The Repeat Referral calculation methodology:

The numbers have been calculated by looking at the NSN of the student as a unique identifier of all NE and UA cases opened this year, and counting the number of times the NSN has been assigned to a new open case.

For example, two referrals means a student has been referred twice to the provider within the year 2020. This can be:

- A student who has had a UA case and a NE case
- A student who has had two UA cases
- A student who has had two NE cases
