becomes the time or period within or during which the notice must be complied with;

25.2 modernise the legislation by moving the provisions of the Education Act 1989 saved by clause 7(3)Schedule 1, of the Education and Training Act 2020, to the main body of the Education and Training Act 2020;

26 **agree**, based on the proposals set out above, to also:

26.1 remove 'following a process prescribed by a code' from section 238H(3)(b)(i)(A) of the Education Act 1989 which is saved by Schedule 1, clause 7(3) of the Act;

26.2 revoke sections 238I and 238J of the Education Act 1989 which are saved by Schedule 1, clause 7(3) of the Act; and

26.3 remove 'in accordance with the relevant code' from section 633(1) of the Act;

Amendments relating to the provisions for a dispute resolution scheme

27 **note** the Minister of Education's proposals for legislative amendments with the joint purpose of modernising, strengthening, and clarifying the legislative provisions relating to the scheme and scheme operator, and ensuring they are fit for purpose;

28 **agree** to amend the provisions in the Act relating to a dispute resolution scheme to:

28.1 broaden the scope of the disputes resolution scheme to include breaches of the code;

28.2 amend provisions to better provide for the appointment and operation of a scheme operator by requiring the scheme operator to:

IN CONFIDENCE

- 28.2.1 cooperate and supply information;
- 28.2.2 honour Te Tiriti o Waitangi; and
- 28.2.3 report annually;
- 28.3 set a time limit of 20 working days for appeals about scheme adjudications, in line with other schemes;
- 28.4 broaden the bodies able to be appointed as scheme operators to ‘organisations’ rather than ‘agencies’;

Amendments relating to administrative provisions for the code administrator and scheme operator

- 29 **agree** to amend the provisions in the Act relating to administrative provisions to support the effective administration of the code and dispute resolution scheme, and ensure they are fit for purpose, so that the Act:
 - 29.1 allows for the scheme operator, code administrator, and quality assessor to share information about complaints and complaint resolution;
 - 29.2 clarifies that the code administrator and the scheme operator are subject to the Ombudsman Act 1975 and Official Information Act 1982;
 - 29.3 enables the Minister to regularly approve and gazette expectations about enrolment forms, associated processes, and the provision of information to learners; and
 - 29.4 enables fit and proper person checks;

Legislative drafting

- 30 **note** that the legislative change proposals will be given effect through the Education and Training Amendment Bill (No 2), 9(2)(f)(iv) [REDACTED]
- 31 **authorise** the Minister of Education to issue drafting instructions for Parliamentary Counsel Office to give effect to the decisions in the recommendations relating to the legislative change proposals;
- 32 **authorise** the Minister of Education to make decisions on any issues of detail that may arise during the drafting process without further reference to Cabinet, subject to the decisions being consistent with the policy decisions in this paper;
- 33 **note** that the recommendations are subject to Parliamentary Counsel Office’s drafting to ensure the legislation is fit for purpose;
- 34 9(2)(f)(iv) [REDACTED]

Government response to the inquiry into student accommodation

- 35 **note** that on 13 May 2021, the Education and Workforce Committee reported back to Parliament on its inquiry into student accommodation, with the Government's response due to be tabled by 6 August 2021;
- 36 **note** the Committee's conclusion that four areas of the student accommodation system were most in need of improvement, which are transparency and accountability in governance; dispute resolution and complaints; wellbeing and safety in student accommodation; and emergency planning and response;
- 37 **note** that the Committee supported the draft code that the Minister of Education consulted on and made seven recommendations, all of which concerned the code and dispute resolution scheme;
- 38 **note** the Minister of Education's proposal to accept the Committee's recommendations but that:
- 38.1 the final code and scheme differ slightly from those endorsed by the Committee based on sector feedback; and
- 38.2 the Government give consideration to the recommendation for a combined dispute resolution scheme for domestic tertiary and international learners once the new scheme for domestic tertiary learners is in place;
- 39 **invite** the Minister of Education to table the attached response following Cabinet decisions.

Authorised for lodgement

Hon Chris Hipkins

Minister of Education

Appendices

Appendix A: Summary of consultation feedback

Appendix B: The proposed *Education (Pastoral Care of Tertiary and International Learners) Code of Practice 2021*

Appendix C: The proposed *Education (Domestic Student Contract Dispute Resolution Scheme) Rules 2021*

Appendix D: Technical detail on the proposed legislative amendments

Appendix E: The Government response to Education and Workforce Committee inquiry into student accommodation

Appendix F: Regulatory Impact Statement for the code

Appendix G: Regulatory Impact Statement for the dispute resolution scheme rules

Appendix H: Regulatory Impact Statement for the legislative proposals

Proactively Released

Appendix D: Technical detail on the proposed legislative amendments

- 1 I seek approval to include in the Education and Training Bill (No 2) changes relating to:
- 1.1 the provisions for a code of practice;
 - 1.2 the provisions for a code administrator;
 - 1.3 the provisions for the dispute resolution scheme; and
 - 1.4 administrative detail to ensure the provisions for the code and scheme are fit-for-purpose.

Law changes to support a focused, responsive, and modernised code

- 2 I seek agreement to the following legislative changes relating to the provisions for a code of practice:
- 2.1 strengthening the focus on student wellbeing and safety in section 534 and related sections by:
 - 2.1.1 replacing each reference to pastoral care with reference to wellbeing and safety, with any necessary modifications;
 - 2.1.2 clarifying that the code applies to domestic and international students studying in New Zealand or offshore;
 - 2.2 providing for a responsive code by:
 - 2.2.1 requiring the Minister to consult with Māori before issuing a code;
 - 2.2.2 enabling the Minister to:
 - 2.2.2.1 issue tailored codes for a particular grouping of providers with either mandatory coverage or the ability to opt in to using a tailored code;
 - 2.2.2.2 appoint a code administrator for one or more codes;
 - 2.2.2.3 regularly set expectations about the code administrator's performance and priorities;
 - 2.2.2.4 gather information from the code administrator;
 - 2.2.3 providing for the Minister to gazette exemptions to all or part of a code for particular groupings of providers and for these exemptions to be added to the code as minor and technical changes;
 - 2.3 allow the Minister to make minor and technical changes to the code without meeting the consultation requirement set out in section 534(5) of the Act.

Strengthening the focus on learner wellbeing and safety

- 3 By clarifying the focus on learner wellbeing and safety in the code description and purposes (currently sections 534 (1-2) and other code-related sections), providers, learners, and the code administrator will have greater clarity about the focus and purpose of the code.
- 4 As many providers deal with domestic tertiary and international learners, there are concerns about being held to account for two similar but different codes. As the code is aimed at providers, a focus on 'wellbeing and safety' for domestic and international learners would provide consistency of message and practice. It captures the strengths of 'wellbeing' and 'protect' language while considering the needs of diverse learners.
- 5 Consultation feedback supported this change. This change also addresses concerns about the word 'pastoral' signalling a paternalistic approach that does not recognise the ability of learners to make their own choices, and feedback that 'pastoral care' is not proactive. By moving to a system that prioritises learner wellbeing and safety, this language is no longer appropriate.
- 6 I propose that the code scope clarify that the code applies to all domestic tertiary students and international students, whether they are in New Zealand or offshore. This will ensure that New Zealand's reputation as a quality education provider is upheld irrespective the location of the education.

Providing for a responsive code

- 7 To allow the code to respond appropriately to the current context and new and emerging opportunities, further modifications are needed.
- 8 Changes are needed to ensure that Māori (i.e., Māori learners, iwi, hāpu, and whānau) are consulted before a code is issued. While this would increase the number and range of people required to be consulted before the code is issued, it would also better honour Te Tiriti o Waitangi and support Māori-Crown relationships.
- 9 Amendments are also needed so that a code could be developed for a particular grouping of providers. For example, a tailored code could be issued to cover:
 - 9.1 te ao Māori, kaupapa Māori, or Māori providers (where providers could opt to be covered by this code); or
 - 9.2 categories and sub-categories of providers, including schools, different tertiary education provider types, student accommodation providers, and/or different tertiary education settings.
- 10 Providers should be covered by only one code, unless there was a good reason otherwise. If a code was tailored to a particular type of provider, clear information would be needed about the coverage of the relevant codes. In some cases (e.g. for a te ao Māori code) providers could opt to be covered by that code instead of the already approved code. If there is a separate code, careful consideration will be given to expectations to ensure transparency and minimise compliance costs.

- 11 If codes are developed for a particular grouping of providers, it may be appropriate for the Minister to appoint a code administrator for one or more codes. If several codes are in place, it will be possible for each code to have a different administrator.
- 12 The Minister should be able to signal expectations about the code administrator's performance and priorities and gather information from the code administrator. This may include setting expectations and gathering information about the code administrator's focus on providers and its management of sector performance and risk in the short to medium term. The Minister may require the code administrator to prepare a plan about its work. These changes would improve transparency about the code administrator's work and provide the Minister, learners, tertiary education providers, schools, and stakeholders with clarity about the code administrator's focus. It would also enable trust and confidence that the code administrator ensures that providers are working towards the outcomes and processes set out in the law and the code.
- 13 In the consultation material, I had signalled that there might be legislative changes to allow for the publication of a summary of the investigation and outcome of a breach of the code, subject to appropriate safeguards and redactions for protection of privacy. Feedback suggested that this detailed reporting should not be included in the Act. After further consideration, I have decided to consider any publication obligations when I set out my expectations of the code administrator. I want to ensure that there are appropriate safeguards to protect privacy and consider that this approach is a more appropriate vehicle for detailed reporting.
- 14 In some cases, it may be appropriate for the Minister to gazette exemptions to all or part of the code(s). While I have no immediate plans to use this power, the consultation feedback signalled that different arrangements might be needed for international PhD learners (who are treated as domestic tertiary learners), offshore or distance education learners. In addition, there may be a need for different arrangements when the status of a learner changes from domestic school student to international school student. I have considered whether the exemption should trigger the code consultation process but consider that this power will be used rarely and only when there is an immediate issue that needs to be addressed. As such, it is more appropriate for the Minister to gazette exemptions which could then be added to a schedule in the code through a minor and technical change.

Modernising the code

- 15 I propose that the Minister be allowed to make minor and technical changes to the code without consultation. This a mechanism currently only exists for the interim code. This change would improve the quality and relevance of the code allowing it to stay up to date and be accurate (e.g. if there was a minor change to terminology, a typographical error, or the Minister made an exemption to all or part of the code), without triggering the consultation requirements. As the code is a disallowable instrument, the Regulations Review Committee would examine any versions of the code to ensure that they are consistent with good legislative practice.

Law changes to provide for a code administrator with clear functions, powers, and duties

- 16 I seek agreement to the following legislative changes relating to the provisions for a code administrator:
- 16.1 ensuring the code administrator has appropriate functions, powers, and duties to administer the code, monitor performance and manage risk by:
 - 16.1.1 providing for the code administrator to monitor and regularly review how tertiary education providers and signatory providers are giving effect to the code
 - 16.1.2 allowing the code administrator to authorise any person to do, at any reasonable time, any 1 or more of the following things in relation to the code administrator's functions, powers and duties:
 - 16.1.2.1 enter and inspect any premises (other than a dwelling house) of tertiary education providers (universities, wānanga, Te Pūkenga, private training establishments) and, if they are a signatory provider, schools;
 - 16.1.2.2 require any person to produce documents or information under the control of the person;
 - 16.1.2.3 inspect, photocopy, print, or copy any documents (whether held in electronic or paper form) or that the authorised person believes on reasonable grounds to belong to the establishment;
 - 16.1.2.4 remove any document, whether in its original form or as an electronic or a paper copy;
 - 16.1.2.5 require any employee or member of the establishment to make or provide statements, in any form and manner that the authorised person specifies;
 - 16.1.2.6 inspect any work and any related materials;
 - 16.1.2.7 meet and talk with any person.
 - 16.1.3 requiring the authorised person to:
 - 16.1.3.1 produce evidence of the person's authorisation to the person in charge of the premises when the person first enters the premises, and at any later time, at the request of the person in charge; and
 - 16.1.3.2 give the person in charge a list of all documents that have been removed (if any); and
 - 16.1.3.3 return any documents that have been removed unless to do so would prejudice any investigation.

IN CONFIDENCE

- 16.1.4 ensuring the authorised person is a fit and proper person and has received appropriate training before using the powers of entry and inspection;
- 16.1.5 requiring the authorisation to be in writing and contain the legislative authority, the full name of the person authorised, and a statement of the powers conferred on that person.
- 16.1.6 providing for the code administrator to:
 - 16.1.6.1 honour Te Tiriti o Waitangi and support Māori-Crown relationships;
 - 16.1.6.2 report annually about its performance of its functions, powers, and duties, as well as the extent to which tertiary education providers and signatory providers are giving effect to the code;
 - 16.1.6.3 issue notices which allow the code administrator to require a the provider and/or signatory provider to do, or refrain from doing, a particular thing in relation to their obligations (and, for signatory providers, also their conditions) under a code, replacing quality assurance and compliance notices;
 - 16.1.6.4 have notices set out:
 - 16.1.6.4.1 any concerns the administrator has about the provider's systems, practices, training, or procedures, or about the provider not sufficiently meeting a code outcome, or for non-compliance with a requirement of the code;
 - 16.1.6.4.2 the time within which the provider is expected to address the administrator's concerns (which must be a reasonable time, having regard to the nature and complexity of the action required); and
 - 16.1.6.4.3 the possible consequences of a failure to comply with a notice.
- 16.1.7 publish those notices, or a summary of it, in a manner designed to give public notice of it and extend the time or period, and in that case the time or period as extended becomes the time or period within or during which the notice must be complied with;
- 16.2 modernising the legislation moving the provisions of the Education Act 1989, saved by clause 7(3) Schedule 1 of the Education and Training Act 2020, to the main body of the Education and Training Act 2020.

IN CONFIDENCE

- 17 Given these new requirements, I also propose to:
- 17.1 remove ‘following a process prescribed by a code’ from section 238H(3)(b)(i)(A) of the Education Act 1989 which is saved by Schedule 1, clause 7(3) of the Act;
 - 17.2 revoke sections 238I and 238J of the Education Act 1989 which have been saved by Schedule 1, clause 7(3) of the Act; and
 - 17.3 remove ‘in accordance with the relevant code’ from section 633(1) of the Act.

Ensuring the code administrator has and uses appropriate functions, powers, and duties

- 18 I propose to provide more detail in the law about the functions, powers, and duties of the code administrator. NZQA, the current code administrator, uses its quality assurance functions, duties, and powers to take action against providers when a breach of the code is detected. Rather than relying on the quality assurer’s powers, the code administrator will be better able to assess and evaluate provider performance against the code. Without adequate information, it is often not possible to work out whether an investigation is needed. Without sufficient mandate, there is a risk of legal challenge to actions taken by the code administrator.
- 19 I have carefully considered the range of powers, functions, and duties that the code administrator needs. To ensure that providers and signatory providers are giving effect to the code, the code administrator needs the ability to gather information and enter and inspect premises. This is in addition to the code administrator’s powers to enter and inspect student accommodation. Without these additional powers, unless there was an issue with student accommodation, the code administrator would only be able to consider the self-review report supplied by the provider or signatory provider.
- 20 I have considered whether the powers should allow the code administrator to enter and inspect a provider’s marae, church, or mosque when monitoring the code or investigating a complaint. On balance, I consider that this power needs to cover all educational delivery sites. I expect the code administrator to use this power judiciously and, if the code administrator is considering the wellbeing and safety of learners on marae, that appropriate consideration is given to kawa and tikanga.
- 21 Given the significance of these powers, I want to ensure that there are appropriate safeguards to ensure that the code administrator does not go beyond its mandate. I have therefore proposed that certain duties must be met when making use of these powers. These safeguards are consistent with those set out in section 634 of the Act. In addition, I propose adding a requirement for the authorised person to be fit and proper and to have undergone training. The powers, functions, duties, and associated safeguards take into account the academic freedom and institutional autonomy of tertiary education institutions.
- 22 I propose that the legislation set out that the code administrator must report annually to the Minister about its performance of its functions, powers, and duties, as well as the extent to which tertiary education providers and signatory providers are giving effect to the code. While this duty is set out in the interim and international codes, it is

more appropriate for this requirement to be in the legislation. This would improve transparency about the code administrator's work and use of funding.

- 23 As the code administrator uses regulatory powers set by the government, it should be required to support Māori-Crown relationships. The Crown will continue to lead the work on honouring Te Tiriti o Waitangi and supporting Māori-Crown relationships.
- 24 Instead of the current quality improvement notices and compliance notices,¹ I propose that the code administrator be able to issue one type of notice when providers are not adequately meeting the code outcomes or there is a breach of the code. Currently, the law allows compliance notices to be used for breaches of the international code and quality improvement notices to be used for breaches of the interim code. This means that, if there was a code issue that affected both domestic and international tertiary learners, providers may find themselves subject to both quality improvement notices and compliance notices at the same time. The proposed change would allow the code administrator to take swift and proportional action when there is a breach of the code, when one or more outcomes of the code have not been adequately provided for, or when the notice has not been complied with.

Modernising the legislation by moving saved sections from the Education Act 1989 to the Act and regulation

- 25 I propose that the law be modernised and updated so that the relevant code and code administrator law is included in the Act, including the saved section 238H(1) to (4) and (9) of the Education Act 1989. Previously, I had considered whether these provisions would be better located in regulations. Upon reflection and given the other changes that I am proposing, I consider that it is more appropriate for the code administrator functions, powers, and duties to be in the Act.

Law changes to enable an effective dispute resolution scheme

- 26 I seek agreement to the following legislative changes relating to the provisions for a dispute resolution scheme:
- 26.1 broadening the scope of the dispute resolution scheme to include breaches of the code;
 - 26.2 amending provisions to better provide for the appointment and operation of a scheme operator;
 - 26.3 setting a time limit of 20 working days for appeals about scheme adjudications;
 - 26.4 clarifying the wording in section 536(4) so that 'agencies' is replaced with 'organisations' to broaden the bodies able to be appointed as scheme operators.

¹ These provisions are set out in sections 238I and 238J of the Education Act 1989 which are saved by Schedule 1, clause 7(3) of the Education and Training Act 2020.

Broadening the scope of the dispute resolution scheme

- 27 I propose to broaden the scope of the dispute resolution scheme so that, in addition to financial and contractual disputes, complaints about breaches of the code can be considered when the code administrator has found and confirmed that a breach of the code has occurred. This change will lift provider performance. If the breach also relates to contractual or financial matters, learners could seek resolution through the dispute resolution scheme. If the breach does not relate to contractual and financial matters, the type and amount of redress will be determined by the scheme operator according to what is appropriate and proportionate in the situation.
- 28 At present, the education quality assurance agency or the code administrator may find a provider or signatory provider has breached the code and can use a range of remedies to address the problem. However, learners are not entitled to redress if there is a breach of the code unless it is also considered to be a contractual or financial dispute.

Amending provisions to better provide for the appointment and operation of a dispute resolution scheme operator

- 29 I propose that the Act be amended to:
- 29.1 provide for the need for the scheme operator to cooperate and supply information;
 - 29.2 require the scheme operator to honour Te Tiriti o Waitangi, in line with section 4(d) of the Education and Training Act 2020, to ensure that the scheme operator uses regulatory powers set by the government that support the Crown's responsibilities to Te Tiriti o Waitangi;
 - 29.3 require the scheme operator reporting annually.
- 30 These changes are intended to strengthen the appointment and risk intervention arrangements. It also sets out clear expectations about the performance of the scheme operator. The annual report will be sent to the Minister and made available on the scheme operator's website.
- 31 I have considered whether the reporting of case information should be included in the Act but have decided that this detail is better specified in the funding agreement and rules. This will allow for greater transparency about the scheme operator's work, while ensuring that important privacy safeguards are used.

Setting a timeframe for appeals

- 32 I propose that an appeal to the courts of the adjudicator's decision must be made within 20 working days.
- 33 Concerns have been raised about the timeliness of the redress following an adjudication. In line with the Disputes Tribunal and the District Court, it is proposed that there be an appeal timeframe of 20 working days. While the scheme is not a court or tribunal, this would mean learners (who may be less knowledgeable about the process) have a longer period of time to appeal. If the adjudication decision is not

appealed, any remedies and/or redress must be made, or further legal action could be taken.

Clarifying the wording in section 536(4) so that 'agencies' is replaced with 'organisations'

- 34 As the scheme operator does not need to be a government agency, for the avoidance of doubt, I propose replacing the term 'agencies' with 'organisations'. Currently section 536 refers to the appointment of 1 or more persons or agencies to be responsible for administering the scheme. Section 6 narrows the definition of 'agency' to government agencies and this change would make the provision consistent with other provisions in the Act.

Retaining the \$200,000 cap on any claim

- 35 I had consulted on whether the cap on any claim that the dispute resolution scheme can award be increased from \$200,000 to \$350,000² but have decided not to make the change.
- 36 While some submitters support the change, other submitters have suggested that the cap not change or that the cap be aligned with Disputes Tribunal caps. For most claimants, the current cap on a claim of \$200,000 would be sufficient. If someone wanted a higher award, they could take action through the District Court.

Law changes to provide for administrative arrangements that are fit for purpose

- 37 I seek agreement to the following legislative changes relating to administrative provisions:
- 37.1 allowing for the dispute resolution scheme operator, code administrator, and quality assurer to share information about complaints and complaint resolution;
 - 37.2 clarifying that the code administrator and the dispute resolution scheme operator are subject to the Ombudsman Act 1975 and Official Information Act 1982;
 - 37.3 enabling the Minister to regularly approve and gazette expectations about enrolment forms, associated processes, and the provision of information to learners; and
 - 37.4 enabling fit and proper person checks.

Allowing information sharing about complaints and complaint resolution

- 38 I propose that the scheme operator, code administrator and quality assurance regulator can collect and share information about complaints and complaint resolution. The scheme operator, code administrator and quality assurer have responsibilities aimed at student wellbeing and safety. The information could be shared when the complaint is

² The cap of \$200,000 was set to reflect the District Court claim threshold at the time. However, this threshold has since increased to \$350,000 and I consulted on whether the dispute resolution scheme cap should be increased to reflect that change.

received and when the complaint is resolved. To support the privacy of the complainant when the complaint is made, I propose that the transfer of information include provider information but not the name of the complainant unless the sharing of complainant information is necessary and consistent with the Privacy Act 2020.

- 39 Without this change, there will likely be delays to action taken by the code administrator or the quality assurer. If the complainant raises an issue that affects other learners, the delay in sharing of information could have widespread impacts on the reputation and performance of New Zealand's education system.

Providing for the code administrator and the dispute resolution scheme operator to be subject to the Ombudsman Act 1975 and the Official Information Act 1982

- 40 I propose that the Ombudsman have jurisdiction over the code administrator and the scheme operator. Given the Ombudsman's existing responsibilities,³ it is appropriate for the Ombudsman to have the ability to investigate complaints about the code administrator and the scheme operator.

- 41 The Chief Ombudsman considers that any code administrator or dispute resolution scheme operator should be subject to both the Ombudsmen Act 1975 and the Official Information Act 1982 (OIA). It is important that executive government is, and is seen to be, accountable to the public and to Parliament, irrespective of whether an executive government function is ultimately performed by a public or private entity. An important way of achieving this accountability is through the scrutiny of an independent and impartial body such as the Ombudsman.

- 42 The Chief Ombudsman also notes that access to information is a constitutional right reflecting fundamental freedoms which should not be curtailed lightly. The Chief Ombudsman has previously commented that proposals to legislate away the rights of New Zealanders to request information held by a body which is performing a public function should not proceed without a substantive and principled justification, with express consideration of the impact on the public's constitutional right to seek information. It therefore is equally important that the dispute resolution scheme operator is subject to the OIA.

- 43 There are existing mechanisms, including withholding provisions under the OIA, which provide adequate protection of any relevant competing interests where that protection is warranted.

Providing the Minister with the ability to regularly approve and gazette expectations about enrolment forms, associated processes, and the provision of information to learners

- 44 Rather than outlining the details in the Act, I propose that the Minister regularly approve and gazette their expectations about the nature, form, scope, and content of a enrolment forms/contracts, associated processes, and the provision of information to ensure that the learner has an ongoing understanding about their rights and responsibilities.

³ The Ombudsman has responsibilities for dealing with complaints about public sector agencies, including a government agency, tertiary education institution, or school board of trustees. The Ombudsman has other responsibilities, including dispute resolution panels established under subpart 9 of Part 3 of the Education and Training Act 2020.

45 The scheme operator and code administrator will use information from the enrolment form/contract to inform their judgements about the performance of providers and whether there are contractual or financial matters that need to be addressed. Clear enrolment material and processes will help learners to understand their rights and responsibilities and will likely reduce the risk of things going wrong.

46 Enrolment contracts set out the expectations about standards and future conduct. As there is a power imbalance between providers and learners, there is value in specifying a minimum standard for content and the need to ensure that learners understand their rights and responsibilities. The Single Data Return includes information about the generic enrolment form. Through funding determinations, extra enrolment expectations can be set out.

47 Submitters wanted enrolment form expectations to be located near the code.

Enabling fit and proper person checks for all those employed in student accommodation

48 By providing for providers to undertake fit and proper person checks for all those involved in the delivery of student accommodation to adult learners, it is expected that better learner wellbeing and safety will be supported.

49 While the Children's Act 2014 provides for fit and proper person checks for those working with students under 18 years of age, there needs to be legislative mandate for other fit and proper person checks. I consider that, in terms of student accommodation, it is important that all learners, irrespective of age, are safe. This requirement is currently set out in the code; however, I consider that this requirement is better included in primary legislation.

50 The fit and proper person check will consider whether the applicant:

50.1 has been convicted of any offence involving harm to children, violence, or fraud; and

50.2 is, or has been, subject to a property order or personal order under the Protection of Personal and Property Rights Act 1988.

51 The provider may take into account any other criteria that the Minister considers relevant.

52 While the check will be considered by the provider, if appropriate safeguards are in place, this may mean that the person can still be involved in the delivery of student accommodation.

Regulatory Impact Statement:

Education (Pastoral Care of Tertiary and International Learners) Code of Practice 2021

Coversheet

Purpose of Document	
Decision sought:	This analysis and advice have been produced for the purpose of informing key policy decisions to be taken by Cabinet about a new code of practice for pastoral care which sets out shared requirements for domestic and international tertiary learners, and retains specific protections for international students, replacing the existing interim ¹ and international codes.
Advising agencies:	The Ministry of Education is solely responsible for the analysis and advice set out in this Regulatory Impact Statement, except as otherwise explicitly indicated.
Proposing Ministers:	Minister of Education
Date finalised:	29 June 2021
Problem Definition	
<p>Improved learner wellbeing and safety contributes to better educational achievement. Learner wellbeing and safety is a responsibility shared by learners, the government, education providers, whānau, the community, and others. While the responsibility is shared, the market, without intervention, does not place sufficient emphasis on learner wellbeing and safety. As the market does not, by itself, focus sufficiently on learner wellbeing and safety, regulation is necessary. A code provides an opportunity for the Minister to set out outcomes and key processes, while also allowing providers the flexibility to choose a response that suits them, their learners, and their communities and stakeholders.</p> <p>Providers, working with their learners, are best placed to make the day to day decisions about how to support learner wellbeing and safety. Providers want to support the wellbeing and safety of their learners and are keen to maintain their reputation as good places to study. However, approaches are uneven with some providers relying on their expert judgment about what will make a difference and others using robust mechanisms to check that their policies and practices make a difference for their diverse learners. Some providers may place more emphasis on meeting employer needs or delivering on research and scholarship expectations than taking account of their current learners' needs and interests.</p> <p>Given the different education settings and the need for continuous improvement, an adaptive and flexible approach is needed. Consideration needs to be given to the nature</p>	

¹ Education (Pastoral Care of Domestic Tertiary Students) Interim Code of Practice 2019

of the provision, educational settings, type of learner, and the age and stage of learner. Any arrangements need to take account of academic freedom and institutional autonomy.

There needs to be clear expectations about learner wellbeing and safety. An outcomes-focused and results-oriented approach has been used. The code provides transparency about the expected outcomes but allows for providers and learners to work out the detail of how best to support learner wellbeing and safety with the shared aim of improving educational achievement.

Learners need to be able to influence provider practices. Diverse learners have different needs. Learners do not always feel that they are being heard by their tertiary education provider. While domestic and international learners have overlapping interests, any arrangements need to consider that international learners are often away from their family and friends.

Executive Summary

A package to support learner wellbeing and safety

This statement sets out the regulatory impact of a new code of practice for pastoral care which sets out shared requirements for domestic and international tertiary learners, and retains specific protections for international students, replacing the existing interim² and international codes.

It is part of a package of provisions aimed at better supporting learner wellbeing and safety. The package comprises:

- a new code of practice for the pastoral care of domestic tertiary and international learners, which must take effect by 1 January 2022;
- a new dispute resolution scheme to resolve financial and contractual disputes between domestic tertiary learners and providers, also to start by 1 January; and
- legislative proposals to support and reinforce the focus on student wellbeing and safety, to be progressed in the Education and Training Amendment Bill (No 2).

The overall purpose of this work is to develop a system of supports for the wellbeing and safety of domestic tertiary and international learners, through one set of clear rules and expectations that providers can tailor to their learners' needs.

I expect the proposed code and scheme rules to be in place for the next two to three years. This will allow for law changes to be confirmed and for learners and providers to have worked with these instruments and to refine them to ensure they remain fit for purpose and continue to evolve.

² Education (Pastoral Care of Domestic Tertiary Students) Interim Code of Practice 2019

A new code is needed

From 1 January 2022, a new code will take effect. The code aims to support and improve the wellbeing and safety of:

- all domestic and international tertiary learners, including those residing in student accommodation; and
- international school students.

It will replace:

- the Education (Pastoral Care of Domestic Tertiary Students) Interim Code of Practice 2019 (the interim code), put in place urgently at the end of 2019; and
- the existing Education (Pastoral Care of International Students) Code of Practice (the international code).

This regulatory impact statement sets out:

- the rationale for the code (the problem definition and opportunity);
- possible options:
 - Option A: the interim code and international code are retained;
 - Option B: a single code covering both domestic tertiary and international learners;
 - Option C: a single code covering both domestic tertiary and international learners with prescriptive requirements that providers must meet
- associated benefits, costs, and impacts;
- how the new arrangements will be implemented and monitored.

On balance, option B will affect the most positive change at the lowest cost. This option builds on existing understandings about the regulatory system, including the needs of learners, providers, and other stakeholders. It takes into account feedback from consultation and considers the pressure for more prescriptive requirements with the need for flexibility so that providers can consider the needs of their diverse learners.

Limitations and Constraints on Analysis

The following activities have supported the development of this Regulatory Impact Statement: public engagement in 2019 on the Education (Pastoral Care) Amendment Bill, subsequent implementation of the interim code, and during and after the six-week consultation period. Our understanding of how the proposals should be implemented, their likely impacts, and alternative options has been informed by public consultation. We are confident in the evidence of the current state of learner wellbeing and safety that is set out in this Regulatory Impact Statement.

The formal consultation period allowed for quality public participation. Many agencies have contributed to the development of the next code, providing additional quality assurance. This helps to address any risks due to incomplete evidence.

We have a medium to high level of confidence in the evidence presented in this assessment. The costs outlined in Section 2 are subject to some uncertainty, and there is little information about the monetised value of potential benefits and costs.

Uncertainties regarding costs include:

- Providers have different approaches to learner wellbeing and safety: some have well established approaches that require only incremental changes to give effect to the next code; others need to build new systems and processes.
- Learners are diverse and have different expectations that may fit well with, or challenge, providers who are giving effect to the code. Some want tertiary learners to be treated as adults and have responsibility for their own decisions; others want more detail about how learners will be supported.
- Whānau and communities want to have a greater role but the extent to which they will be involved is uncertain (it will be affected by learner and provider decisions).

Quality Assurance

Reviewing Agency: Ministry of Education

Panel Assessment & Comment: The Ministry of Education's Quality Assurance Panel has reviewed the Regulatory Impact Statement: *"Education (Pastoral Care of Tertiary and International Learners) Code of Practice 2021"* dated 29 June 2021.

The panel considers that this Statement **meets** the Quality Assurance criteria. It contains evidence of extensive and effective consultation with stakeholders and reflects their views on the proposed new Code well. A convincing case is made for this Code with wellbeing requirements applying to all learners while allowing for supplementary provisions to meet the specific needs of particular groups of students, including international students.

Section 1: Diagnosing the policy problem

What is the context behind the policy problem and how is the status quo expected to develop?

Background – The new code builds on the interim code and international code

1. The new code of practice is part of a wider package of proposals that build on the interim code and the International code. Aside from the code, the package includes the following proposals, which have separate Regulatory Impact Statements:
 - a. Rules for the legislated dispute resolution scheme to resolve financial and contractual disputes between domestic tertiary learners and providers (also to start by 1 January 2022 alongside the new code); and
 - b. Legislative changes to support and reinforce the focus on wellbeing and safety, and to ensure the settings for the code, code administrator and dispute resolution scheme are fit for purpose for the future.
2. The revised code builds on:
 - a. the interim code that resulted from urgent law changes in 2019 to improve the welfare of domestic tertiary learners in student accommodation and reinforce learner wellbeing more generally.
 - b. the international student code which has been in place since 2002.³

Status quo – There are two codes of practice for pastoral care, one for international learners and one for domestic tertiary learners

3. Providers that wish to enrol international learners opt to become signatory providers and follow the international learner code, which was first introduced in 2002. The current *Education (Pastoral Care of International Students) Code of Practice* (the international code) was published in 2016. It sets out detailed pastoral care requirements for signatories to the code.⁴
4. The *Education (Pastoral Care of Domestic Tertiary Students) Interim Code of Practice 2019* (the interim code) was put in place urgently at the end of 2019. It sets requirements for all tertiary providers in relation to a general duty of pastoral care for domestic tertiary learners. It also sets specific additional requirements for providers that own and operate or formally arrange for the supply of learner accommodation that is exempt from the Residential Tenancies Act 1986 (RTA). This was the focus of the interim code.
5. Prior to this, providers had limited guidance on how they should support their domestic learners (via a voluntary code of practice for student accommodation only). Consequently, provider wellbeing practices had not been consistent across the sector.

³ Currently the Education (Pastoral Care of International Students) Code of Practice 2016.

⁴ To enrol, and provide educational instruction for, a person as an international student, providers must be signatories to a code that sets out a framework for the pastoral care of international students. Providers can apply to NZQA for approval to become a signatory.

6. The interim code was an urgent response to tragic events, and as such, was expected to be in place for one year until 1 January 2021. This was to allow time to develop, consult on, and issue a new code to replace the interim code. Due to the impacts of COVID-19, it was no longer practicable to have the new code fully developed and implemented by 1 January 2021. This is primarily because the code needs to be developed in a manner that enables full engagement with regulated groups and intended beneficiaries of the regulation. To take account of this, the Education and Training Act 2020 (the Act) extended the duration of the interim code to 1 January 2022.
7. This means there is a statutory requirement to have a new code for the pastoral care of domestic tertiary learners in place by 1 January 2022. Government intended that a revised code would expand on expectations for the safety and wellbeing of learners beyond learner accommodation, recognising that most learners are not in learner accommodation. Before issuing a new code, the Act also requires the Minister of Education to consult those parties that he considers likely to be affected by the code, including representatives of learners, parents, whānau, providers and signatory providers, and their staff, as well as the Privacy Commissioner. Consultation took place in April-May 2021.

What if we retained the status quo?

8. Issuing a new code is mandatory and the Minister has already signalled his intentions to issue a new code that improves and expands the existing interim code. We have considered whether the interim code should be reissued and whether the international code should be retained.
9. Retaining the status quo means that the international code would continue, and the interim code would be re-issued unchanged to fulfil statutory requirements. We have heard positive feedback about existing provisions. For example, learner services staff in providers have appreciated the clearer expectations for learner support services set out in the interim code. Having the interim code in place before COVID-19 also gave direction for providers on their obligations and responsibilities to their domestic learners and allowed a basis for domestic tertiary learners to approach conversations with their providers if they have a concern or complaint.
10. We have also heard, through feedback and provider self-reviews, that the existing provisions fall short in several areas:
 - a. Learners and providers have said that they would prefer to have a combined code because the two current codes impose different expectations that are not consistent and, as a consequence, have higher compliance costs.
 - b. Learners and providers have consistently said that the existing legislative framework is limited. The term 'pastoral care' is outdated, archaic and carries associations with religious and Pākehā cultural institutions that are not appropriate for today's tertiary education learners. This has implications for the new code and the Act's framework.
 - c. Providers have asked for more clarity in several areas, including the overall expectations regarding providers' obligations for learner wellbeing and safety, learner voice and what it means for them to partner with learners, and how they can practically

honour and implement Te Tiriti o Waitangi. There is also uncertainty around learner accommodation for providers and learners.⁵

- d. In terms of the international code, there generally is a good standard of compliance. However, feedback from learners and other stakeholders also indicates that there are gaps in requirements, areas of ambiguity and issues with implementation, transparency, and accountability. It is also important that requirements for them are not set at a lower level than those for domestic learners.
 - e. In this context, the sector has noted specifically that having separate codes for domestic tertiary and international learners is confusing and makes it difficult to navigate their obligations for learner wellbeing and safety.
11. The 148 submissions to the previous Education and Workforce Committee's Inquiry into learner accommodation provided significant new information on learner and provider experience of tertiary accommodation, and views on what they expect to see in the new code. For example, submitters commented on the lack of clarity around what types of wellbeing and safety practices should be available in learner accommodation.
 12. The committee found that the system needs to be strengthened and highlighted the role that the proposed code and dispute resolution scheme could have in improving key areas. These include transparency and accountability in governance, dispute resolution and complaints, wellbeing and safety in student accommodation, and emergency planning and response.

What is the policy problem or opportunity?

Improved learner wellbeing and safety contributes to better educational achievement.

13. The approach is underpinned by New Zealand and international research and evidence about wellbeing. It takes into account the Organisation for Economic Co-operation and Development's (OECD's) wellbeing approach. The approach has been shaped by Kōrero Mātauranga, which heard from:
 - a. learners, their whānau, and their communities
 - b. education providers
 - c. employers and industries
 - d. other interested parties.
14. Building on work to support international learner wellbeing and safety, the approach uses the latest thinking about the role of Government in signalling expectations, regulating the market, and setting out consequences if there is poor performance. It considers the type of intervention needed to ensure the wellbeing and safety of children, youth, and older learners.

⁵ For example, some providers who thought they had student accommodation realised they do not, and vice versa. Learners can be unsure of the type of accommodation they are in. There are some accommodation providers who market themselves as 'student accommodation' due to location and preferred clientele, but whose accommodation is not covered by the code as it does not come within the definition of student accommodation as defined in the Act.

The ability to influence learner wellbeing and safety is shared by everyone, including learners, their whānau, communities, tertiary education providers, the government, and others.

15. Significant improvements to learner wellbeing and safety can be made if there is an integrated, connected, and cohesive system. The diversity of New Zealanders means that what any individual, family, whānau or community values and places relative importance on will vary. No single framework will capture all that matters for everyone. The role of whānau and community may change depending on the age of the learner, their connectedness to whānau and their communities, and their cultural identity.
16. General consumer protection laws have not had sufficient traction to drive a change in behaviours. If a learner seeks recourse from the courts, the process is expensive and time consuming.
17. Quality assurers have focused on educational quality and have had limited oversight of learner wellbeing and safety.
18. The code provides assurance to whānau about what providers offer, how providers review and improve their practices, and how learner voice is responded to.

Learners need to be able to influence provider practices

19. Learners do not always feel that they are being heard by their tertiary education provider. In the main, providers do a good job and have worked hard to give effect to the interim code and international code. There is pressure to have more culturally relevant and responsive practices and for better accessibility. Learner voice needs to reflect diverse learners. There needs to be more transparency about how learner complaints are handled – and there needs to be the ability to escalate learner complaints to better provide for dispute resolution.

Providers, working with their learners, are best placed to make the day to day decisions about how to support learner wellbeing and safety

20. Providers generally want to support the wellbeing and safety of their learners and are keen to maintain their reputation as good places to study. Given the different education settings and the need for continuous improvement, an adaptive and flexible approach is needed. Consideration needs to be given to the nature of the provision, educational settings, type of learner, and the age and stage of learner. Any arrangements need to take account of academic freedom and institutional autonomy. With input from learners (learner voice), self-review enables the provider to make choices about the actions needed to support the wellbeing and safety of their current learners.

There needs to be clear expectations about learner wellbeing and safety

21. An outcomes-focused and results-oriented approach has been used. The code provides transparency about the expected outcomes but allows for providers and learners to work out the detail of how best to support learner wellbeing and safety with the shared aim of improving educational achievement. A national framework that provides for local decision-making will best allow learners to get better access to the right information and support that takes account of their particular needs. An outcomes approach recognises the diversity of

beliefs, assumptions, values and ideas that shape New Zealanders' views of the world and what they believe matters for wellbeing.

22. There is an inherent tension, between the immediate assurance of standards (compliance/certainty) and the overall wellbeing for better education (a longer mission through self-improvement/flexibility).

There are opportunities to enhance existing provisions based on recent developments

23. Notwithstanding the statutory requirement to issue a new code, there are opportunities to enhance existing provisions in the longer term based on strategic shifts, as well as what we have heard and learned, since the interim code was introduced. This includes:

- a. ensuring the new code supports Government's strategic direction for education, including for a more learner-centred system and high-value international education;
- b. integrating expectations for government's obligations under Te Tiriti o Waitangi: We need to address system inequalities and continue to strengthen our system for Māori learners and whānau to support them to achieve their education aspirations. A key part of ensuring the system honours Te Tiriti o Waitangi will be building the cultural capability of those working within it to work with Māori;
- c. reducing complexity and ensuring the regulatory system is fit for purpose, clear, and accessible for stakeholders and regulatory bodies including the code administrator;
- d. enhancing provisions for supporting the wellbeing and safety of tertiary domestic and international learners: The learnings from the interim code and recovery of the international education sector provide an opportunity to ensure that regulatory settings continue to evolve to support the wellbeing and safety of learners; and
- e. further responding to ongoing concerns around mental health, psychological distress among learners, as well as racism, bias, and discrimination.

A new code provides a coherent framework to support learner wellbeing

24. The new code builds on the interim code and international code. Since 2020, providers have self-reviewed their performance and made improvements to their policies and practices.

25. Our experience has been that the previous 2004 voluntary code of practice has not been successful in providing the Government, learners and their families with confidence that quality wellbeing practices have been in place. The sector has also welcome the increased clarity provided through the interim code around expectations on them for supporting learners.

26. Prior to 2020, the Government had little information about the gaps in wellbeing practices are across the sector, what the most effective practices are, and the contexts within which they will or will not work. At that time, feedback from learners and their families suggested that the quality of provider wellbeing practices was unclear to them also. Furthermore, the

unnoticed death of Mason Pendrous in a Christchurch hall of residence in 2019 shook public confidence in providers' wellbeing practices.

27. An ongoing code would work alongside other statutory requirements and relevant guidelines for the health, safety, and wellbeing of tertiary learners (i.e. not duplicate them). These requirements cover a wide range of activities which will influence provider practices at different levels (e.g. organisational, environmental and at the individual level).

What objectives are sought in relation to the policy problem?

28. The overall purpose of the wider work programme, of which the code is one part, is to develop a system of supports for the wellbeing and safety of domestic and international learners. We are building on the interim code and international code and the work that providers have done to better support learner wellbeing and safety.

29. To achieve this purpose, the work programme has several key objectives, including to:

- a. strengthen and improve regulation relating to the wellbeing and safety of domestic tertiary and international learners and ensure it is fit for purpose so all learners are supported to achieve in their education;
- b. ensure the regulatory system is consistent and clear for all stakeholders, including education providers, accommodation providers, domestic learners, international learners, and communities; and
- c. honour Te Tiriti o Waitangi and support Māori-Crown relationships.

30. Although a code's purpose is to regulate provider behaviours, it could also encourage positive behaviours from different stakeholders, such as learners and communities, through information provision, relationship development, and consultation requirements.

31. The code will therefore contribute to the overall purpose and high-level outcomes of the work programme by raising the prominence of wellbeing and safety as a precondition to success in education. It will do this by fostering conditions for success and support of more equitable outcomes for diverse learners, including Māori, Pacific, disabled, LGBTQIA+, ethnic or migrant, and former refugee learners.

32. In this context, there are several code-specific objectives in relation to the opportunities and in addition to the overall objectives set out above, including to:

- a. enable providers to respond effectively to the diverse needs of learners across a variety of contexts; and
- b. ensure wellbeing is a whole-of-provider endeavour with practices that are transparent and continuously improving.

33. Although although there are multiple objectives, they are not mutually exclusive. In fact, the option that is likely to best respond to the opportunities identified above and deliver the highest benefits across all stakeholders groups is one that will meet all of the objectives above. This is reflected in the criteria for options analysis in section 2.

Section 2: Deciding upon an option to address the policy problem

What criteria will be used to compare options to the status quo?

34. For this analysis, we are looking at the current legislative framework. There are separate but related discussions about changing this framework to better enable a stronger focus on learner wellbeing and safety. This is discussed in a separate RIS, entitled 'Legislative changes to support learner wellbeing and safety'.
35. The options set out below will be assessed against the following criteria:
- Enhancing learner wellbeing and safety:* Does the option provide certainty that the wellbeing and safety of learners will be supported and enhanced?
 - Developing good relationships:* Does the option enable all stakeholders to be involved in supporting the ongoing wellbeing and safety of learners?
 - Transparency, accountability, and continuous improvement:* Does the option ensure wellbeing is a whole-of-provider endeavour with practices that are transparent and continuously improving?
 - Flexibility:* Does the option enable providers and signatories to respond effectively to the diverse needs of learners across a variety of contexts?
 - Reduced complexity:* Does the option reduce complexity and duplication for providers and improve clarity for learners?
 - Te Tiriti o Waitangi:* Does the option honour Te Tiriti o Waitangi and support Māori-Crown relationships?
36. While all criteria are important to determining the best option, we consider that criteria (a) and (b) in particular are the most important to ensure that the code fulfils its purpose of supporting and enhancing the wellbeing and safety of all learners.

What scope will options be considered within?

There are several limitations on the scope of feasible options

37. The code is one mechanism that can be used to strengthen the focus on learner wellbeing and safety. It works alongside existing legislation, including offence and penalty provisions, and the dispute resolution scheme.
38. The Minister is legally obliged to issue a new code for the pastoral care of domestic tertiary learners to replace the interim code by 1 January 2022. The Act enables the Minister to issue separate codes, providing a framework for the pastoral care of domestic tertiary and international learners respectively, or a combined code for both learner groups. The Act also sets out the purpose and scope of the code. This limits options to address the opportunities identified in section 1.
39. The Minister has already signalled his intentions to issue a new code that improves and expands the existing interim code and covers both domestic tertiary and international learners to ensure consistent expectations that meet the needs of diverse learners.
40. Tertiary education includes a wide range of providers, learners, and a variety of contexts. This also constrains the range of options available. It is not feasible to develop a code that

gives detailed and prescriptive guidance on compliance, as it would risk focusing only on selective types of providers or stifling flexibility to allow providers to work with their learners and wider communities to design practices that best meet their learners' needs. Instead, the code needs to be relatively general to be applicable and meaningful to the range of education providers. This means an outcomes focused code that sets out expectations about key processes (such as the interim code) would be an appropriate structure for a wellbeing and safety code.

41. The following table provides an overview of the range of feedback. Further detailed feedback is included in Appendix 1 and is taken into account in the code. The feedback will also inform the development of associated guidance.

Table 1: Key messages

<p>The safety and wellbeing of students is paramount, and the intent of the code is welcomed</p> <p>The increased focus on wellbeing was almost unanimously welcomed. Questions were raised about implementation with learners wanting the scope of obligations expanded and strengthened and providers wanting clarity about what extends beyond their sphere of influence.</p>
<p>Learner voices are central</p> <p>The importance of learner voices was seen as paramount. Differences in opinion between sectors existed in how this was best implemented. Learners expressed a desire to further embed learner voices in the development and implementation of the code. They felt that there needed to be explicit requirements of co-design and engagement throughout the code. Providers took a more conservative approach and were concerned about the logistics of implementation.</p>
<p>Te Tiriti o Waitangi is integral to the code and should be embedded in legislation</p> <p>Te Tiriti o Waitangi was considered fundamental and there was a desire for Kaupapa Māori to be embedded throughout the code. Guidance on how to do this in a practical sense was requested.</p>
<p>The code needs to explicitly include the multitude of diverse wellbeing needs of learners</p> <p>Whilst the code seeks to embody inclusiveness, learners felt that it was important to be more explicit and include reference to more specific groups and their diverse wellbeing needs. Learners advocated for strengthening the code to require providers to improve accessibility and provide culturally and spiritually safe spaces. Learners also supported the inclusion of ecological sustainability as a design requirement.</p> <p>Providers acknowledged the importance of inclusive learning environments but were concerned about the extent of their responsibilities in practice and argued the code's requirements would not be practical, or enforceable, except in the most general way.</p>
<p>A careful balance needs to be achieved in practice between flexibility and prescription</p> <p>Learners welcomed the prescription in many regards and thought that this was required to hold providers accountable for implementation. A principles-based approach with flexibility to respond to individual needs and circumstances was considered by providers to be the best approach to achieve better outcomes for learners. They felt that processes outlined in some parts of the code were too detailed and seemed overly prescriptive. While acknowledging this, learners welcomed</p>

A careful balance needs to be achieved in practice between flexibility and prescription

the increased focus on processes and even asked for more prescriptive requirements in areas to increase accountability.

The privacy implications of the code will need careful consideration as it is implemented

The code, by its nature, has the potential to interfere with the autonomy and personal sphere of learners. How this will be managed in practice and balanced against privacy considerations needs to be carefully assessed when implementing the code.

We considered relevant experience from other countries in setting the scope for options identification and development

42. In developing the options set out below, we considered relevant experience from other countries, including the United Kingdom, Canada, and Australia, as well as information and evidence available within New Zealand. We have included key points here, which are also reiterated in the option descriptions below.
43. Over recent years, there has been a move by providers internationally to embrace more holistic approaches to the wellbeing of tertiary learners. An example of this is the adoption of the Health Promoting Universities approach by some universities in Europe, Asia and Latin America under the World Health Organisation.⁶ This approach aims to incorporate health into university culture, processes, and policies and has become increasingly relevant in the context of COVID-19.⁷
44. Health promotion builds on the Ottawa Charter for Health Promotion,⁸ which emphasises the interconnectedness between individuals and their environments, and recognises that health is created and lived by people within the settings of their everyday life, where they learn, work, play, and love. Health is viewed holistically, reflecting physical, mental, and social well-being and not merely the absence of disease or infirmity.
45. There has been concern that international frameworks, such as the one described above, do not include cultural or indigenous perspectives.⁹ New Zealand's Child and Youth Wellbeing Strategy (NZCYWS) outcomes framework (which is the basis of the interim code) draws from cultural models of wellbeing such as *Te Whare Tapa Whā* and the *Whānau Ora* outcomes framework.
46. The NZCYWS framework has in turn been criticised for missing some of the needs of adults noting that younger people have more of a focus on learning while for older people, it is passing down knowledge and contributing to their communities.¹⁰

⁶ [WHO | Types of Healthy Settings](#)

⁷ [News - Healthy Universities](#)

⁸ [Ottawa charter for health promotion \(who.int\)](#)

⁹ Berghan, G., Came, H., Coupe, N., Doole, C., Fay, J., McCreanor, T., & Simpson, T. (2017). *Te Tiriti o Waitangi-based practice in health promotion*. Auckland, Aotearoa New Zealand: STIR: Stop Institutional Racism. Accessed from: <https://trc.org.nz/treaty-waitangi-based-practice-health-promotion>

¹⁰ For example, research indicates that volunteering, for example, can have a positive effect on wellbeing particularly for those aged over 40. (Tabassum F, Mohan J, Smith P. Association of volunteering with mental well-being: a lifecourse analysis of a national population-based longitudinal study in the UK. *BMJ Open* 2016;6).

What options are being considered?

47. The following options¹¹ have been considered:

- Option A: the interim code and international code are retained;
- Option B: a single code covering both domestic tertiary and international learners;
- Option C: a single code covering both domestic tertiary and international learners with prescriptive requirements that providers must meet.

48. We also considered whether lighter touch arrangements would be appropriate. Given the 2019 event that led to the current settings and the feedback we have had from learners and providers, this option has not been progressed. There is strong support for a code that covers both domestic tertiary and international students. Learners are keen for providers to more effectively address learner wellbeing and safety.

49. We considered whether there should be separate codes for domestic tertiary and international learners. Tertiary education providers are concerned about the workload associated with being covered by two separate but overlapping codes. They are concerned that the focus would be on compliance with each code, which would distract from a focus on learner wellbeing and safety. Separate codes would increase provider and code administrator compliance costs. Domestic tertiary and international students in the same classroom may be treated differently because of each code's requirements.

Option A: the interim code and international code are retained

50. This option would mean that:

- a. the interim code remained in place (but would be renamed and reissued by the Minister);
- b. the international code would remain in place.

51. Providers and signatories have been working since January 2020 to ensure that they have practices in place that comply with the interim code. Signatory providers have been complying with the international code.

52. While this option would be easy to implement, it would not address the issues raised by domestic tertiary and international learners about provider performance and accountability.

53. Prior to, and during consultation, the sector (and providers in particular) have noted that having separate codes for domestic tertiary and international learners is confusing and makes it difficult to navigate their obligations for learner wellbeing and safety.

54. This approach is supported by some international education providers.

Option B: a single code covering both domestic tertiary and international learners that would be outcomes focused and include key processes

55. This option would replace the interim code and international code with a single code covering both domestic tertiary and international learners. This option gives providers the flexibility to determine how to give effect to the outcomes and key processes set out in the code.

¹¹ All options consider international tertiary and school learners as the legislation does not currently provide for separate codes.

56. This option allows providers to build on the work they are doing to comply with existing provisions by retaining strengths of the existing codes, refining requirements, and adding some new practices. This will likely increase the benefit to society, including providers/signatories as well as learners, compared with the status quo.
57. This option takes into account insights from learners and submissions to the inquiry into learner accommodation which suggest the interim code needs to be improved to increase the quality of wellbeing and safety practices, as well as setting out expectations for provider accountability to stakeholders about wellbeing and safety practices.
58. Other improvements that had been suggested prior to consultation focus on:
- a. responsive learner services and teaching and learning approaches to meet the diverse needs of the learner population (including for mature learners and those from different cultures);
 - b. training and psychosocial support for staff (including accommodation staff, security, and cleaning staff) and peer support training;
 - c. better protections for learners for making complaints and resolving disputes; and
 - d. better consistency within and across providers for dealing with an emergency (e.g. COVID-19 lockdown).
59. The international code has a good standard of compliance. However, feedback from learners and other stakeholders also indicates that there are gaps in requirements, areas of ambiguity and issues with implementation, transparency, and accountability. It is also important that requirements for them are not set at a lower level than those for domestic learners.
60. This option aligns expectations for domestic and international learner groups, where their needs are shared, while continuing to spell out the expectations that apply now for signatories regarding the specific needs of international learners. Within this structure there will be core learner wellbeing practices and additional or specific practices to reflect the distinct needs of international learners and those in learner accommodation. This would increase the benefit to society, including providers/signatories as well as learners, compared with the status quo.
61. International learners have distinct and diverse needs. But it is also important that requirements for them are not set at a lower level than those for domestic tertiary learners. This includes areas of general wellbeing, tertiary learner accommodation and appropriate levels for learner voice, feedback, and input.
62. This approach reduces complexity for providers/signatories in terms of requirements for learner wellbeing and safety and improves improve clarity for learners as well as providers/signatories.
63. While most submitters supported a combined code, some international education providers wanted to retain the current international code. Those international education providers valued the international code and were concerned about additional compliance costs when there is limited international education provision given COVID-19 and the closure of borders.

64. The code contains no substantial changes to the requirements for schools enrolling international learners. The school signatory provisions are in a new and separate part of the code for clarity. Restating of the current standards in this way ensures continuity and clarity as schools look ahead to the potential of returning international learners when this is possible.
65. Variations in the way outcomes and key processes are implemented across the sector may reduce clarity for the public, be subject to varying interpretations, and be perceived as unfair by some (if one provider offers more assistance than another).
66. Given the feedback that the draft code was too prescriptive, we have:
- pulled back from draft code requirements that would affect teaching and learning practice or overlap with academic quality assurance, while continuing to recognise that teaching staff have input into supporting learner wellbeing and safety.
 - reduced examples in the code, including who to consult with or how to develop practices, shifting these examples to guidance material where appropriate.
 - reduced and removed overlap with existing requirements, for example for accessible spaces and human resource policies.

Option C: a single code covering both domestic tertiary and international learners that would be outcomes focused and include key processes and prescriptive requirements that providers must meet

67. This option would:
- replace the interim code and international code with a single code covering both domestic tertiary and international learners; and
 - include detailed and prescriptive requirements that providers must meet.
68. Under this option, the code would set out outcomes, key processes, and detail about how providers will give effect to the code. Prescriptive requirements would increase certainty for learners and stakeholders. However, providers would have to follow the rules, resulting in a limited ability to respond to their diverse learners. This option would be less likely to take into account the full range of educational settings and diverse learners, for example fulltime and onsite learners; parttime, work-based learners, distance learners, etc.
69. The focus would be on compliance with the prescription rather than learner wellbeing and safety. Provider flexibility and creativity would be limited, and innovation would be stifled.
70. In addition, the Government has little information about what the gaps in wellbeing and safety are for each provider, what the most effective practices are for their learners and communities, and the contexts in which they will or will not work. Adopting a prescriptive approach would also see a departure from the outcomes-focused approach taken in the interim code. This option would impact on academic freedom and institutional autonomy as providers would be directed in specific ways to address learner wellbeing and safety.
71. While some learners and providers supported this approach, for many providers, a prescriptive approach provided too much detail and limited the ability for providers to tailor learner wellbeing and safety arrangements to the needs of their diverse learners. This

option might not encourage much movement beyond the minimum (e.g. due to resource constraints).

72. While some learners and providers wanted more detail in the next code, there was strong feedback from many providers that the draft code was too prescriptive and narrow in its focus.

How do the options compare to the status quo/counterfactual?

	Option A: the interim code and international code should be retained	Option B: a single code covering both domestic tertiary and international learners	Option C: a single code covering both domestic tertiary and international learners with prescriptive requirements that providers must meet
Enhancing learner wellbeing and safety	0	++	- <i>(might not encourage much movement beyond the minimum)</i>
Developing good relationships	0	+	- <i>(might not encourage much movement beyond the minimum)</i>
Transparency, accountability, and continuous improvement	0	++	+
Flexibility	0	++	-
Reduced complexity	0	- <i>(different implementation of practices across the sector may reduce clarity for the public)</i>	-- <i>(a focus on compliance is likely to limit the flexibility and creativity we are seeking from providers, in terms of how to meet diverse learners' needs)</i>
Te Tiriti o Waitangi	0	+ <i>(requires reflection, justification, and dialogue to bring about a cultural shift to a whole-of-organisation approach to learner wellbeing and safety)</i>	0
Overall assessment	This is the baseline option. The analysis of other options considers whether those options have better or worse impacts than option A.	By improving the status quo, this option provides certainty that the wellbeing and safety of learners will be enhanced. This option maintains provider flexibility and creativity to adapt practices to their learners' needs. Any potential risk around clarity can be carefully managed by clear guidelines.	This option is worse compared to the status quo as it would likely cause providers to focus on compliance rather than addressing learner wellbeing and safety. While clear rules provide greater certainty on the quality of wellbeing support, this option may stifle innovation and flexibility. This option also risks not being applicable across the sector given its complexity in terms of providers, learners and learning contexts. It may therefore be unclear for some learners how their wellbeing will be supported if the code does not seem to cater to their specific provider's context.

What option is likely to best address the problem, meet the policy objectives, and deliver the highest net benefits?

The most effective solution is Option B

73. The proposal for a combined code that is outcome focused and has key processes is the preferred option. The new code builds on, and embeds, the existing provisions that currently exist across the interim and international codes.
74. In designing a mandatory code, it is important to achieve a reasonable balance between taking an overly paternalistic role (to ensure consistency of objectives and how they are achieved quickly and sustained over time) and allowing providers freedom to choose what approach they take (to be responsive to its specific context and learner body). This means a largely outcomes-focussed approach (such as taken in the interim code) would be an appropriate structure for the new code as it provides a consistent set of outcomes for all providers (to improve consistency) and flexible practices to enable providers to consider and respond to the diverse needs of their learners and learning contexts.

Proposed structure of the new code

75. We propose that the new code include:

- a. core learner wellbeing requirements that apply to all learners¹² whether they be domestic or international, or participating in provider activities on-campus, off-campus or in learner accommodation.¹³ These would be the fundamental conditions needed for any learner to flourish and succeed in their tertiary studies and beyond; and
- b. additional or more specific requirements to reflect the distinct needs of learners in these contexts (e.g. those in learner accommodation and for international learners).

76. This structure has the advantage of reducing duplication (i.e. providing more clarity and simplicity for providers and learners) and reducing reporting requirements for those providers enrolling both international and domestic tertiary learners. It is broken down into six substantive parts, as set out below:

- a. Part 3 sets the direction for provider practices at the whole-of-provider level.
- b. Part 4 is about how providers can proactively support learners to have positive learning and living experiences in their learning environment, and to identify and assess wellbeing and safety risks to learners and respond to them.
- c. Part 5 sets out additional practices in tertiary learner accommodation.
- d. Part 6 retains distinct requirements for tertiary international learners, structured in a similar way to the format of the general tertiary learner sections.

¹² This includes industry trainees and apprentices enrolled in vocational education and training with tertiary education providers.

¹³ Tertiary providers involved with student accommodation that is exempt from the RTA under section 5B of the RTA continue to be covered by the code, whether they own or operate the accommodation, or have agreements with third party operators.

- e. Part 7 sets out requirements for schools enrolling international learners. It effectively restates current provisions, as no substantial changes have been made here. The only changes relate to the language used in this part of the code.
- f. Part 8 relates to code administrator reporting and monitoring requirements.

77. Despite taking a largely outcome-focused approach, the new code retains more detailed requirements for international learners in parts 6 and 7, including for example where there are higher risks (e.g. those under 18) and in relation to key processes to support the Government's objectives for international education.

This combination of options meets all the objectives

78. Overall, we consider this proposal will ensure consistent expectations that meet the needs of diverse learners and support a shift to a wider, developing system of supports for learner wellbeing and safety because it:

- a. continues to focus on outcomes and flexible processes that enable providers to support their learners in ways that best meet their needs (*flexibility & enhanced learner wellbeing and safety*);
- b. requires providers to increasingly involve learners, as well as whānau, staff, local communities, and iwi, as they review the adequacy of their policies and processes in meeting all the outcomes of the code (*developing good relationships*);
- c. allows providers to build on the work they are doing to comply with existing provisions by retaining strengths of the existing codes, refining requirements, and adding some new practices (*enhanced learner wellbeing and safety & transparency, accountability, and continuous improvement*);
- d. aligns expectations for domestic and international learner groups, where their needs are shared, to improve clarity for providers and learners (*reduced complexity*); but
- e. continues to spell out the expectations that apply now for providers regarding the specific needs of international learners (*enhanced learner wellbeing and safety*);
- f. sets expectations for providers to have culturally responsive practices for supporting learner wellbeing and learners' identity, language, and culture (*Te Tiriti o Waitangi & enhanced learner wellbeing and safety*).

79. The new code also integrates the expectations for the Crown's obligations under Te Tiriti o Waitangi. It aims to address inequalities to strengthen our system for Māori learners and whānau to support them to achieve their education aspirations. Providers are also expected to be able to give effect to article 2 rights. The new code requires providers to work with learners, whānau, staff, local communities, and iwi to design strategic goals, plans and practices for learner wellbeing and safety, and safe spaces for learners to use te reo and tikanga Māori.

What are the marginal costs and benefits of the option?

Summary of expected costs and benefits

80. Most benefits and costs of the new code are not able to be quantified at this stage. While providers have mentioned the extra costs associated with giving effect to a detailed code, information about the actual monetised costs was not included in their feedback.
81. The key expected benefit of the new combined code covering domestic tertiary and international learners is to provide greater clarity and consistency for both learners and providers of expectations on providers for their learners' wellbeing and safety. Beyond this, the purpose of the new code is to:
- a. further embed the early focus on wellbeing and safety to support achievement that the interim code has started to encourage;
 - b. support community confidence in providers' support for their learners' wellbeing and safety; and
 - c. ensure that providers that are not meeting the expected standards are aware of these gaps and working to address them.
82. To the extent that the new code raises standards of wellbeing support, it could be expected to lead to benefits for both learners and providers, with flow-on public benefits.
83. The expected key cost of the new code is in assessing its implications (and the extent to which they are different from the existing provisions) and demonstrating compliance. Some providers may need to make changes to processes or services to meet the requirements of the code, with associated costs. It is not expected that these changes will be significant in 2022 because the new code builds on existing provisions, meaning providers can build on the work they are doing now to comply with these.

Cost benefit analysis

Affected groups	Comment	Impact	Evidence Certainty
Additional costs of the preferred option compared to taking no action			
Regulated groups	<p>Tertiary education providers and signatory providers (including contracted service providers) <i>Contracted providers of services covered by the code may include health and wellbeing services, advisory services, learner accommodation.</i></p> <ul style="list-style-type: none"> a. One-off costs of adapting from the interim to the new code and from two codes to one b. Cost of demonstrating compliance with a more complete code c. For providers that are not currently meeting the expectations of the code or do not have practices in place to deliver on new expectations in the code, there is a cost of making changes to comply with the new code 	Low/medium (depending on incidence)	(a), (b), (d), (f) and (g) near certain; (c) and (e) uncertain and likely to affect relatively few providers (there is a risk that costs could be passed onto learners)

	<p>Signatory tertiary providers that predominately enrol international learners</p> <p><i>Costs are as for tertiary providers, also:</i></p> <ul style="list-style-type: none"> d. One-off cost of reviewing policies relating to termination of enrolment e. May not consider change necessary or desirably, especially in the current context <p>Schools with international learners</p> <ul style="list-style-type: none"> f. One-off cost of updating documentation and references to the new code g. One-off cost of reviewing policies relating to termination of enrolment 		
Regulators	<p>Code administrator</p> <ul style="list-style-type: none"> a. One-off change cost to create guidance and adapt processes as the new code takes effect b. One-off cost of communicating the changes c. Ongoing potential cost of administering a more comprehensive code 	Low: the code administrator function is expected to be less than \$1.251 million in 2021/22. For 2022/23 and outyears \$1.211 million is available.	(a) and (b) near certain; extent of (c) is less certain and will depend on provider response to the new code.
Learners	<p>Domestic and international tertiary learners</p> <ul style="list-style-type: none"> a. increased cost of services in tertiary education or learner services fees, depending on provider responses b. impacts on access to tertiary education if increased costs are a barrier to participation c. time to learn about and work with the new code and complaints systems <p>International learners only</p> <p><i>In addition to the above:</i></p> <ul style="list-style-type: none"> d. there may be a perception of less focus on their pastoral care needs 	Low/no cost	The risk of (a) and (b) occurring is considered to be medium as providers may pass on any extra costs to learners; (c) is near certain; (d) is unlikely as it is offset by continued specific requirements in the code on providers for their international learners
Māori (whānau, hapū and iwi)	<p>Potential costs are:</p> <ul style="list-style-type: none"> a. increased cost of services in tertiary education or student services fees, depending on provider responses b. impacts on access to tertiary education if increased costs are a barrier to whānau, hapū, and/or iwi supporting Māori learner participation c. time to learn about and work with the new code and complaints systems. 	Low/no cost	The risk of (a) and (b) occurring is considered to be low; (c) is near certain
Wider government	<p>The Courts, to the extent that there are prosecutions under the offence or penalty provisions.</p> <p>Government may bear costs if regulated parties pass costs on to learners, and if increased costs to learners lead to higher learner loan costs or uptake of student allowances</p>	Low/no cost	<p>Courts: not certain, not expected to occur frequently.</p> <p>Government: not certain, but expected to be unlikely given that uptake rates are high already and</p>

			there are limits on the amount learners can get through loans and allowances
Total monetised costs	Largely unknown	Up to \$1.251 million in 2021/22, and up to \$1.211 million in 2022/23 and outyears.	Not certain
Non-monetised costs		Low	Not certain
Additional benefits of the preferred option compared to taking no action			
Regulated groups	<p>Tertiary education providers and signatory providers (including contracted service providers) <i>Contracted providers of services covered by the code may include health and wellbeing services, advisory services, learner accommodation.</i></p> <ul style="list-style-type: none"> a. greater clarity of expectations from one code rather than two overlapping requirements b. the structure and framework of the new code enable flexibility, support continuous improvement and effective feedback loops, and provide better complaint and dispute resolution c. more responsive services can better meet learner needs and improve wellbeing (leading to increased learner engagement and achievement in tertiary education) d. reduced treatment costs, reduced need for remedial action and reduced learner withdrawals due to inadequate pastoral care provisions <p>Signatory tertiary providers that predominately enrol international learners <i>Costs are as for tertiary providers, also:</i></p> <ul style="list-style-type: none"> e. More consistency with expectations for domestic learners reduces barriers to taking on domestic learners <p>Schools with international learners</p> <ul style="list-style-type: none"> f. continuity, clarity, and reduced burden at a time of significant change through retaining current settings for schools g. clarification of expectations relating to disciplinary action, particularly termination of enrolment, to ensure that these processes are fair and reasonable 	Low/medium	(a) and (b) are near certain
		Low	(c) and (d) is less certain and is dependent on providers' response to the new code
		Low/medium	Extent of (e) is uncertain and dependent on providers' response to the new code
		Low	(f) and (g) near certain
Regulators	<p>Code administrator</p> <ul style="list-style-type: none"> a. improved clarity/specificity of requirements b. one code will remove overlapping/ conflicting expectations and a more comprehensive set of processes within the new code should reduce the need for education and compliance actions 	Medium	(a) near certain; (b) and (c) are likely but less certain and depend on providers' responses to the new code and need

	<ul style="list-style-type: none"> c. changes to the code provide incentives for ongoing self-review and improvement by providers, reducing the need for regulatory action 		for support in adapting to the new requirements
Learners	<p>Domestic learners</p> <ul style="list-style-type: none"> a. clearer expectations for what providers must do and how they must work, including ensuring a more appropriate model for adult tertiary learners through a partnership approach (and therefore greater confidence in tertiary education services) b. understanding of learner rights to influence providers, and ability to raise suggestions and concerns about provider practices that affect them c. benefits to wellbeing, where provider practices better meet learner needs and recognise their identity, culture, and community d. benefits to educational achievement and success, where practices enable learners to improve or maintain wellbeing and focus on their studies e. reduced harm from inadequate practices <p><i>In addition to the above, there are further benefits for the following learner groups.</i></p> <p>Māori learners</p> <ul style="list-style-type: none"> f. requirement for providers to recognise the needs and aspirations of whānau Māori and for their processes to be culturally responsive and support the use of te reo Māori g. expectations that providers engage with learners as part of their community would enable whānau perspectives of learners to be heard <p>Disabled learners</p> <ul style="list-style-type: none"> h. explicit expectations that provider services are accessible i. learner voice and engagement expectations will explicitly require engagement with diverse learners, which includes disabled learners <p>Pacific learners: <i>Same as (g) above</i></p> <p>Rainbow community learners: <i>Same as (i) above</i></p> <p>Ethnic, or migrant and former refugee learners: <i>Same as (g) and (i) above</i></p> <p>International tertiary learners</p> <ul style="list-style-type: none"> j. as for domestic learners, except that the benefits result from aligning wellbeing and safety expectations for domestic and international learners so that they are set at a similar level, where their needs are shared (this also addresses key gaps in the current international code) k. existing specific protections for international learners are maintained 	<p>Medium</p> <p>Low</p> <p>Low</p> <p>Low/medium</p> <p>Medium</p>	<p>(a) and (b) are near certain</p> <p>(c), (d) and (e) are less certain and depend on providers' response to the new code</p> <p>(g) and (i) are less certain as impacts on learner and whānau engagement may occur if provisions change in response to the new code; expect these would improve over time</p> <p>(f) and (h) are likely but less certain as these impacts depend on providers' response to the new code</p> <p>(j) and (k) are near certain</p>

Māori (whānau, hapū, iwi)	Potential benefits are: a. the code requirements for provider plans and goals would offer an opportunity for Te Tiriti o Waitangi partner influence on providers b. the new code is an opportunity for iwi and hapū supporting Māori learners to ensure providers are meeting expectations for those learners	Low	Extent of (a) and (b) is uncertain and depends on providers' approach and response to the new code
Wider government	Potential benefits are: a. better outcomes from tertiary education b. improved wellbeing for learners c. reduced treatments costs from harm due to inadequate pastoral care provisions (this might for example include healthcare costs, crime)	Low	(a), (b) and (c) are uncertain but expected to grow/become more visible over time
Total monetised benefits	Unknown	N/A	
Non-monetised benefits		Medium/low	

Key assumptions underlying the costs and benefits analysis

84. The key assumptions underlying the cost benefit analysis above relate to:

- a. current practice in providers;
- b. the impact of COVID-19 on signatory tertiary education providers and schools with international learners; and
- c. the response of regulated parties to the new code.

Current practice in providers

85. Our understanding of current practice in providers is based on:

- a. provider self-reviews undertaken over the course of 2020 in relation to the interim code;
- b. submissions and feedback received during the consultation on te oranga me te haumarū ākonga | learner wellbeing and safety; and
- c. code administrator information.

The impact of COVID-19 on signatory tertiary education providers and schools with international learners

86. The recovery plan sets out a phased response and rebuild from the impacts of COVID-19, including ongoing work to review regulatory settings to ensure recovery supports the goals of the International Education Strategy. International education has been hit hard by COVID-19 disruptions, which have significantly impacted revenue, organisational stability, and future planning for signatories to the current international code. This has implications for the capacity and capability of signatory tertiary education providers and schools with international learners to implement requirements under the new code.

Signatory tertiary education providers

87. Signatory tertiary education providers that predominately enrol international learners have already had to update their pastoral care practices to new and amended international codes as recently as 2016 and 2019. Many of these providers have been heavily impacted by the drop in revenue from enrolling international learners, as well as losing staff and institutional knowledge.

Schools with international learners

88. The primary focus of the new code is embedding the strategic shift towards a learner-centred, wellbeing-focused tertiary education system which empowers learners. In general, the approach taken in the current international code appropriately reflects a traditional pastoral care approach for learners under 18 years, where staff and residential caregivers effectively take on the responsibilities of parents and guardians.

89. No substantial changes are being made to wellbeing and safety requirements for international school learners, so the current provisions remain in place for them. This ensures continuity and clarity as schools look ahead to the potential of returning international learners when this is possible. There are two minor terminology changes to the part of the new code relating to schools with international learners.

90. Further review of these requirements may be appropriate following legislative change and as part of the ongoing recovery of the international education sector.

91. The response of regulated parties to the new code

92. Our assumptions about the behaviour of regulated parties are that:

a. tertiary education providers, including signatory providers, will:

- i. assess the implications of the new code for their activities accurately, using information from the code administrator,
- ii. make the necessary changes to become compliant with the code;
- iii. make appropriate efforts to absorb the cost of necessary changes within the provider to avoid significant costs to learners;
- iv. consider passing any significant costs of quality or service improvement on to the learner;
- v. seek clarity about requirements under the new code before making any significant changes or decisions about provision.

b. contracted service providers will:

- i. assess the implications of the new code for their activities accurately, using information from tertiary education providers and the code administrator;
- ii. make the necessary changes to become compliant with the code;
- iii. seek to be compensated by providers for any necessary changes;
- iv. seek clarity about the new code before making any significant changes or decisions about provision.

Section 3: Delivering an option

How will the new arrangements be implemented?

93. The Minister will issue the new code immediately following Cabinet decisions to ensure providers know about the scope of the code for 2022 in time to feed into planning and budgeting. The new code will come into effect from 1 January 2022. Some submitters want more time for the development of the next code while other submitters are keen for the next code to be implemented on 1 January 2022.
94. The Minister may, by notice in the *Gazette*, appoint a person or an agency to be responsible for administering a code. The code administrator can (with the Minister's permission) delegate functions to another party.¹⁴
95. It is expected that the implementation approach of the new code will draw significantly on the approach taken to implementing the interim code and the international code. Signatories have had several years of experience with the international code, and tertiary providers generally have been working with the interim code over the last 18 months. Experience with the existing codes has shown:
- a. the importance of information and education to support good practice, and reduce compliance activity; and
 - b. that complaint volumes can be high in the period following a new code, which indicated the importance of being resourced to respond to high volumes of queries in the start-up period.
96. In line with the approach to implementing the interim code and international code, it is expected that the code administrator, once appointed, will:
- a. begin developing code guidance for providers, in consultation with the sector (this is to occur in the second half of 2021 and may also involve running workshops with the sector, including into next year);
 - b. work with providers to build capability so that providers understand their obligations for learner wellbeing and safety, including in learner accommodation;
 - c. work with providers to help them meet their obligations; and
 - d. support the development of a sound information base on the code and its implementation.
97. The initial focus of implementation will be on information and education, enabling providers to ask questions about the implications of the code and the changes to existing provisions, and avoid misinterpretations or hasty changes that may increase costs unnecessarily. Focusing on information and education for providers will also enable the code administrator to build on existing information and undertake effective risk monitoring and management.

¹⁴ Under the old Education Act 1989, [section 238H](#) enables the Minister to appoint a code administrator. Under the new Act, this function is embedded into regulations under [section 648](#), however, schedule 1, clause 7(3) saves provisions of the old Act related to the code administrator until the date on which regulations are made under the new Act.

98. Joint Ministers have agreed to provide funding for the administration of the new code for domestic providers at \$1.251 million in 2021/22 and \$1.211 million in 2022/23 and outyears. This is in addition to existing funding for administering the code for international providers. The slightly higher funding in 2021/22 will allow the administrator to adjust its activities to respond to provider needs over the 2022 calendar year. If the administrator finds that provider readiness for the new code is greater or that providers quickly build capability and provide quality performance information, the funding may not be exhausted.
99. We expect that the code will evolve over time, both in line with legislative changes and based on any adjustments and clarifications needed as its implementation progresses. This will be a key message of the communication with and information for the sector.

How will the new arrangements be monitored, evaluated, and reviewed?

100. It is the role of the code administrator to develop monitoring and compliance arrangements to manage concerns of non-compliance, investigate alleged breaches, issue improvement notices and take other statutory action appropriate to the seriousness of the breach, and monitor performance as well as manage risk.
101. In terms of existing statutory actions, the Act allows for serious breach penalties to be issued to a provider that has breached the code or failed to comply with a quality improvement or compliance notice (section 535). Providers that commit an offence relating to a breach of code resulting in serious harm to or death of learners can also be found liable on conviction to a fine not exceeding \$100,000 (section 544).
102. Under outcome 1 of the code, providers must develop strategic goals and plans for supporting the wellbeing and safety of learners and use these to review the quality of their practices. Following any self-review, providers are required to take appropriate action within a reasonable timeframe to address any deficiencies in their practices. Providers must also arrange for peer-to-peer review of their self-assessment by suitably skilled and qualified staff from a different provider. The code administrator determines the frequency of both self- and peer-reviews.
103. The code administrator will report regularly about its performance and the performance of the sector.

Appendix 1: Who are the key stakeholders and what are their views?

104. A range of parties will be affected by the new code, and the expected costs and benefits are set out in section 2. The focus of this section is on identifying key stakeholders and outlining how they are affected, as informed by feedback through public consultation.

Users of tertiary education

105. All learners, including diverse domestic tertiary and all international learners, will be directly impacted by the code which places expectations on providers and signatory providers to support learner wellbeing and safety. The code will mean that learners will have more clarity about what providers must do and how learners can influence provider practices. Learners will see benefits to their wellbeing and therefore their educational achievement and success, where provider practices better meet diverse learners' needs.

106. The code is well supported. We have heard from learners generally that learner voice is central to the success of the code and that mechanisms for learners to have a voice need to be more effective. Striking an appropriate balance between providing support while also recognising learners as adults is important. Learners also raised concerns that some of the costs of implementing increased requirements may be passed on to them (e.g. providers may remove money from learner representative bodies to fulfil increased wellbeing requirements).

107. Māori learners highlighted the importance of being seen as part of, and engaged alongside, their whānau and communities. We also heard that Māori learners should not be expected to carry the burden of educating their provider about Te Tiriti o Waitangi or Māori interests.

108. We heard similar themes from Pacific learners, who support the emphasis on the collective (rather than an individualist approach) and noted the importance of working in tandem. They also cautioned that the code should not put the burden of 'fixing things' on the learners.

109. Disabled learners highlighted the importance of recognising that disability includes interplay between individuals and the barriers in their environment. We heard about ongoing issues around accessibility, sense of inclusion and inconsistencies in support.

110. We heard from international learners about the importance of clear and accessible information and that the language used reflects the diversity of different learner communities and voices. While they are aware that domestic learners do not have the same protections as they do, it is important that these provisions are retained for international learners.

111. Ten submissions were received from student associations and two from interested individuals: one a learner, the other a recent graduate and former student representative. All submitters broadly supported the code's intended purpose of providing a basis for ensuring and protecting learners' safety and wellbeing. One of the two individual submitters was pleased to note that the code is a step towards providing learners with appropriate care and support, rather than treating them as "income and expenditures streams."

112. Almost without exception submitters wanted to see stronger and more explicit commitment to engagement with learners in the development and implementation of the code. Most learners welcomed the focus on learners but thought that processes for including learner voices in a real and meaningful way needed to be strengthened.
113. The National Disabled Students' Association noted the absence of learners with disabilities in the code (though mentioned in the Discussion Document). They also considered that the tone of the code was not conducive to inclusion. They were concerned about providers not listening to learners, or that the diversity of needs would not be taken into account by the provider.
114. Many submitters raised the issue of discrimination and harassment in learning environments and wanted this more clearly articulated in the code. Establishing inclusive environments was very important to learners and they recommended that any support and complaints services be required to be accessible and mindful of cultural considerations.
115. Referencing a recent Youth survey, YouthLaw Aotearoa drew attention to refugee background learners, same-sex attracted teenagers and transgender and gender diverse teenagers as groups whose wellbeing needs should be further protected by the code.
116. Concerns were raised about the potential risk of compromising adult learners' autonomy and right to privacy, particularly the private lives of students when they are off campus.
117. Even though the discussion document characterises the code as being "principles-based", learner submissions worried about the potential impact of the code's prescriptiveness. They were particularly concerned about the whole process becoming a "tick box" exercise.
118. Learners indicated their unwillingness to cover any additional compliance costs that implementing the code may entail, either directly through having to pay increased fees, or indirectly through experiencing service cuts in areas not covered by the Code. They also noted how the code's prescriptive nature corresponds to an absence of a learner co-design. They want the code to have lots of detail so that learners can hold providers to account.
119. Some learners and providers acknowledged that tertiary learners are often adults and, therefore, should be able to take responsibility for their wellbeing and safety. Others considered that some learners can be vulnerable because of their circumstances (for example those moving between countries and those leaving home and their normal supports).

Māori interests – whānau, hapū and iwi

120. Ensuring the system of supports for learner wellbeing and safety honours Te Tiriti o Waitangi and works well for Māori is part of the Crown's responsibility under Te Tiriti o Waitangi. The education system has some way to go to ensure Māori receive their general citizenship rights under article 3 of Te Tiriti o Waitangi. It also has an important role in enabling Māori to exercise authority over their taonga, in particular te reo, tikanga and mātauranga Māori, under article 2 of Te Tiriti o Waitangi.

121. In our discussions with Māori and other participants considering the impact of changes for Māori, we have heard about the importance of meaningful whānau engagement which leads to better outcomes for Māori learners. Māori involvement in governance and decision-making should reflect Māori learners and the role of mana whenua.

Families and community interests

122. Ensuring that providers establish relationships with families and communities is important, especially relationships that value, promote and build on language, identity and culture (as noted above). Furthermore, involving communities in identifying and defining their own issues is more likely to lead to more sustainable solutions that work for learners, their supporters, and their communities.

Regulated parties: tertiary education providers and signatory education providers (includes their contracted service providers)

123. All providers are directly impacted by the code as it is binding on them. Providers will be expected to have (or form) an understanding of the new code and enact the requirements it sets. These requirements cover a wide range of activities which will influence provider practices at different levels (e.g. organisational, environmental and at the individual level).

124. Some providers, including contracted service providers (e.g. learner accommodation providers) may need to make changes to their practices to meet the new expectations. This impact on providers is likely to vary depending on a range of factors including the quality and scope of support provided to learners under the existing regulatory requirements. Based on the evidence available, it is not possible to make a detailed provider-by-provider analysis of the likely impacts.

125. Providers agree with the importance of the code and the role it plays, however, they felt more balance is needed in terms of making visible learners' responsibilities and agency regarding their own wellbeing. There was also some concern about the code setting out obligations beyond learner support services and student accommodation. Some participants noted the importance of being clear in the expectations that providers should do 'all reasonable' (whereas 'all possible' may not be realistic).

126. Some providers have a holistic approach to wellbeing that is embedded throughout and within their organisation.

Regulated parties: Universities

127. Seven New Zealand universities and their peak body, Universities New Zealand (UNZ), agreed in principle with the creation of a code that covers both domestic and international learners, and they acknowledged the importance of wellbeing to learner achievement. However, they all had some concerns that the draft code was too prescriptive and would not fulfil its intended purpose of providing a basis for continuous improvement but instead serve as a compliance tool. They were concerned about extending institutions' duty of care beyond the provision of safe learning environments to include students' physical and mental health as well as their social wellbeing.

128. Most universities considered that there needed to be more clarity about their obligations in terms of the dimensions of care and support under the code. They were worried about the broadening of the concepts of wellbeing and safety to matters that they felt were outside their control. Many submitters focused on the use of words such as ‘timely’, ‘efficient’, ‘appropriate’, and queried what they might mean, or how they could be measured or monitored.
129. Universities unanimously supported consultation with stakeholders to inform strategic goals, and especially of learners’ perspectives. However, many submitters also noted that the need to consult with communities was perhaps too broad. For example, UNZ suggested that further consultation beyond learners and staff be mainly limited to whānau, iwi and/or communities, where those whānau, iwi and/or communities are actively and deliberately involved in supporting the wellbeing and safety of learners.
130. Universities were particularly concerned about the code interfering with academic pedagogy. Universities highlighted the diversity of learners at their institutions, arguing that the code’s requirements would not be practical, or enforceable, except in the most general way. Universities expressed that the relationship with Māori and Pasifika learners is different and supported the need for Māori and Pacific learner spaces. Some universities questioned the relevance of ‘ecological sustainability’ and human resource management to learner wellbeing and safety.
131. Many universities argued some processes and practices described in the code should not be included in a pastoral care framework. An overarching theme in the submissions from universities was the lack of acknowledgement of the diverse nature of tertiary learners. Submitters considered that it was inappropriate to impose strict requirements in relation to all learners as this would potentially make them feel like their liberties are infringed unnecessarily. The University of Canterbury thought that the code could benefit from differentiating those learners who are most vulnerable.
132. Some universities expressed concern that some draft code wording about learner voice could permit students to voice hateful or unacceptable views.
133. A particular focus for the universities was the management of wellbeing and safety, where responsibility should fall, and who should be included. Related to this was the issue of access to public health and wellbeing services.
134. Another key element of submissions from universities was concern about learners who are studying remotely or overseas (including on exchange). It was felt that the code placed an impossible obligation on providers in these circumstances. For example, while providers will take reasonable steps to provide information and direct learners to access health services in those countries, the provision of those services will be entirely within the realms of the respective country and outside the provider’s control.

Regulated parties: Te Pūkenga

135. In principle, submissions received from Te Pūkenga and its subsidiaries supported the move towards combining the international and domestic codes. However, they articulated a range of concerns in relation to the code’s perceived ambiguity and proposed scope. Most submitters felt that the code takes too wide an approach and would require them to do things that they are not resourced to do.

Regulated parties: Private Training Establishments (PTEs)

136. While PTEs broadly supported the code's outcomes, they canvassed a range of concerns in their submissions about associated processes. Some PTEs noted that, while they take all reasonable steps to ensure and maintain the wellbeing of learners, they deal with adult learners in whose private matters they have no interest in interfering.
137. Some PTEs noted that the discussion document states that wellbeing and safety are "a shared responsibility between government, providers, learners, whānau, and the wider community", but there is no detail on how the Government would contribute to sharing this responsibility in a tangible way. Responsibility, cost, and liability for developing and maintaining learner wellbeing appears to rest solely with providers. A few PTEs felt the prescriptive nature was counterintuitive to the principles-based approach to the code.
138. Many submissions felt that the draft code adopted a "one-size-fits-all" approach and that this could not take into account the complexities of certain kinds of learning situations, for example, nursing students whose safety and wellbeing is determined by a range of factors such as the availability, cost and safety of transport to clinical placements which can necessitate travelling to isolated areas at night and for long distances.

Regulated parties: schools

139. The Minister has already signalled that the focus of the new code is to embed the strategic shift towards a learner-centred, wellbeing focused tertiary education system that empowers learners. In general, the approach taken in the current international code appropriately reflects a traditional pastoral care approach for learners under 18 years, where staff and residential caregivers effectively take on the responsibilities of parents and guardians.
140. The Minister has signalled his intention not to make any substantial changes to wellbeing and safety requirements for international school students. This is partially because legislation and further policy work is needed to be able to do this. Retaining current provisions also ensures continuity and clarity as schools look ahead to the potential of returning international students when this is possible.
141. Feedback has signalled that the focus on tertiary providers is appropriate and that code expectations for school signatory providers do not require changes at this time.

Regulator: code administrator (and any delegated administrator)

142. The code administrator function will require capacity to communicate the changes to the existing provisions, respond to enquiries and complaints, investigate and monitor performance, and prepare a tailored approach to enforcement action for breaches. The administrator is also required to take reasonable steps to publicise the code to providers and learners, including (creating and) publishing guidelines for providers.
143. The code needs to include sufficient detail so that the code administrator can monitor and investigate performance. The code also needs to be flexible so that the code administrator can use the code in diverse education settings and with diverse learners.

Wider government

144. There may be impacts for the Courts, to the extent that there are prosecutions under the code, however, these are expected to be rare.
145. There may be implications for health-related services. If providers are better at identifying wellbeing and safety needs, more learners may be directed to health-related services. If there is not timely access to high quality health related services, learner wellbeing and safety may be compromised.
146. There may be other impacts for wider government, including benefits from better wellbeing and educational outcomes for learners. The guidelines developed by the code administrator will provide an opportunity to highlight healthy practices.

Tertiary and International Learner Wellbeing and Safety: Code of Practice, Dispute Resolution Scheme Rules and Legislative Changes

Portfolio Education

On 12 July 2021, the Cabinet Business Committee (CBC), having been authorised by Cabinet to have Power to Act [CAB-21-MIN-0281]:

Background

- 1 **noted** that in April 2021, CBC agreed to the release of consultation documents on a package of provisions for learner wellbeing and safety [CBC-21-MIN-0033];
- 2 **noted** that consultation with the sector has been completed, which fulfils the statutory consultation requirements under sections 534 and 539 of the Education and Training Act 2020 (the Act);
- 3 **noted** the summary of consultation feedback attached under CBC-21-SUB-0065, which the Minister of Education (the Minister) intends to publicly release;
- 4 **noted** that submitters were generally positive about the overall goals of the learner wellbeing and safety proposals to support achievement and broader community wellbeing, with learners and providers disagreeing on how to strike the best balance of expectations;

A new code of practice for learner wellbeing and safety

- 5 **noted** that the sector supported combining expectations for domestic tertiary and international learners in a single code of practice and the flexibility of an outcomes-based code;
- 6 **noted** that, under section 534 of the Act, the Minister may issue a code that provides a framework for the pastoral care of domestic tertiary and international students;
- 7 **approved** the draft Education (Pastoral Care of Tertiary and International Learners) Code of Practice 2021 attached as Appendix B under CBC-21-SUB-0065;
- 8 **authorised** the Minister to make any further minor decisions, finalise and issue the *Education (Pastoral Care of Tertiary and International Learners) Code of Practice 2021* (the new code);
- 9 **noted** that the new code replaces the Education (Pastoral Care of Domestic Tertiary Students) Interim Code of Practice 2019, which expires on 1 January 2022, as well as the Education (Pastoral Care of International Students) Code of Practice 2016;

- 10 **invited** the Minister to present the new code to the House of Representatives following Cabinet approval to fulfil the statutory requirement of section 534(7)(c) of the Education and Training Act 2020 (the Act);
- 11 **noted** the Minister's intention to appoint the New Zealand Qualifications Authority as code administrator to work in consultation with the sector to support implementation of the code from 1 January 2022;

A new scheme to address financial and contractual disputes between domestic tertiary learners and providers

- 12 **noted** that the sector largely supported the proposal to create a new accessible, inclusive and flexible dispute resolution scheme for domestic tertiary learners to provide a similar process currently only available to international learners;
- 13 **noted** that under section 539 of the Act, the Governor-General may, by Order in Council, make rules for the functioning and administration of the dispute resolution scheme (the scheme);
- 14 **noted** that the Minister has made changes to the rules of the scheme based on sector feedback, including:
- 14.1 prioritising consensual forms of dispute resolution over adjudicative processes that result in binding decisions, with clarity that adjudicators must give effect to the rule of law in making decisions;
 - 14.2 expecting the scheme operator to develop and evaluate their service under the rules with Māori to ensure consistency with Te Tiriti o Waitangi;
 - 14.3 ensuring the proposed rules' consistency with the Privacy Act 2020;
- 15 **noted** the Minister's preference for the final structure of the rules to reflect the learner's journey through the scheme to improve clarity and make the scheme more navigable for users;
- 16 **agreed** to the proposed *Education (Domestic Student Contract Dispute Resolution Scheme) Rules 2021* (the proposed rules), attached as Appendix C under CBC-21-SUB-0065, which:
- 16.1 draw on the existing International Student Contract Dispute Resolution Scheme Rules 2016;
 - 16.2 have been developed in collaboration with the Government Centre for Dispute Resolution to ensure the scheme is in line with the Aotearoa Best Practice Dispute Resolution Framework;
 - 16.3 reflect initial feedback from Parliamentary Counsel Office;
- 17 **authorised** the Minister to issue drafting instructions to the Parliamentary Counsel Office to formally draft the new dispute resolution scheme rules based on the proposed rules;
- 18 **authorised** the Minister to make any further decisions that may arise during the drafting process;

- 19 **agreed** that, once drafted, the new dispute resolution scheme rules be released for targeted consultation with people and groups who provided feedback on the proposals ahead of final decisions;
- 20 **noted** the Minister's intention to report back to Cabinet in October 2021 seeking agreement to the new dispute resolution scheme rules;
- 21 **noted** the Minister's intention to appoint a scheme operator in late 2021, following a selection process, as per section 536 of the Act;

Legislative amendments

- 22 **noted** that there was relatively less consultation feedback on the proposed legislative changes, some of which was expressed through comments on the code and scheme;

Amendments relating to the provisions of a code of practice

- 23 **agreed** to amend the provisions in the Act relating to a code of practice to:
- 23.1 strengthen the focus on student wellbeing and safety in section 534 and related sections by:
 - 23.1.1 replacing each reference to pastoral care with reference to wellbeing and safety, with any necessary modifications;
 - 23.1.2 clarifying that the code applies to domestic and international students studying in New Zealand or offshore;
 - 23.2 provide for a responsive code by:
 - 23.2.1 requiring the Minister to consult with Māori before issuing a code;
 - 23.2.2 enabling the Minister to:
 - 23.2.2.1 issue tailored codes for a particular grouping of providers with either mandatory coverage or the ability to opt in to using a tailored code;
 - 23.2.2.2 appoint a code administrator for one or more codes;
 - 23.2.2.3 regularly set expectations about the code administrator's performance and priorities;
 - 23.2.2.4 gather information from the code administrator;
 - 23.2.3 providing for the Minister to gazette exemptions to all or part of a code for particular groupings of providers and for these exemptions to be added to the code as minor and technical changes;
 - 23.3 allow the Minister to make minor and technical changes to the code without meeting the consultation requirement set out in section 534(5) of the Act;

Amendments relating to the provisions for a code administrator

- 24 **agreed** to amend the provisions in the Act relating to a code administrator to:
- 24.1 ensure the code administrator has appropriate functions, powers, and duties to administer the code, monitor performance and manage risk by:
 - 24.1.1 providing for the code administrator to monitor and regularly review how tertiary education providers and signatory providers are giving effect to the code;
 - 24.1.2 allowing the code administrator to authorise any person to do, at any reasonable time, any one or more of the following things in relation to the code administrator's functions, powers and duties:
 - 24.1.2.1 enter and inspect any premises (other than a dwelling house) of tertiary education providers (universities, wānanga, Te Pūkenga, private training establishments) and, if they are a signatory provider, schools;
 - 24.1.2.2 require any person to produce documents or information under the control of the person;
 - 24.1.2.3 inspect, photocopy, print, or copy any documents (whether held in electronic or paper form) or that the authorised person believes on reasonable grounds to belong to the establishment;
 - 24.1.2.4 remove any document, whether in its original form or as an electronic or a paper copy;
 - 24.1.2.5 require any employee or member of the establishment to make or provide statements, in any form and manner that the authorised person specifies;
 - 24.1.2.6 inspect any work and any related materials;
 - 24.1.2.7 meet and talk with any person;
 - 24.1.3 requiring the authorised person to:
 - 24.1.3.1 produce evidence of the person's authorisation to the person in charge of the premises when the person first enters the premises, and at any later time, at the request of the person in charge; and
 - 24.1.3.2 give the person in charge a list of all documents that have been removed (if any); and
 - 24.1.3.3 return any documents that have been removed unless to do so would prejudice any investigation;
 - 24.1.4 ensuring the authorised person is a fit and proper person and has received appropriate training before using the powers of entry and inspection;
 - 24.1.5 requiring the authorisation to be in writing and contain the legislative authority, the full name of the person authorised, and a statement of the powers conferred on that person;

- 24.1.6 providing for the code administrator to:
- 24.1.6.1 honour Te Tiriti o Waitangi and support Māori-Crown relationships (or other such wording as agreed with the Parliamentary Counsel Office);
 - 24.1.6.2 report annually about its performance of its functions, powers, and duties, as well as the extent to which tertiary education providers and signatory providers are giving effect to the code;
 - 24.1.6.3 issue notices which allow the code administrator to require a provider and/or signatory provider to do, or refrain from doing, a particular thing in relation to their obligations (and, for signatory providers, also their conditions) under a code, replacing quality assurance and compliance notices;
 - 24.1.6.4 have notices set out:
 - 24.1.6.4.1 any concerns the administrator has about the provider's systems, practices, training, or procedures, or about the provider not sufficiently meeting a code outcome, or for non-compliance with a requirement of the code;
 - 24.1.6.4.2 the time within which the provider is expected to address the administrator's concerns (which must be a reasonable time, having regard to the nature and complexity of the action required); and
 - 24.1.6.4.3 the possible consequences of a failure to comply with a notice;
 - 24.1.6.5 publish those notices, or a summary of it, in a manner designed to give public notice of it and extend the time or period, and in that case the time or period as extended becomes the time or period within or during which the notice must be complied with;

24.2 modernise the legislation by moving the provisions of the Education Act 1989 saved by clause 7(3) Schedule 1 of the Education and Training Act 2020, to the main body of the Education and Training Act 2020;

25 **agreed** to also:

- 25.1 remove 'following a process prescribed by a code' from section 238H(3)(b)(i)(A) of the Education Act 1989 which is saved by Schedule 1, clause 7(3) of the Act;
- 25.2 revoke sections 238I and 238J of the Education Act 1989 which are saved by Schedule 1, clause 7(3) of the Act;
- 25.3 remove 'in accordance with the relevant code' from section 633(1) of the Act;

Amendments relating to the provisions for a dispute resolution scheme

- 26 **noted** the Minister's proposals for legislative amendments with the joint purpose of modernising, strengthening, and clarifying the legislative provisions relating to the dispute resolution scheme and scheme operator, and ensuring they are fit for purpose;
- 27 **agreed** to amend the provisions in the Act relating to a dispute resolution scheme to:
- 27.1 broaden the scope of the disputes resolution scheme to include breaches of the code;
 - 27.2 better provide for the appointment and operation of a scheme operator by requiring the scheme operator to:
 - 27.2.1 co-operate and supply information;
 - 27.2.2 honour Te Tiriti o Waitangi (or other such wording as agreed with the Parliamentary Counsel Office);
 - 27.2.3 report annually;
 - 27.3 set a time limit of 20 working days for appeals about scheme adjudications, in line with other schemes;
 - 27.4 broaden the bodies able to be appointed as scheme operators to 'organisations' rather than 'agencies';

Amendments relating to administrative provisions for the code administrator and scheme operator

- 28 **agreed** to amend the provisions in the Act relating to administrative provisions to support the effective administration of the code and dispute resolution scheme, and ensure they are fit for purpose, so that the Act:
- 28.1 allows for the scheme operator, code administrator, and quality assessor to share information about complaints and complaint resolution;
 - 28.2 clarifies that the code administrator and the scheme operator are subject to the Ombudsman Act 1975 and Official Information Act 1982;
 - 28.3 enables the Minister to regularly approve and gazette expectations about enrolment forms, associated processes, and the provision of information to learners;
 - 28.4 enables fit and proper person checks;

Legislative drafting

- 29 **noted** that the legislative changes in paragraphs 23 to 28 above will be given effect through the Education and Training Amendment Bill (No 2), 9(2)(f)(iv) [REDACTED];
- 30 **invited** the Minister to issue drafting instructions to Parliamentary Counsel Office to give effect to the decisions in paragraphs 23 to 28 above;
- 31 **authorised** the Minister to make any further decisions that may arise during the drafting process, consistent with the overall decisions above;

32 9(2)(f)(iv)

Government response to the inquiry into student accommodation

- 33 **noted** that on 13 May 2021, the Education and Workforce Committee (the Committee) reported back to Parliament on its inquiry into student accommodation;
- 34 **noted** the Committee's conclusion that four areas of the student accommodation system were most in need of improvement: transparency and accountability in governance; dispute resolution and complaints; wellbeing and safety in student accommodation; and emergency planning and response;
- 35 **noted** that the Committee supported the draft code that was consulted on and made seven recommendations, all of which concerned the code and dispute resolution scheme;
- 36 **noted** that the Minister intends to accept the Committee's recommendations, but that:
- 36.1 the final code and scheme differ slightly from those endorsed by the Committee based on sector feedback;
- 36.2 the government give consideration to the recommendation for a combined dispute resolution scheme for domestic tertiary and international learners once the new scheme for domestic tertiary learners is in place;
- 37 **approved** the Government response, attached as Appendix E under CBC-21-SUB-0065;
- 38 **invited** the Minister to present the Government response to the House by 6 August 2021 in accordance with Standing Order 256.

Rachel Clarke
Committee Secretary

Present:

Rt Hon Jacinda Ardern (Chair)
Hon Grant Robertson
Hon Dr Megan Woods
Hon Chris Hipkins
Hon Carmel Sepuloni
Hon Andrew Little
Hon David Parker
Hon Stuart Nash
