

BRIEFING NOTE: Prime Minister's visit to Western Springs College | Ngă Puna o Waiorea, to officially open new campus, Friday 21 February 2020

| To: | Hon Chris Hipkins, Minister of Education |  |  |
| :--- | :--- | :--- | :--- |
| Date: | 13 February 2020 | Priority: | High |
| Security Level: | In Confidence | METIS No: | 1218281 |
| Drafter: | Aroha Solomon | DDI: | S $9(2)(a)$ |
| Key Contact: | Julien le Sueur | DDI: |  |
| Messaging seen by <br> Communications team: | No | Round Robin: | No |

## Purpose

1 This briefing note provides background information for Prime Minister Rt Hon Jacinda Ardern's visit to Western Springs College | Ngă Puna O Waiörea to officially open the College's new campus on Friday 21 February 2020.

2 Agree that this Briefing will be proactively released.

## Helen Hurst <br> Associate Deputy Secretary Operational Delivery

Hon Chris Hipkins
Minister of Education
$14,2,20$

# Western Springs College - Ngā Puna O Waiōrea \#48 

## Issues

1 No issues have been identified.

## Visit \& Event Background

2 The visit will take place between 10am and 11:30 am on Friday 21 February 2020.
3 Principal Ivan Davis will meet the Prime Minister at 10am at the main school gate entrance, which is adjacent to the carved waharoa.

4 The school has not yet provided a finalised run-sheet for the event. We understand that this is being provided directly to the Prime Minister's office.

5 The College would like the Prime Minister to unveil a plaque, and there will also be opportunities to meet and greet students and parents and to enjoy performances by the College's Māori cultural group.

6 There will be a pōwhiri, and the school will provide a kaikorero.

The Prime Minister will be seated with the Principal, Tumuaki and members of the Board of Trustees.

8 The school is expecting the whole school community, as well as current and past pupils, to attend. They are estimating there will be $2,000-3,000$ attendees.

## Communities of Learning | Kāhui Ako (Kāhui Ako)

9 The College is part of Te Kāhui Ako o Waitematā. There is a pathway from the eight contributing primary schools to the three intermediate schools and on to Western Springs College | Ngā Puna o Waiōrea.

Students from the four primary schools which offer Level 1 Māori medium feed into Māori medium programmes at Kowhai Intermediate and Pasadena Intermediate. These schools then transition on to Te Rumaki Reo at Western Springs College | Ngā Puna O Waiōrea. The Rumaki also enrols a significant number of students from outside the Kāhui Ako pathway.

11 Te Kahui Ako o Waitematā consists of 12 schools. These are:

- Western Springs College | Ngā Puna o Waiorea
- Point Chevalier School | Rangi Mata Rau
- Pasadena Intermediate| Waitititiko | He Huarahi Reo Māori
- Grey Lynn School Bayfield School | Tukitukimuka
- Westmere School | Te Rehu |Ngā Uri o Ngā Iwi
- Newton Central School | Te Kura-ā-Rito o Newton | Te Uru Karaka \& Te Awahou
- Freeman's Bay School / Waiatarau | Whānau Ata
- Richmond Road School|Te Kura o Ritimana | Te Whānau Whariki
- Ponsonby Primary School | Rimutahi
- Bayfield School / Tukitukimuka
- Ponsonby Intermediate
- Kowhai Intermediate | Te Whānau Pounamu.

July 2019 roll data shows a total of 6,535 students attend these schools - 1,112 (17\%) identify as Māori and 548 ( $8 \%$ ) as Pacific.

The Kāhui Ako has finalised its achievement challenges and high level plan. These were endorsed by the Minister on 14 December 2017. The Kāhui Ako has identified six high level challenges:

## Achievement challenges

- Writing Achievement Challenge:
1.1 - Writing for Year 1-8 students in English medium and Maori medium settings, including specific goals for boys, Māori and Pacific learners.
1.2 - Year 10 English medium Cohort overall achievement.
1.3 - NCEA Level 2 NCEA Achievement Standard AS 91101 over all achievement.
- Year 1-10 Kōrero (Māori medium).
- Raising student achievement for all students through student agency and how it contributes to wellbeing.
- Level 1 NCEA Endorsement rates.

## Process challenges

- Transitions through to Tertiary (18-24).
- Learners with additional learning needs: Dyslexia.

14 A copy of the high level plan showing the development of the challenges and how Te Kāhui Ako o Waitematā intends to tackle these is attached as Annex 1.

## School Background

## Profile Information

| Authority | State |
| :--- | :---: |
| School Type | Secondary (Year 9-15) |
| School Gender | Co-Ed |
| Education Medium | English / Te Reo Māori |
| Decile | 8 |
| Electorate | Mt Albert |

15 The July 2019 breakdown of roll information is shown below:

| July 2019 Roll | Number | Percentage (\%) |
| :--- | :---: | :---: |
| Māori | 353 | 22.7 |
| Pacific | 81 | 5.2 |
| Asian | 150 | 9.6 |
| Other | 32 | 2.1 |
| European/ Pākehā | 829 | 53.3 |
| International | 111 | 7.1 |
| Total | 1,556 | 100 |

16 The College was last visited by the Education Review Office (ERO) in 2015. ERO is due to return this year.

Western Springs College provides high quality education for its community. A responsive and innovative curriculum provides rich opportunities for students'learning and qualifications success. Students flourish in this environment. They are articulate, confident and well equipped to transition into tertiary study and the adult world.

## School Donations Scheme

18 The College is not eligible to sign up for the donations scheme as they are a Decile 8 school.

19 Parents/caregivers are asked to make an annual donation. These funds help provide for educational, cultural, social activities and health services not covered by government funding.

20 School donations make a vital contribution to the running of Western Springs College. The school donation requested is $\$ 500$ if there is one student in the family, or $\$ 600$ if there are two or more students from a family.

## Student and School Achievements

21 Western Springs College's NCEA results continue to be at an impressive level, maintaining high grade quality levels. These results are above the national expectations across all year levels. The results are similar for Māori and Pacific students.

2277 per cent of Year 13 students gained University Entrance (UE) at the end of last year, compared with an average of 66 per cent across all decile 8 to 10 schools.

2371 per cent of both Māori and Pacific students achieved UE, compared with 56 per cent of Māori and 55 per cent of Pasifika students across all schools in those top three deciles.

## Learning Support

24 Western Springs College was not allocated any Learning Support Co-ordinators in the first tranche.

## Property

## Building history

25 The College was built in 1962 while a landfill was still operating to the north and east of the school. The College had ageing infrastructure and buildings with weathertightness issues.

26 In 2015 a significant project was undertaken which remediated a lot of these weathertightness issues (Stage 1 redevelopment). A business case for stage 2 of the College's redevelopment will go for Cabinet approval this year, and if approved will resolve the outstanding weather-tightness issues.

## Redevelopment specifics

27 The new teaching block, known as the Ken Havill Centre of Learning, comprises a 51 teaching space equivalent building. The redevelopment also provided a new Gymnasium, Rumaki - Whare Ako building (12 teaching space equivalent), Whare Tapare (multi-purpose space) and saw the conversion of an existing Social Sciences space into a Music space. The Library has been converted into a café space. Extensive associated site works, car parking, and demolition of the original 1960s classroom blocks have been undertaken.

28 Note the original announced budget was $\$ 79 \mathrm{M}$. The current approved budget is now \$96M.

## Completion of Stage One redevelopment

29 The delivery of Stage 1 is currently the largest redevelopment of an existing school undertaken by the Ministry, and it replaced nearly $80 \%$ of existing teaching spaces.

## Stage Two

30

## Flexible Learning Model

33 The new facilities see a shift from single cell teaching to providing flexible, quality learning environments.

## Issues/Risks

A weather-tightness remediation project for the Auckland Performing Arts Centre (TAPAC) was announced by the former Minister Kaye as its own individual project that was to occur alongside the Stage One redevelopment project. This has been deferred as we work through the finer details of the project with the other building owners (the Ministry owns $25 \%$ of the building with two other parties).

## Relevance to the Minister's delegations and how this organisation might support his work programme

36 The delivery of this project gives effect to the Education Portfolio Work Programme to rebuild outdated school buildings at the end of economic life, so every learner and school has access to quality learning environments by 2030.

37 This part of Auckland is a significant growth area (in particular the CBD), identified as part of the Auckland Growth Plan. We expect both the underlying student population
and the share of students enrolled at the College to increase. The opening of the new campus is a timely response to this anticipated growth.
$38 \quad 17$ additional roll growth classrooms have been identified in Budget 2019 as well as a new two-classroom satellite for Central Auckland Specialist School.

## The College's Alternative Constitution

39 You approved an Alternative Constitution for the Western Springs College Board of Trustees in March 2019. The Board is committed to co-governance, and has formalised this long-standing practice with a constitution customised to fit the specific needs of Western Springs College - Nga Punā o Waiōrea.

40 The Alternative Constitution is based on the spirit of equality between the two treaty partners. Included within Western Springs College's Strategic Plan under goal three is the commitment to "achieve equitable status for Ngā Puna o Waiōrea Kura Rumaki and full co-governance status for Māori." This is unique to Western Springs College/Nga Punā o Waiōrea and to Auckland.

41 We have been working with Western Springs College/ Nga Punā Waiōrea to consider what operational funding model might best support their co-governance arrangements and more effectively allow them to manage future roll growth at the College.

## Enrolment Scheme

42 Western Springs College operates an enrolment scheme that runs from Pt Chevalier through to Kingsland and the CBD. The College manages enrolments effectively.

43 This part of Auckland is a growth area, in particular the CBD. We expect both the underlying student population and the share of students enrolled at Western Springs College to increase. The opening of the new campus is a timely response to this anticipated growth.

## Proactive Release

44 We recommend that this Briefing is proactively released as per your expectation that information be released as soon as possible. Any information which may need to be withheld will be redacted in line with the provisions of the Official Information Act 1982.

Annex 1: Te Kāhui Ako o Waitematā Achievement Challenge

## TE KĀHUI AKO O WAITEMATĀ

Pīata Wai te Matā

# Te Kāhui Ako o Waitematā 

Pīata Wai te Matā

Te Kāhui Ako o Waitematā supports explorers and whānau to navigate their way through the waves of their transformational, educational journey so that it is impossible to fail. Our paddles are guided by ancient star charts and contemporary coordinates, adjusting our sails to the winds of tomorrow.

With reliable charts and sustainable provisions as cooperative components, we give life to the words of our Kähui Ako visionary, the late Ken Havill - "Wouldn't it be great if we could create a community where it is impossible to fail?" This question signified the beginning discussion around our collective aspirations as a kāhui ako.

The Waitematā Kāhui Ako brings together 12 kura located in close proximity to our Harbour, whose name is derived from Te Matā, the Flint Stone, a pinnacle rock referred to on maps as Boat Rock and visible at low tide off Kauri Point.

Tribal tradition relates that Te Matā served as a boundary mark for hapū fisheries and a tapu ceremonial site. Te Matā was also the repository of tribal mauri, an enduring landform which withstands the ebb and flow of the tides.

It symbolises Te Tiriti o Waitangì relationship of tino rangatiratanga and kawanatanga that lies at the heart of the Waitematā Kahui Ako. Tiriti based governance is fundamental to the operations of the Waitematā Kāhui Ako to ensure all families access the educational pathways they determine will ensure success for their tamariki.

The Māori medium education kura within the Kāhui Ako are known collectively as $\mathrm{Te} \operatorname{Reo~o~} \mathrm{Te}$ Matā in recognition of the mana and responsibility they shoulder for the preservation and development of mātauranga Maori, te reo me onā tikanga. All student learning is enriched by the provision of te reo Māori and exploration of the compelling history of Tāmaki Makaurau.

We are a fleet of individual waka, originating from unique positions, all heading to Te Matā.

# Mā te hoe ngātahi ka ū ō tātou waka ki Te Matā Through collaboration we reach our destination 

## Pīata Wai te Matā

## BEHIND THE WHAKATAUKİ

The 'Matā' in this context is a metaphor for a number of things. It represents the unique and rich Māori history, tikanga and language that is central to the identity of the Kähui. It 'glistens' because the knowledge it signifies is important to all learners and educators within the Kāhui Ako and has a special place within our own local curriculum.

The 'Matā' can also represent the learner, as the 'glistening' of the Matā symbolises the success and achievement of the student. Just as the Matā can be seen as the mauri or the life force of the area, so too can it represent the learner, as students are central to the Kähui Ako.

This whakataukī celebrates our unique Kāhui Ako by using an historical landmark as the mauri of our kaupapa while also demonstrating the aspirations that the Kāhui has for our learners.

## BEHIND IMPOSSIBLE TO FAIL

Ken Havill (8.12.49-29.4.17) Principal of Western Springs College for 19 years, and deputy principal for 7 years exemplified the very best qualities of the New Zealand teacher. Totally committed to the value of meeting the diverse needs of ALL learners, Ken was determined in his work to provide stimulating and affirming opportunities for all. A liberal in the true sense of the word, Ken strongly believed in social justice and coeducation and bilingual education.

His legacy lies in the opportunities he gave to staff, students and the community to develop their abilities, gain self-confidence and contribute to the betterment of society. In the first initial meeting of this kāhui ako in 2015, Ken stated, "Wouldn't it be great if we could create a community in which, for all our learners, it was impossible to fail?"

This sentiment was enthusiastically endorsed by all our Principals who could see the potential in working together to strengthen the process of transition between our schools and which recognised the power that collaborating together offers our schools at many levels.

## Background and Purpose

Te Kāhui Ako o Waitematā is comprised of 12 schools, seven of which offer Māori medium education.

. Western Springs College | Ngā Puna o Waiorea<br>- Point Chevalier School | Rangi Mata Rau<br>- Pasadena Intermediate | Waitititiko | He Huarahi Reo Māori - to be established in 2018<br>- Grey Lynn School<br>- Bayfield School \| Tukitukimuka<br>- Westmere School | Te Rehu |Ngā Uri o Ngã Iwi<br>- Newton Central School | Te Kura-ā-Rito o Newton | Te Uru Karaka \& Te Awahou<br>- Freeman's Bay School | Waiatarau | Whānau Ata<br>Richmond Road School | Te Kura o Ritimana | Te Whānau Whariki<br>- Ponsonby Primary School | Rimutahi<br>- Ponsonby Intermediate<br>Kowhai Intermediate \| Te Whānau Pounamu (Functional relationship)

The Kāhui Ako has evolved from the Waitematā Network, a grouping of Western Bays schools who in 2015 decided to establish a "Network of Learning" to facilitate better liaison and improve student outcomes. Reciprocal visits highlighted similar challenges and aspirations. In July 2016, five other primary schools joined the Network and by October agreement was reached amongst the Principals of 11 schools to ask their BOTs to agree to formally explore the possibility of becoming a Kāhui Ako.

Leaders of Māori medium education units were also often classroom teachers. We used Kāhui Ako funding to ensure Te Reo o te Matā met both together and as part of the wider Principals group so they could fully participate in all decision making in the establishment of the Kähui Ako.

Hui for leaders of Māori medium units were therefore held in accordance with the Tiriti o Waitangi foundations on which the Kāhui Ako was to be based. This allowed for discussion of the pedagogical and philosophical positions of each unit and an opportunity to explore governance and rules of engagement in a Tiriti-based Kāhui Ako.

The majority of Māori medium units within the Kāhui Ako are well established with strong whānau support. While each kura or unit preserves a distinct history, together they share a developing collective identity.

Te Whānau Pounamu, the Māori medium unit of Kowhai Intermediate has a "functional relationship" with the Kähui Ako, for while the school is a formal member of the Mt Albert Community of Learning, it accepts students from the feeder Primary Schools offering Māori medium education.

From the start of this journey, there was an acknowledgement that the preliminary stages could not be rushed and meaningful time spent building consensus on shared kaupapa is essential to ensuring our long-term success.

There is a pathway from the eight contributing primary schools to the three Intermediates and on to Western Springs College. Currently students from the four Māori medium primary schools can feed into Kowhai Intermediate and, from 2018 Pasadena Intermediate. These schools then transition on to Te Rumaki Reo at Western Springs College \| Ngā Puna O Waiorea. Ngā Puna o Waiorea also enrols a significant number of students from outside the Kāhui Ako pathway.

| Total Students | 321 | 1146 | 83 | 32 | 173 | 1016 | 3556 | 874 |

The 2017 Education Review Office identified that all our schools are characterised by:

- a high priority placed on inclusion and the provision of educational opportunity for all
- established professional cultures of learning that seek out responsive solutions to provide success for our students

Common strengths include:

- providing broad and well-balanced curricula
settled, positive learning environments based on respectful relationships
good support for student wellbeing to learn
- identifying, monitoring and implementing programmes and interventions for young people at risk of not achieving

In exploring each other's schools, we identified the following common aspirations:
to understand how student voice builds independence and a lifelong love of learning through every transition in the Kāhui Ako
to establish seamless services for students with learning needs
to strengthen transition processes for whanau between schools within the Kāhui Ako
To empower learners to be collaborative, critical thinkers and problem-solvers (Learning how to learn)

- To engage students by personalising their learning, encouraging inquiry and exposing students to a wide curriculum that will spark their passions and interests. Learning is relevant, purposeful and students are excited about learning
- To ensure curricula include inquiry into the history of our area - Māori, contact, post Treaty
To strengthen te reo Māori programmes within English Medium education schools
- To support teaching staff to be effective within new Innovative Learning Environments
- To support teaching staff to grow their future focused capabilities in using digital technologies integrated into learning design that supports inquiry, creativity and problem solving

## Our Symbol

We acknowledge Oscar Furness-Wills, Year 13, Western Springs College | Ngā Puna O Waiorea for creating our symbol from our Vision, Values and story of our region.

The map locations of our 12 kura and schools are formed into a star-map/constellation. This is a direct reference to the original "ancient star charts" that our ancient ancestors navigated by on their journeys around the globe. They were in tune with their environment and each other serving common goals. We too source the guidance of the "ancient star maps", as the metaphor and philosophy for working together.

The image of the stars also refers to the purpose of a net how it is a tool used to provide and sustain the needs of our people. Having this objective in place will make it "impossible to fail" for students. By sharing the navigational knowledge to our future generations, they will be better equipped to navigate their journey in education.

The watermark is Rauru, it can be seen as an educative cycle. One half of the Rauru symbolises Ranginui and the other half of the Rauru represents Papatuanuku. Together both Deities maintain the intrinsic balance of Life for all living beings and kaupapa within our Kāhui Ako.The centre of the Rauru refers to the potential within kaupapa. Our connection to Mana Whenua of Tāmaki Makaurau; Ngati Whatua, Te Kawerau a Maki, Te Waiohua, Ngati Paoa, Waikato our Kāhui Ako of kura and schools stems from this centre of potential.

The blue represents both moana and Rangi. Our ancient ancestors, as well as our proficient exponents of today, have used the knowledge of the oceans and skies for navigation purposes. We as a Kāhui Ako will learn this environment of matauranga and by philosophy, navigate our future generations to calm fruitful, waters and destinations to enable them to exercise and develop further their innate potential of talents. This shade of blue does not have an association with any of our particular schools or kura. This symbolises our collaborative kaupapa.

In the top left we see Te Matā, the Flint Stone, a pinnacle rock referred to on maps as Boat Rock and visible at low tide off Kauri Point. Tribal tradition relates that Te Matā served as a boundary mark for hapū fisheries and a tapu ceremonial site. Te Matā was also the repository of tribal mauri, an enduring landform which withstands the ebb and flow of the tides.

We are a fleet of individual waka, originating from unique positions, all heading to Te Matā. Mauri Te Matā

# Mā te hoe ngātahi ka ū ō tātou waka ki Te Matā Through collaboration we reach our destination 

## Process of Engagement

Te Kāhui Ako O Waitematā comprises two distinct decision-making bodies, whose status is confirmed by the articles of Te Tiriti o Waitangi. These bodies are Te Tangata Whenua and Te Tangata Tiriti.

Their decision-making powers are defined as Te Tino Rangatiratanga (Article 2) exercised by Rangatira on behalf of Tangata Whenua/Hapū/Iwi and Kawanatanga (Article 1) exercised by the Crown/Crown Agencies on behalf of Te Tangata Tiriti (those who have immigrated to Aotearoa/NZ from other nations).

In the context of this Kähui Ako, Tangata Whenua are represented by Te Reo o Te Matā, comprising leaders of Māori Medium education. Tangata Tiriti are represented by the Principals/Senior Leaders of the 12 contributing schools. Both groups work collaboratively within the Stewardship, Selection Panel and School Leadership teams.

Te Reo o Te Matā holds responsibility to consult with or organise hui with Ngā Mana Whenua o Tämaki Makaurau Collective in all matters that require mana whenua approval. Te Reo o Te Matā also exercises tino rangatiratanga in the practice of tikanga during Kāhui Ako events, however each kura maintains its own autonomy in this domain within their own school setting.

In this Tiriti-based model of governance, Te Reo o Te Matā hui separately before School Leadership Team meetings to ensure members' perspectives in relation to Achievement Challenges and Kāhui Ako business are canvassed and then conveyed. Consensus decision making operates within Stewardship and School Leadership Team meetings, guided by the principles of equity, respect, good faith and collaborative problem solving. While decision making is informed by government policy, Tangata Tiriti representatives acknowledge the rights enshrined in Te Tiriti o Waitangi and the challenges Mãori communities continue to face to develop effective educational initiatives for their tamariki.

## Te Kāhui Ako o Waitematā Leadership and Governance Model

School Boards of Trustees

## Who?

Elected and co-opted by school community
Have overall governance responsibility for their own schools.

Each Board signs an agreement to commit to the collaborative practices of the Kāhui Ako.

A Principal / Tumuaki is always a member of their school Board.

## What do they do?

Each BOT determines stewardship group representation in accordance with the Tiriti. Confirm Kāhui Ako leadership appointments.

Align school Charter / Strategic plan to Kāhui Ako achievement challenges
Appraise Kāhui Ako staff in their employ.

| Stewardship Group |
| :--- |
| Who? |
| The Stewardship group represents all Boards of Trustees |
| as Tangata Titiri and Te Reo o Te Matä as Tangata |
| Whenua. |
| What do they do? <br> They progress commitment to the Tiriti. <br> The Stewardship group appoints members from their <br> group to the Selection Panel in accordance with the intent <br> of the Triti. |

The stewardship group contributes to the Kāhui Ako expertise and as such can be available to the working action groups.
The stewardship group ensures the Kahui Ako operates smoothly under agreed and co-constructed protocols.

Kāhui Ako Appointed Leaders

## Who?

The vision is for Tiriti based co-leadership. In the first instance Leadership is advertised to the Principals within the Kāhui Ako. If there are no applicant/s or none are successful, the Leadership is advertised to senior leaders in both Primary and Secondary schools.
The Across-School teachers will be phased in over two appointment phases Term 2, 2018 (3 ASTs start) and 2019 Term 1 (others start). In the first phase of appointment for 'Across School Teachers', ensure 1 person is from Te Reo o Te Matā.

All Kāhui Ako appointed leaders/teachers will be on maximum 2 -year fixed term contracts as per collective agreements.

In-school teachers (BOT appointed) phased in over Terms 1 to 4, 2018 Maximum of 1 year fixed term contracts as per the collective agreements.

## What do they do?

Co-Leaders have a commitment to resourcing release for Te Reo o Te Matā. The co-leaders drive the expectations set out in the achievement challenges, provide opportunities for coaching and mentoring across schools, complete all the MOE required paperwork, provide data analysis, identify and communicate working action group needs, develop a clear communication strategy and manage the budget.

Cross School leaders carry out their job as per agreed job descriptions.
The people appointed by the stewardship group

What do they do?
The selection panel act alongside the MOE appointed external advisor in selecting the Kāhui Ako leaders, as set out in the
memorandum of agreement and collective agreements for Kāhui Ako leaders and across school teachers.
The group references job descriptions, process the appointments and recommend appointed leaders to BOTS for approval.

Meet as per the appointment requirements.

## Working Action Groups

## Who?

The working action groups are made up of experts identified by the stewardship and school leadership groups. These WAGS come together as needed, to support the work of the Kāhui Ako.

## What do they do?

They work as small groups providing resource or guidance e.g. complaints resolution, finance and budget advice, appraisal support, health and safety, political influence and down to aspects such as possible Kāhui Ako relief teacher pools.

# Theory of Improvement - Te Kāhui Ako o Waitematā <br> From the current reality that all schools have their own model of inquiry To the Kāhui Ako building shared knowledge, understanding, validity and impact 

## Detailed How? <br> Systems and Processes

Develop our own CoL model to consolidate the bundle of practices around "Students Taking Control of their Learning"

Share Collaborative Inquiry models
to improve teacher practice: e.g.
teaching as inquiry, appreciative inquiry

Utilise the EDuCANZ standards to drive student agency and achievement

Embed whānau partnership
Unpack collaborative practices
Generate valid reliable moderation practices

Improve validity of data across schools

Develop valid collaborative data systems

# Achievement Challenge One <br> An initial focus on raising achievement for all students in Writing | Tuhituhi 

## Narrative

Analysis of tuhituhi and writing showed trends and patterns clearly identified across all schools in both the English medium and Rumaki.

We have identified target subgroups as; Māori, Pasifika and Males.

| Moving Students from Below Standard to at Standard <br> Primary and Intermediate Level |  |
| :---: | :---: |
| Years 1-8 Overall Achievement <br> Tuhituhi Māori Medium <br> $71 \% 103$ of 146 ākonga are achieving 'Manawa Ora' or 'Manawa Toa' their Ngā Whanaketanga Rumaki Māori in Tuhituhi. We are aiming to increase this to $86 \% 126$ of 146 akonga by 2020. | Tuhituhi Māori Medium <br> This will mean moving an additional 23 NWRM ākonga, which will include our identified subgroups; <br> NWRM - Tama $=12$ |
| Years 1-8 Overall Achievement <br> English Medium <br> $80 \% 3255$ of 4065 students are achieving 'At' or 'Above' their National Standard in Writing, we are aiming to increase this to $86 \% 3504$ of 4065 students by 2020. | English Medium <br> This will mean moving an additional 249 students, which will include our identified sub groups; <br> N.S. Māori learners $=28$ <br> N.S Pasifika learners $=23$ <br> N.S Male students $=125$ |

## Year 10 English Medium Cohort Overall Achievement

82.1\% (157 of 191) students in the Year 10 cohort gained Achieved/Paetae, Merit/Kaiaka, or Excellence/Kairangi in the English Department's main writing assessment.

Of the students who did not achieve, males were heavily overrepresented, and both Māori and Pasifika were overrepresented. (Precise numbers are not included here as individual students could be identified.)

Year 10 English Medium Cohort Overall Achievement $18.3 \%$ (35 of 191) students in the Year 10 cohort gained Excellence/Kairangi in the English Department's formal writing assessment.
Of the students who gained Excellence/Kairangi males are underrepresented (15 of $3543 \%$ in a boy heavy cohort), and both Māori and Pasifika were not represented at all.

We are aiming to increase this rate to $90 \%$ (172 of 191) of äkonga by 2020, and also to move male achievement up to be in line with that of females. Māori and Pasifika achievement are to be in line with the achievement of the cohort overall.

This will mean moving 15 students.

We are aiming to increase this rate to $25 \%$ (48 of 191) of ākonga by 2020, and also to move male achievement up to be in line with that of females. Māori and Pasifika achievement are to be in line with the achievement of the cohort overall.

This will mean moving 13 students.

Level 2 NCEA English Achievement Standard AS 91101 Overall Achievement
Achievement Standard (AS) 91101, Produce a Selection of Crafted and Controlled Writing, is taken by the entire Year 12 Cohort (apart from a small number of accelerated students, ESOL students, high needs students, and students who leave before the end of the school year.)
This AS is the primary route that students use to gain University Entrance (UE) Literacy Writing. It also helps students gain the additional specific literacy entry requirements that several New Zealand universities insist on. Students simply need to cross the Achieved threshold to exceed the 5 Level 2 writing credits that are required for the UE Literacy (Writing Element).

251 of the cohort who took this AS 84.1\% (211 of 251) gained Achieved/Paetae, Merit/Kaiaka, or Excellence/Kairangi. Of the 40 students who did not achieve this AS 29 (74\%) were boys and only 11 (26\%) girls. Māori made up 21 of 40 (53\%) of the students who did not achieve this AS. Pasifika achievement paralleled the achievement rate for the cohort in general.

We are aiming to increase this to $90 \%$ (226 of 251) of ākonga by 2020. We also want to move male achievement up to be in line with that of females. In addition, we aim for Māori achievement to be in line with the achievement of the cohort overall.

This will mean moving 15 students.
N.B. Data tolls of more direct relevance to Maori Medium students will be developed in 2018, and appropriate targets then set to parallel those for the English Medium part of the Year 10 cohort set out above.

## Achievement Challenge Two <br> An initial focus on raising achievement for all students in Kōrero

## Narrative

By analysing the data from Rumaki within the Kāhui Ako o Waitematā, trends and patterns were identified. These trends and patterns highlighted 'Manawa Toa' and 'Manawa Ora' within Te Reo Matatini.

Te Reo Matatini acknowledges the significance of Kōrero as the foundation of communication across Mārau Literacy

| Körero | $67 \%$ | (137 of 204) |
| :--- | :--- | :--- |
| Tuhituhi | $69 \%$ | $(140$ of 204$)$ |
| Pānui | $52 \%$ | $(106$ of 204$)$ |

Currently 29 of 51 (57\%) Year 9 \& 10 students are achieving Kaiaka and Kairangi, NZC - Te Aho Arataki Marau i te Reo Māori. Therefore, we will shift 22 students in Year 9 \& 10.

After discussion, kōrero was identified as not only an area of need, but also an area that would have a direct impact on the learner's progress and pathway through all other learning areas within Te Marautanga o Aotearoa - NZC, particularly Tuhituhi and Pānui.

| Current Situation |  |  |  |  |  | Target |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Years 1-8 Kōrero <br> Currently $67 \%$ or 137 out of a total 204 Year 1-8 students are achieving 'Manawa Toa' or 'Manawa Ora' Te Marautanga o Aotearoa. Therefore 67 students are not reaching their full potential. |  |  |  |  |  | By the end of 2020 we will lift our achievement to $100 \%$ (204 of 204) of all Year 1-8 students are achieving 'Manawa Toa' or 'Manawa Ora' Te Marautanga o Aotearoa. This will mean moving 67 additional students. |  |  |  |  |
| Years 9 \& 10 Kōrero <br> Currently 29 of 51 (57\%) Year 9 \& 10 students are achieving Kaiaka (Merit) and Kairangi (Excellence) NZC - Te Aho Arataki Marau i te Reo Māori. Therefore 22 students are not reaching their full potential. |  |  |  |  |  | By the end of 2020 we will lift our achievement to 100\% (51 of 51) of all Year 9 \& 10 students are achieving Kaiaka (Merit) and Kairangi (Excellence) NZC - Te Aho Arataki Marau i te Reo Māori. This will mean moving 22 additional students. |  |  |  |  |
| Current | tate |  | 2018 |  |  | 2019 |  |  | 2020 |  |

## Targeted students for Körero

# Achievement Challenge Three An initial focus on raising achievement for all students in Student Agency and how it contributes to Wellbeing 

#### Abstract

Narrative This Achievement Challenge is focusing on Student Agency and Innovative Learning Environments and their relationship to wellbeing. In order to achieve successful outcomes, our students need to be agentic in their learning (agency) and their wellbeing is integral to that success. We believe that our student agency is inclusive of whānau aspirations which are captured and visible in our graduate profile.

We have included agency and Innovative Learning Environment as our achievement challenge because we consider this to be transformative, enabling our graduates to be successful lifelong learners, well-equipped with key competencies and strategies for learning. In some of our schools ILEs are being supported by a move to flexible learning spaces (FLSs). As our schools develop Innovative Learning Pedagogies, student agency and wellbeing will underpin a future-focussed approach so that our learners are active participants who are able to manage their own learning and operate successfully in any space.

## Student Agency

We have collected baseline data using a survey asking students (Year 6 and above) and staff five questions related to agency. While this has provided us with useful information we will need to develop a tool which provides a fuller analysis of what agency looks and sounds like, across year levels, gender, ethnicity, whānau and teachers (for instance, NZCER Wellbeing Survey).

The data allows us to have a clear, shared target for all teachers across our community as a starting point for further deepening of collective knowledge in regards to agency. There is no significant difference between male and female data or significant difference between primary and intermediate school data.

Our intention is to resurvey our students to gauge the level to which they consider they are agentic in their learning. This survey will determine levels of agency by age level, gender, and ethnicity.

This will further refine our baseline data, however, we will remain focused on students being $100 \%$ usually or always agentic in their learning.

## Flexible Learning Space and Student Welfare

We have identified FLS as an area of focus within the student agency and how it contributes to wellbeing Achievement Challenge. All students at Western Springs | Ngā Puna o Waiorea will be moving into FLS in 2019. Through the survey we have canvassed student voice to gain insight into students current thinking about the space and how this may impact on their achievement.

To Increase Student Agency \& Flexible Learning Environment how it Contributes to Wellbeing
$100 \%$ of our students feeling they have agency in their learning as evidenced by student and teacher perception surveys.

## Year 1-13 Student Agency Data

## Current Situation

In 2017, 1374 of 2368 students (58\%) responded as 'always' or 'usually' looking at their learning and selfassessing.

In 2017, 1621 of 2368 students (68\%) responded as 'always' or 'usually' using feedback to improve my learning.

Target

We will lift this to $100 \%$, a $42 \%$ shift by 2020. This will means moving 994 responses from 'never' or 'sometimes' to 'usually' or 'always' looking at their learning and self-assessing.

We will lift this to $100 \%$, a 747 (32\%) shift by 2020 . This will mean moving 747 responses from 'never' or 'sometimes' to 'usually' or 'always' using feedback to improve my learning.

We are focussed on $100 \%$ of our students feeling great about Flexible Learning Space and how it will improve their learning.

Year 9 \& 10 Wellbeing Data Around Moving into FLS

Current Situation

In 2017, 167 of 390 students (43\%) responded with a scale of 5, 6, 7 - 'great it will improve my learning'.

Target

We will lift this to $100 \%$, a $57 \%$ shift by 2020. This will mean moving 223 responses with a scale of 5, 6, 7-'great it will improve my learning'.

## Targeted students for student agency

The number of students to be moved from 'never' or 'sometimes' responses for each survey question recorded in the following table. This data is for students from Year 6 and above. Return rates were not consistent across schools.

| Kura | Targeted students for Agency |  |  |
| :---: | :---: | :---: | :---: |
|  | Total number of students who responded | I regularly look at my learning and selfassess | I seek out feedback to improve my learning |
| Western Springs College Ngā Puna o Waiorea | 920 | 457 | 399 |
| Bayfield School Tukitukimuka | 98 | 13 | 7 |
| Freemans Bay School Waiatarau | 92 | 65 | 43 |
| Grey Lynn School | 108 | 43 | 46 |
| Kowhai Intermediate Te Whānau Pounamu | 41 | 22 | 16 |
| Newton Central School Te Kura-ā-Rito o Newton | 89 | 23 | 21 |
| Pasadena Intermediate Waitītiko | 215 | 92 | 57 |
| Point Chevalier School Rangi Mata Rau | 144 | 49 | 44 |
| Ponsonby Intermediate | 387 | 142 | 57 |
| Ponsonby Primary School Rimutahi | 85 | 22 | 14 |
| Richmond Road School <br> Te Kura o Ritimana | 15 | 5 | 6 |
| Westmere School Te Rehu | 174 | 61 | 37 |
| Total Students | 2368 | 994 | 747 |

## Achievement Challenge Four

## Level 1 NCEA Endorsement Rates and Priority Learner Pass Rates

## Narrative

- A small but noticeable dip in Level 1 Excellence Certificate Endorsement in 2016 compared to 2015.
(a) Disparity in endorsement rates in relation to gender and ethnicity.
- Rates for Māori and Pasifika boys achieving Level 1 NCEA are significantly below their male Pakeha peers (although the raw numbers not-achieving are small).
- It may well be that the three trends identified above cannot be remedied by looking at WSC/NPoW's Year 11 provision alone, they may reflect underlying issues which are linked to the college's Year 9 and 10 provision and/or provision at earlier levels in our kāhui ako.

## Target 1

To increase the numbers of male students gaining NCEA Level 1 with Excellence from 14.8\% (28 of 189) of students to over $26.4 \%$ ( 50 of 189) of students - which is within $5 \%$ of the Excellence endorsement rate for girls.
This is an additional 22 students.

At the same time, to ensure that an additional number of boys move from simply achieving NCEA to achieving with endorsement, raising the numbers from $55.6 \%$ ( 105 of 189) of students to over $61.4 \%$ (116 of 189) of students - which is within $5 \%$ of the endorsement rate for girls.
This is an additional 11 students.

## Target 2

To increase the numbers of Māori girls gaining NCEA Level 1 with Excellence from $17 \%$ (8 of 47) of students to over $26.4 \%$ ( 13 of 47) of students - which is within $5 \%$ of the overall Excellence endorsement rate for girls overall.
This is an additional 5 students.

## Target 3

To increase the numbers of English Medium Māori and Pasifika students gaining NCEA Level 1 from $82.1 \%$ ( 46 of 56 ) of students to at least $89.6 \%$ ( 51 of 56 ) of students - which is equal to the overall achievement rate for all students.
This is an additional 5 students.

## Overall

This adds up to 43 students gaining or improving their achievement level at NCEA Level 1.

Key Data A - 2015 and 2016 Level 1 NCEA Roll-Based Overall

| Group | Total Number | $\begin{aligned} & \text { N@ L1 } \\ & \text { NCEA } \end{aligned}$ | Number gaining 11 NCEA | A @ 1 NCEA (no endors.) | $M$ endors. <br> @ L1 NCEA | E endors. @ <br> L1 NCEA | Combined M/E endors.@ L1 NCEA |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $\begin{array}{r} 2015 \\ \text { Overall } \end{array}$ | $\begin{aligned} & 100 \% \\ & (284) \end{aligned}$ | $\begin{gathered} 10.9 \% \\ (31) \end{gathered}$ | $\begin{gathered} 89.1 \% \\ (253) \end{gathered}$ | $\begin{gathered} 25.0 \% \\ 71 \end{gathered}$ | $\begin{gathered} 34.2 \% \\ 97 \end{gathered}$ | $\begin{gathered} 29.9 \% \\ 85 \end{gathered}$ | $\begin{gathered} 64.1 \% \\ 182 \end{gathered}$ |
| $\begin{array}{r} 2016 \\ \text { Overall } \end{array}$ | $\begin{aligned} & 100 \% \\ & (326) \end{aligned}$ | $\begin{gathered} 10.4 \% \\ (34) \end{gathered}$ | $\begin{gathered} 89.6 \% \\ (292) \end{gathered}$ | $\begin{gathered} 29.4 \% \\ (96) \end{gathered}$ | $\begin{gathered} 38.3 \% \\ (125) \end{gathered}$ | $\begin{gathered} 21.8 \% \\ (71) \end{gathered}$ | $\begin{aligned} & 60.1 \% \\ & (196) \end{aligned}$ |

(Note - 2015 was a smaller cohort than 2016)

## Analysis of Key Data A

The ratio of those achieving NCEA Level 1 to those not achieving it was almost unchanged between 2015 and 2016, at roughly 9:1.

There was however a 4\% drop in those gaining Certificate Endorsements ( M and E combined) and a more pronounced 8.1\% drop in those gaining an E Certificate Endorsement.

Key Data B - 2016 Roll-Based Full Level 1 NCEA Data by Gender and Ethnicity
See chart on page 26 for detailed table of information.

## Analysis of Key Data B

Pass Rates - Disparity in Relation to Ethnicity.
Pass rates in 2016 were high in comparison with other similar schools and with national expectations. This reconfirms a pattern established and maintained over a number of years. There was general parity (below 5\% difference) between distinct gender and ethnicities and the whole cohort rates in 2016. For both Māori English Medium and Pasifika students, however, the disparity was in the 7-8\% range, with these students performing less well than the whole school rate and this disparity was more pronounced for male students.

Certificate Endorsement Rates - Disparity in Relation to Gender and Ethnicity, and in Relation to Medium for Māori Students.
Whilst there was a gap (in favour of girls) of $10.8 \%$ between girl and boys achieving M or E Certificate Endorsements, the gap expanded to $16.6 \%$ in terms of E endorsements alone. Similarly, whilst Mäori girls were just $2.6 \%$ below the combined endorsement rates for girls in general, they were $14.4 \%$ below the E endorsement rate alone. The combined endorsement rate for Māori boys was $21 \%$ below that for boys in general, with Pasifika boys being $27.7 \%$ below. At $34.6 \%$ the combined M and E endorsement rate for Māori boys taught in Maori Medium was almost double that for Māori boys taught in English Medium - the parallel differential for Māori girls between the two media was much less pronounced.

Key Data B - 2016 Roll-Based Full Level 1 NCEA Data by Gender and Ethnicity

| Group | Total Number | N@11 NCEA | Number gaining <br> LINCEA | A@L1 NCEA (no endors.) | Mendors. @ LI NCEA | Eendors.@ II NGEA | combined MVE endors.@ L1 NCEA |

# Process Challenge One Secondary Focus <br> Transitions through to Tertiary (18 to 24) 

## Narrative

The NZC tasks schools with contributing to the development of confident, connected, and actively involved lifelong learners. It expresses this journey as moving from the Key Competencies (KCs) established at whāriki, through the KCs developed during the school year, and to those necessary for success at tertiary level. For instance, "Wellbeing" at whāriki, developing into "Managing Self" at school, and onto "Acting Autonomously" at tertiary. Western Springs College/Nga Puna o Waiōrea's (WSC/NPoW's) role is to build on the work of its pre-school, primary and intermediate Kāhui Ako partners and complete the preparation of our Kāhui Ako learners for tertiary study and/or training.

National data reveals that significant numbers of school graduates do not commence tertiary courses at the level most appropriate for them, and/or fail to complete the courses of study they embark on (changing courses or dropping out of tertiary education completely). Whilst the limited Kāhui Ako data we have access to does not suggest our graduates are more affected by these issues than the national average, a significant number of them do seem to be adversely affected.

We want to explore this in order to better prepare our Kāhui Ako graduates to thrive in tertiary education and/or the world of work, and to ensure coherent pathways for them to successfully complete qualifications and/or training beyond secondary school.

At present WSC/NPoW has a record of high achievement with 69\% (compared with 54\% nationally) of 2016 school leavers having NCEA Level 3, or Level 3 plus University Entrance award. The achievement for Māori leavers in the same year was 59\% (compared with $34 \%$ nationally), and for Pasifika students $64 \%$, compared with $43 \%$ nationally. We recognise that the majority of WSC/NPoW school leavers intend to transition to tertiary education, which resonates with whānau and the wider school community as a pathway to high skilled jobs and valued careers. We know that young people who achieve at least a Level 4 tertiary qualification will be better equipped with the specialist technical skills required to thrive in our future economy. To date, the WSC/NPoW school leavers 2011-2014 cohorts have a $85 \%$ transition rate to first enrolments at tertiary at Levels 1 and above, compared with $83 \%$ nationally. The equivalent transition rate to Level 4 and above is $66 \%$, compared to $51 \%$ nationally. These are positive statistics, but we wish to push further and ensure that all our graduates achieve what they are capable of.

## Questions we need to answer

WSC/NPoW's internal research has so far focussed largely on its students point of entry to tertiary, including level and institution (taking into account single gap years before starting study). This research hints at some discrepancies in relation to gender and ethnicity, and at a shift in the institutions that students are selecting. It also, however, leaves some questions not fully answered and raises further questions. We still need to know:
A. What proportion of our graduates are not completing the course of study they embark on and why?
B. To what extent do the following factors restrict our Kāhui Ako graduates' success at tertiary?

- Gap years/breaks in the study pathway

Horizontal misalignment (students not starting at the correct level of tertiary qualifications)

- False starts (students transferring from one course to another before completion)
C. Are there significant variations in relation to questions $(A)$ and $(B)$ according to student's gender, the ethnicity of students, and whether Māori graduates have taken an English Medium or Māori Medium route?
D. To what extent do students perceive the non-completion of qualifications and/or restricted success at tertiary as to how well the Kāhui Ako has prepared them for study after school, and to what extent do they attribute non-completion and/or restricted success to other factors?

As a Kähui Ako we believe that answering these questions will enable us to identify and tailor the actions we need to take in order to best prepare our graduates to succeed in the world beyond school.

## Process Challenge Two Learners with additional learning needs: Dyslexia

## Narrative

A key factor in catering for students with significant learning needs is effectively transitioning them to the next phase of their learning.

Analysis of data looking at trends and patterns from all schools clearly identified that $19 \%$ of our students have an identified learning need.

This is defined as...
any child who requires a different or differentiated programme or approach in any area of learning, or whose social or emotional state is such that this creates a difficulty with learning.

We have collated special needs register information from Years 1-13 as our baseline data. It is important to note that there is no normed or standardised approach to collating this data across the Kāhui Ako.

Initial Data
Preliminary data from schools shows

The numbers currently reflect only students who we have collated data for rather than our whole Kāhui Ako roll.

## Analysis of Initial Data

The data highlights two areas of immediate attention.
Those students identified as dyslexic 366 of 1078 (34\%)
Those identified as gifted 165 of 1078 (15.3\%)

We have included dyslexia as a 'process' target as we currently do not have sufficient evidence to show the impact of dyslexia on writing progress and achievement. Our hunch is that many of the students achieving below in writing could be due to dyslexia or due to being categorised twice exceptional-gifted. We intend to identify which percentage of students below or well below standard in writing have been diagnosed with dyslexia and which students may be unidentified. By addressing the needs of students with dyslexic tendencies in a more targeted way, and looking at how we measure them against the National Standards in Writing, we would hope to lift achievement in this area.

## Questions we need to answer

How many of those students below in writing are identified as dyslexic?
How many students achieving below may have unidentified dyslexia which is impacting on writing progress and achievement?

As a Kāhui Ako we believe that answering these questions will enable us to identify and tailor the actions we need to take in order to best provide support for those students identified.
