Released under the Official Information Act 1982

Q7 Any other comments? e.g. how the initiative could be improved

Answered: 9   Skipped: 14

Released under the Official Information Act 1982

## Have you received any feedback on the initiative from ākonga or your school community, if yes, please provide detail

Not really, just very happy with availability

they appreciate it and look forward to getting them as it cost so much especially if you have a big whanau

They feel relieved

Parents were delighted that their daughter was given the products and education around them at school, and how they were accessible so their daughter did not need to stress at school if their period arrived

Whānau do appreciate of the products.

No, I have not

Yes- Parents are very appreciative

N/A

Yes. It is awesome and parents are very grateful for the help!

Families have found it really beneficial and girls appreciate being able to have easy access to supplies at school.

They are appreciative when we give them out to whanau

They are very grateful and it has bough tears to some of the caregiver's eyes to know that their young wahine are supported in this way.

Whanau have been extremely grateful for the products.

## Any other comments? e.g. how the initiative could be improved

Thank you for making this available in a situation that could have been very different.

great to have them in schools

The students often ask for tampons that are in applicators

More advertising - some of the community is not aware that these products are available for them.

Our school caters for Yr 0 - Yr 6 - meaning our needs are less than other schools in the area, so it is preferable that we contact Office Max on a needs basis rather than them trying to supply products to our Kura unnecessarily.

We are very grateful for this extra help!

This is a great initiative that makes a big difference to girls and their ability to participate/engage in their learning without having to worry about how to access period products.

We feel that for our age group (primary/intermediate) period underwear would be an easier lead into the use of period products as many of our students are still experiencing irregular periods so the period underwear would mean they could wear them around the time they expect to get their period. Less stress for them.

It a great initiative, thank you
